Talking points and Q&As – ^{s 22}

s 22

s 22

Are there examples of data centres using 100% renewable energy, or that contribute additional renewable energy to the grid?

- s 22
- The Australian Capital Territory (ACT) has been powered by 100% renewable energy since 2020.
- s 22
NextDC also has a data centre located in Canberra which all draw from the ACT's energy grid, making them 100% renewable.
