Subject: FW: s11C(1) TAI tweets blue carbon [SEC=OFFICIAL]

Hi s22

Following on our discussion yesterday, are the submissions and ERAC advice already up on our website today?

CER has flagged that a journo tweeted about it – see below.

s11C(1)

Cheers,

s22

OFFICIAL

Hi s22

This is for DISER to respond to, if you wish. Can you please pass on to your socials team? s11C(1) has published a series of tweets on the ERF methods MR, as you may be aware.

Thanks, s22

Many thanks for this update, s22 and welcome to s22

For broader awareness (especially for s22), a Timorese NGO, La'o Hamutuk, in partnership with the Environment Centre NT, recently organised a 'Mythbusting CCS Webinar' which discussed the Bayu-Undan CCS proposal. See <https://www.facebook.com/1992775230972994/posts/2993013267615847/?extid=0&d=n>

s33(a)

Speakers at the webinar included: John Robert (author of a recent report on Barossa CCS for Institute for Energy Economics and Finance Analysis <https://ieefa.org/ccs-no-answer-for-santos-barossa-gas-project/>); Polly Hemming (The Australia Institute); Jason Fowler (Environment Centre NT energy campaigner); and Charles Scheiner (La'o Hamutuk, East Timor). The Moderator was Kirsty Howey, Environment Centre NT Co-Director.

A write-up of the webinar has been published in Energy Voice: [Is Santos and Eni's CCS plan in the Timor Sea 'carbon colonialism'? - News for the Energy Sector \(energyvoice.com\)](#) (also attached).

Hi s22

How are you going with the vendor – any luck fixing the problem?

Would you be able to upload the attached submissions received for the CCS method consultation. After this is done can you please publish all submissions on the department's website? Here:

<https://consult.industry.gov.au/cer/carbon-capture-and-storage-draft-method/>

Note: all attached submissions have all consented to the privacy statement, as per below table.

We're really hoping this can be published by COB today – if still possible.

Thank-you,
 s22

s22

Good to chat.

We will get back in touch with you tomorrow mid-morning, once we sort out where the material might be: moved, archived etc.

Good to hear you are parking it for tonight.

Like CER, we separate media from social media so best to go on social media to these email addresses on social media.

social.media@industry.gov.au and s22 <[@cer.gov.au](mailto:cer.gov.au)> and s22 <[@cer.gov.au](mailto:cer.gov.au)> and s22 <[@cer.gov.au](mailto:cer.gov.au)>
mediateam@industry.gov.au

DISER Communications will be in touch.

Thanks

OFFICIAL

Hi s22

See below [tweet](#) s11C(1) We believe this is entirely untrue and are recommending responding as it's been retweeted a few times, including by an ABC journalist.

We have checked with the web team and they are not aware of anything being removed or any pages being archived. We've also checked webpage version history and there doesn't appear to be any relevant changes. If anything, perhaps we are pointing to a page that no longer exists on another website, therefore the link is broken. Another potential angle is that she's looking on DISER's webpage [landing page](#) which [links to this page](#).

s11C(1)

Hi s22

s22

s22

I reckon you should ignore s11C(1) tweet. If she wants to know about the submissions, she should just ask someone, like everyone else does. It is a bit passive aggressive to post grumbles on twitter without even trying to find out the facts.

Good morning Digital,

To assist the process of publishing public consultation submissions received for the draft CCS method, I've summarised the privacy statements for submissions received via email by the CER – see below table. I've attached all the original emails for your records.

I believe you should have access to all privacy statements for submissions received via Consultation Hub already.

Thanks,
s22

Follow Up Flag: Follow up
Flag Status: Flagged

Ok – all together, suggested response:

Australian Carbon Credit Units are sought after because of their high integrity. This is reflected in significant price rises for ACCUs in 2021.

The Government has implemented a range of measures to increase participation in the ERF and the supply of carbon credits. This includes prioritising development of five new ERF methods in 2021 with five more prioritised for 2022, reducing administrative costs and streamlining audit requirements and a pilot to support participation from smaller projects.

The Australian Carbon Exchange will aim to make the trading of ACCUs simpler, supporting rapidly increasing demand from the corporate sector. It will do this by increasing market transparency including pricing, lowering transaction costs and reducing red tape. It is estimated that by 2030, the exchange will save business up to \$100 million in transaction costs associated with trading ACCUs.

The Government will continue to look for ways to increase the supply of ACCUs and will consult further on these as appropriate.

Hi there,

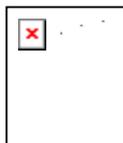

I'm filing a story for PM on the soaring price of carbon offsets.

s11C(1) for the Australia Institute claims the regulator is poised step in to significantly increase the supply of credits in order to artificially reduce the price on carbon. This, she claims, will make it easier for polluters to continue emitting carbon into next year.

Can you confirm this please?

My deadline is asap.

Thanks,
