9. What are the duty assessment importation and application period dates?	7
10. DCR changes including links to key reports and notices on Interchangeable bolted clipping system brackets?	8

1. What is the function of the Dumping Commodity Register (DCR)?

The Anti-Dumping Commission (ADC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the [Cases page](#) on the website for any current investigation information for this commodity.

2. What types of Interchangeable bolted clipping system brackets are subject to anti-dumping measures?

The goods subject to measures include:

Interchangeable bolted clipping system brackets, whether or not galvanized, whether or not including nut and bolt, including the following brackets:

- light hanging bracket with elongated slot and square hole for interlocking coach bolt and nut
- stand-off bracket with elongated slot and square hole for interlocking coach bolt and nut
- adjustable stand-off bracket with elongated slot for interlocking coach bolt and nut
- all-thread bracket with elongated slot and square hole for interlocking coach bolt and nut, and
- welded nut bracket with elongated slot and square hole for interlocking coach bolt and nut.

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7326.90.90	60
8302.50.00	21

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the [Working Tariff page](#) on the ABF website or contact the ABF on 131 881.

4. How much Interim Dumping Duty (IDD) will an importer have to pay?

Interim Dumping Duty (IDD) is in the form of an Ad valorem measure. The total IDD liability is calculated as follows:

- Dumping export price (DXP) multiplied by the applicable IDD ad valorem duty rate

Example of how to calculate the IDD liability

The following is an **example** of how to calculate the IDD.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- IDD ad valorem rate = 10%

Total IDD liability: \$1,100 (100 + 10%)

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880

The DXP price = \$880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from **China** entered for home consumption on or after **03 October 2025**:

Exporter Name	CCID	DSN	Measure	Effective Rate of Duty	Export Price terms
CHINA					
Ningbo Fenghui Metal Products Co., Ltd	CCE7934479T CCE6936377R CFN4977949E	52	IDD	47.6%	FOB, 285 days
All Other Exporters		53	IDD	54.4%	FOB, 285 Days

Please Note:

- IDD, ICD ad valorem rates, floor price and AEP are considered confidential. Please see below on how importers can request the rates.
- The actual duty liability may be higher than the effective rate of duty published due to the variable component of IDD.

7. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

8. Will dumping securities collected on my imports be converted to measures?

- Securities held will not be refunded until relevant entries subject to the measures are either cancelled or converted to IDD.
- Once entries have been amended, as per instructions, and applicable IDD/ICD is paid, the security will be finalised and any Bank guarantees will be returned or Cash held will be refunded.
- ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.

9. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Minister make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods).

The duty assessment importation periods and application dates for **China** are:

Importation Period	Application Period
3 October 2025 – 2 April 2026	3 April 2026 – 2 October 2026
3 April 2026 – 2 October 2026	3 October 2026 – 2 April 2027
3 October 2026 – 2 April 2027	3 April 2027 – 2 October 2027
3 April 2027 – 2 October 2027	3 October 2027 – 2 April 2028
3 October 2027 – 2 April 2028	3 April 2028 – 2 October 2028
3 April 2028 – 2 October 2028	3 October 2028 – 2 April 2029
3 October 2028 – 2 April 2029	3 April 2029 – 2 October 2029
3 April 2029 – 2 October 2029	3 October 2029 – 2 April 2030
3 October 2029 – 2 April 2030	3 April 2030 – 2 October 2030
3 April 2030 – 2 October 2030	3 October 2030 – 2 April 2031

*Applications must be received by the commission as per [Anti-Dumping Notice 2024/075](#).

More information about duty assessments is available on the [Anti-Dumping Commission website](#).

10. DCR changes including links to key reports and notices on Interchangeable bolted clipping system brackets?

Date Published	Description	Report	ADN
12 March 2025	Securities imposed on China	PAD	2025/020
27 June 2025	Securities updated on China	PAD	2025/058
2 October 2025	Measures Imposed on China	Final REP 644	2025/089
