1. What is the function of the Dumping Commodity Register (DCR)?

The Anti-Dumping Commission (ADC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the [Cases page](#) on the website for any current investigation information for this commodity.

2. What types of aluminium extrusions are subject to anti-dumping measures?

The goods subject to measures include:

Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm, with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm.

The goods (relevant to [ADN 2021/033 Mill Finish](#)) apply to mill finish aluminium extrusions with a finish being as extruded (mill), excluding all other surface finishes.

The goods (relevant to [ADN 2021/035 Surface Finish](#)) apply to surface finish aluminium extrusions with the finish being mechanical, painted, powder coated, anodised or otherwise coated (excluding mill-finish).

The goods subject to measures include aluminium extrusion products that have been further processed or fabricated to a limited extent, after aluminium has been extruded through a die. Aluminium extrusion products that have been painted, anodised, or otherwise coated, or worked (e.g. precision cut, machined, punched or drilled) fall within the scope of the goods.

The following descriptions are excluded from measures as a result of, exemption type “GOODS” applies:

The goods do not extend to intermediate or finished products that are processed or fabricated to such an extent that they no longer possess the nature and physical characteristics of an aluminium extrusion but have become a different product.

The table below provides guidance to importers and brokers to assist in the categorisation of aluminium extrusions into the types covered by interim duties (GUC), and those not covered (Non GUC). In most cases, extrusions classified to headings 7604 or 7608 would be subject to IDD and/or ICD. Importers should use the table to categorise their goods and decide whether dumping and countervailing duties apply.

| < Goods Under Consideration (GUC) > | | | | < Non GUC > | | |
|---|--|---|--|--|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| Aluminium extrusions | Aluminium extrusions with minor working | Aluminium extrusions that are parts intended for use in intermediate or finished products | Aluminium extrusions that are themselves finished products | Unassembled products containing aluminium extrusions | Intermediate or partly assembled products containing aluminium extrusions | Fully assembled finished products containing aluminium extrusions |
| Examples | | | | | | |
| Mill finish, painted, powder coated, anodised, or otherwise coated aluminium extrusions | Precision cut, machined, punched or drilled aluminium extrusions | Aluminium extrusions designed for use in a door or window | Carpet liner, fence posts, heat sinks | Kits that, at time of import, comprise all necessary parts to assemble finished goods. For example, shower frame kits, window frame kits, unassembled unitised curtain walls | Unglazed window or door frames | Windows, doors |

For more information about the description of the goods subject to measures, please refer to the Final Report [REP 543](#) and [362](#).

[Ministerial Exemption Instrument No 5 of 2017](#) effective from 7 November 2016

Extruded aluminium tubes manufactured from aluminium, alloy designation 6061 with a T6 temper designation, with an outside diameter of 140mm, wall thickness of 1.8mm and a length of 5000mm.

[Ministerial Exemption Instrument No 6 of 2019](#) effective from 19 June 2019.

The exemption goods (EX0074) are aluminium channel made from alloy and temper designations 7005 T593 of the following dimensions:

- 105 mm x 50 mm channel at 3.4 metres long, with a flange thickness of 7 mm and wall thickness of 4 mm.
- 125 mm x 50 mm channel at 3.4 metres long, with a flange thickness of 8 mm and wall thickness of 4 mm.
- 150 mm x 50 mm channel at 3.4 metres long, with a flange thickness of 8 mm and wall thickness of 4.5 mm.
- 160 mm x 60 mm channel at 3.4 metres long, with a flange thickness of 9 mm and wall thickness of 6 mm.

The exemption goods (EX0075) are aluminium flat bar made from alloy and temper designations 7005 T593 of dimensions 160 mm x 10 mm flat bar at 4 metres long.

The exemption goods (EX0076) are aluminium angle line made from alloy and temper designations 7005 T593 of the following dimensions:

- 38.1 mm x 38.1 mm x 4.75 mm angle at 6 metres long.
- 40 mm x 40 mm x 6 mm angle at 6 metres long.

- 50.8 mm x 50.8 mm x 6.35 mm angle at 6 metres long.
- 63.5 mm x 63.5 mm x 6.35 mm angle at 6 metres long.
- 76.2 mm x 76.2 mm x 6.35 mm angle at 6 metres long.

For more information about the Ministerial Exemption Instrument please refer to Reports [EX0074](#), [EX0075](#) and [EX0076](#).

[Ministerial Exemption Instrument No 5 of 2021](#) effective from 26 February 2021

Hollow aluminium extrusions of alloy AA 3003, with a profile or cross-section which fits within a circle having a diameter of less than 155 mm.

For more information about the Ministerial Exemption Instrument please refer to Report [EX0081](#)

[Ministerial Exemption Instrument No 4 of 2023](#) effective from 20 July 2022

An L-shaped extrusion, temper type 6061-T6, mill finish, with a rolled down fin on the long arm that produces a 2.2 mm wide slot between the fin and the arm.

For more information about the Ministerial Exemption Instrument please refer to Report [EX0094](#)

[Ministerial Exemption Instrument No 5 of 2023](#) effective from 20 September 2022

Extruded aluminium T-Bars of mill finish produced from 5383 aluminium alloy with Temper H112 (AA5383-H1112) of any length, width, diameter and weight. (T-Bars).

For more information about the Ministerial Exemption Instrument please refer to Report [EX0095](#)

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

| Tariff Classification | Statistical code |
|-----------------------|------------------|
| 7604.10.00 | 06 |
| 7604.21.00 | 07, 08 |
| 7604.29.00 | 09, 10 |
| 7608.10.00 | 09 |
| 7608.20.00 | 10 |
| 7610.10.00 | 12 |
| 7610.90.00 | 13 |

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the [Working Tariff page](#) on the ABF website or contact the ABF on 131 881.

4. How much Interim Dumping Duty (IDD) / Interim Countervailing Duty (ICD) will an importer have to pay?

IDD – (combination) – exporters as listed in table below from, China, Malaysia, Vietnam, Thailand & Taiwan.

IDD or dumping securities (DSA) is in the form of a fixed and variable measure. The total IDD/DSA liability is calculated as follows:

- fixed component of IDD/DSA: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD/DSA ad valorem duty rate; **plus**
- variable component of IDD/DSA: the amount, if any, by which the DXP is lower than the AEP.

IDD – Floor Price

IDD is in the form of a floor price measure. The total IDD liability is the amount by which the DXP is lower than the floor price.

ICD – exporters as listed in the table below from, China, Thailand & Taiwan

ICD – all exporters

ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.

Example of how to calculate the IDD and ICD liability

Fixed and variable measures

The following is an **example** of how to calculate the IDD and ICD liability.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- AEP = AUD \$2,000 (FOB, cash)
- IDD ad valorem rate = 10%
 1. ICD ad valorem rate = 15%

IDD liability

Fixed component of IDD:

The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%)

$\$2,000 \text{ (AEP)} \times 10\% = \200

Variable component of IDD:

The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000)

$\$2,000 - \$1,000 = \$1,000$

Total IDD liability: $\$1,200 (\$200 + \$1,000)$

ICD liability: The DXP (\$1,000) multiplied by the ICD ad valorem rate (15%): $\$1,000 \times 15\% = \150

What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the AEP for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified for the AEP.

For example, if the AEP terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Export price - invoice amount = \$1,000
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms.

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms.

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent.
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880

The DXP price = \$880 FOB, cash

5. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

Please Note:

- IDD ad valorem rates, floor price and AEP are considered confidential. Please see below on how importers can request the rates.
- The actual duty liability may be higher than the effective rate of duty published due to the variable component of IDD

6. How do I find out the confidential rate and ascertained export price for my exporter?

The IDD ad valorem rate, floor price and the AEP for each DSN are considered confidential and will not be published. Importers of these goods may be provided with the confidential IDD and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:

- A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or
- In the absence of a trading history, an offer, or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier's company letterhead.

Requests and evidence should be sent to clientsupport@adcommission.gov.au

Please note:

- Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected.
- Only as much of the confidential information as is necessary to enter the goods will be provided.

7. Will dumping securities collected on my imports be converted to measures? & how do I lodge an entry for goods subject to dumping security?

Securities taken will be either cancelled or converted to IDD after the Minister's decision at the completion of the investigation.

The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to securities.

Goods subject to DSA/CSA, must be entered using the DSN shown below.

Importers/brokers will need to complete and submit a dumping security undertaking form when lodging an entry for goods subject to these measures.

Importers and Customs brokers should contact the National Temporary Imports and Securities section of the Australian Border Force at NTIS@abf.gov.au to obtain and lodge the undertaking form and for further information relating to the operation of securities.

8. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Minister make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for aluminium extrusions from **China** as per **Anti-Dumping Notice 2020/103**, are as follows:
