

Dumping Commodity Register

Hot rolled coil steel

(including alloy and patterns in relief)

Goods Exported from:

Country	Measure	Date Measures Imposed	Date Measures Expire	Last Anti-Dumping Notice
China	DSA / CSA	23 December 2025	4 May 2026	2026/042
China	IDD / ICD	5 May 2026	5 May 2031	2026/026 2026/044

This page contains a link to the latest notice. Note that a reference to the 'date measures imposed' is a reference to the date of publication of the original notice. The measures come into effect the day after the date of publication.

11. What are the key reports and notices linked to the measures on Hot Rolled Coil Steel (including alloy and patterns in relief)?	9

1. What is the function of the Dumping Commodity Register (DCR)?

The Anti-Dumping Commission is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Anti-Dumping Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the [Cases page](#) on the website for any current investigation information for this commodity.

2. What types of Hot Rolled Coil Steel (including alloy and patterns in relief) are subject to anti-dumping measures?

The goods subject to measures include:

Hot rolled coil steel (including in sheet form), with or without patterns in relief (known as checker plate), whether or not containing alloys, not clad, plated or coated (other than oil coated).

Exclusions

Goods excluded from this application are plate steel products and flat merchant bars.

The Anti-Dumping Commission considers sheet-form HRC with a base metal thickness at or above 4.75 mm to be a plate steel product and is therefore excluded from the goods subject to measures.¹

Ministerial Exemptions

Ministerial Exemption Instrument No 1 of 2026 effective from 5 May 2026.

All goods meeting the description detailed below are eligible for an exemption from dumping duties and countervailing duties under *Ministerial Exemption Instrument No 1 of 2026*.

Hot rolled coil steel, in sheet or coil form, alloyed, grade Q690MD, complying with standard GB/T 1591-2008 or later versions, having all of the following:

- *Base metal thickness at or between 3 mm and 4 mm*
- *Width at or between 1000 mm and 1830 mm*
- *Length at or between 6000 mm and 10,000 mm*
- *Chemical composition, by weight, not greater than:*
 - *0.12% carbon content*
 - *0.4% silicon content*
 - *2.0% manganese content*
 - *0.025% phosphorus content*

¹ Refer to [SEF 658](#) at page 27 for further information on the exclusion for 'plate steel products'.

- 0.010% sulphur content
- 0.11% niobium content
- 0.20% titanium content
- 0.12% vanadium content
- *Chemical composition, by weight, not less than 0.015% acid-soluble aluminium content.*

All goods meeting the description detailed below are eligible for an exemption from dumping duties and countervailing duties under Ministerial Exemption Instrument No. 1 of 2026

Hot rolled coil steel, in sheet or coil form, that conforms to all of the following:

- *Steel grade BS700MCK2 or BS700MCK4, complying with standard Q/BQB 316-2018 or later versions*
- *Minimum yield strength at or above 680 MPa.*

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7208.10.00	31
7208.25.00	32
7208.26.00	33
7208.27.00	34
7208.36.00	35
7208.37.00	36
7208.38.00	37
7208.39.00	38
7208.40.00	39
7208.53.00	42
7208.54.00	43
7208.90.00	30
7211.14.00	40
7211.19.00	41
7225.30.00	17
7225.40.00	22, 24
7226.91.00	67

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the [Working Tariff page](#) on the ABF website or contact the ABF on 131 881.

4. How much Interim Dumping Duty (IDD) / Interim Countervailing Duty (ICD) will an importer have to pay?

Use the applicable method listed in the exporters dumping specification number (DSN)

IDD (combination)

IDD or dumping securities (DSA) is in the form of a fixed and variable measure. The total IDD/DSA liability is calculated as follows:

- fixed component of IDD/DSA: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD/DSA ad valorem duty rate; plus
- variable component of IDD/DSA: the amount, if any, by which the DXP is lower than the AEP.

IDD (Ad Valorem)

IDD is in the form of an ad valorem measure. The total IDD liability is calculated by multiplying the dumping export price (DXP) by the applicable IDD ad valorem duty rate.

ICD

The ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate

Example of how to calculate the IDD liability

Combination of Fixed and Variable measures

The following is an example of how to calculate the IDD fixed and variable liability.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- AEP = AUD \$2,000 (FOB, cash)
- IDD ad valorem rate = 10%

Fixed component of IDD:

The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%)
 $\$2,000 \times 10\% = \200

Variable component of IDD:

the amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000)
 $\$2,000 - \$1,000 = \$1,000$

Total IDD liability: \$1,200 (\$200 + \$1,000)

Ad valorem measure

The following is an **example** of how to calculate the IDD liability.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- IDD ad valorem rate = 10%

Total IDD liability

The DXP (\$1,000) multiplied by the IDD ad valorem rate (10%) - $\$1,000 \times 10\% = \100

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880

The DXP price = \$880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from **China** entered for home consumption on or after **5 May 2026**:

Exporter Name	CCID	DSN	Measure	Interim Dumping Duty	Ascertained Export Price (per piece)	Export Price terms
CHINA						
Baoshan Iron and Steel Co Ltd	CEH4336999F CFH3966366R	105	IDD (Combination)	59.1%	Confidential	FOB, Cash
Baosteel Zhanjiang Iron and Steel Co Ltd	CGP6676436Y	106	IDD (Combination)	38.10%	Confidential	FOB, Cash
Shanghai Meishan Iron and Steel Co Ltd	CEK4974633T	107	IDD (Combination)	54.9%	Confidential	FOB, Cash
Exporter Name	CCID	DSN	Measure	Interim Dumping Duty	Interim Countervailing Duty	Export Price terms
Hunan Valin Lianyuan Iron & Steel Co., Ltd	CGJ4673636H CGP6674736M	108	IDD Ad Valorem	41.6%	N/A	FOB, Cash
Uncooperative and All Other Exporters		109	IDD & ICD Ad Valorem	79.0%	3.4%	FOB, Cash

Please Note:

1. IDD duty rates and AEP are considered confidential. Please see below on how importers can request the rates.
2. The actual duty liability may be higher than the effective rate of duty published due to the variable component of IDD.

7. How do I find out the confidential rate and ascertained export price for my exporter?

The IDD ad valorem rate, floor price and the AEP for each DSN are considered confidential and will not be published. Importers of these goods may be provided with the confidential IDD and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:

- A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or
- In the absence of a trading history, an offer, or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier's company letterhead.

Requests and evidence should be sent to clientsupport@adcommission.gov.au

Please note:

- Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected.
- Only as much of the confidential information as is necessary to enter the goods will be provided.

8. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to DSA is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

9. Will dumping securities collected on my imports be converted to measures?

- Securities taken in will be either cancelled or converted to IDD.
- The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.

10. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Minister make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider

that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for DCR - Hot Rolled Coil Steel (alloy and patterns in relief) from **China** as per **Anti-Dumping Notice 2026/043**, are as follows:

Importation Period	Application Period
*5 November 2025 – 4 May 2026	5 May 2026 – 4 November 2026
5 May 2026 – 4 November 2026	5 November 2026 – 4 May 2027
5 November 2026 – 4 May 2027	5 May 2027 – 4 November 2027
5 May 2027 – 4 November 2027	5 November 2027 – 4 May 2028
5 November 2027 – 4 May 2028	5 May 2028 – 4 November 2028
5 May 2028 – 4 November 2028	5 November 2028 – 4 May 2029
5 November 2028 – 4 May 2029	5 May 2029 – 4 November 2029
5 May 2029 – 4 November 2029	5 November 2029 – 4 May 2030
5 November 2029 – 4 May 2030	5 May 2030 – 4 November 2030
5 May 2030 – 4 November 2030	5 November 2030 – 4 May 2031
5 November 2030 – 4 May 2031	5 May 2031 – 4 November 2031

*Security Importation Period

Applications must be received by the commission as per [Anti-Dumping Notice 2024/075](#).

11. What are the key reports and notices linked to the measures on Hot Rolled Coil Steel (including alloy and patterns in relief)?

Date Published	Description	Report	ADN
23 December 2025	Securities imposed on China	PAD	2025/133
2 April 2026	Amendment to Securities		2026/042
4 May 2026	Measures impose on China	Final Report REP 658	2026/044 2026/026
