Anti-Dumping Commission

Dumping Commodity Register

Commodity

Certain welded steel mesh sheets

Goods Exported from:

Country	Measure	Date Measures Imposed	Date Measures Expire	Last Anti-Dumping Notice
China	**DSA**	08/08/2026	TBA	2026/107

This page contains a link to the latest notice. Note that a reference to the 'date measures imposed' is a reference to the date of publication of the original notice. The measures come into effect the day after the date of publication.

All information contained in this document is provided for general information purposes only. While the Anti-Dumping Commission has taken due care in preparing the information, the Anti-Dumping Commission does not guarantee the accuracy, reliability or completeness of the information contained herein. The Anti-Dumping Commission accepts no liability for any loss or damage suffered due to the direct or indirect reliance on the information contained in this document. Interested parties should obtain their own independent professional advice prior to relying on, or making any decisions in relation to, the information provided in this document.

Contents

1. What is the function of the Dumping Commodity Register (DCR)? 3

2. What types of Certain welded steel mesh sheets are subject to anti-dumping measures? 3

3. What tariff classifications and statistical codes are covered by the anti-dumping measures? 4

4. How much will an importer have to pay? 4

Use the applicable method listed in the exporters dumping specification number (DSN) 4

5. What is the dumping export price (DXP) and how do I calculate it? 4

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter? 6

7. What information is needed to complete an import declaration for goods subject to measures? 7

8. Will dumping securities collected on my imports be converted to measures? 7

9. What are the key reports and notices linked to the measures on Certain welded steel mesh sheets? 7

1. What is the function of the Dumping Commodity Register (DCR)?

The Anti-Dumping Commission (ADC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the cases page on the website for any current investigation information for this commodity.

2. What types of Certain welded steel mesh sheets are subject to anti-dumping measures?

> **The goods subject to measures include:** *Steel mesh sheets, welded at the intersection, of longitudinal and transverse members with cross-sectional diameters of between 3mm to 14mm (inclusive) and having at least one aperture size of 80cm2 or more.*
>
> *Sheets of the subject welded steel mesh have a maximum nominal length of up to and including 15 metres and includes sheets that may have bends.*
>
> *The goods under consideration do not include welded steel mesh sheets made from stainless steel as defined under Note 1(e) to Chapter 72, Schedule 3 of the Customs Tariff Act 1995.*
>
> *The goods include all welded steel mesh sheets meeting the above description irrespective of steel surface profile, alloy content or coating.*

Further Information

‘Aperture size’ refers to the nominal area calculated by multiplying the distance between the longitudinal members and the transverse members. For example, an aperture size of 80 cm2 may denote an aperture with longitudinal members 8cm apart and transverse members 10cm apart.

‘Length’ is measured from the ends of the longitudinal members.

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7314.20.00	24
7314.31.00	37
7314.39.00	38
7217.10.00	39, 40
7217.20.00	41, 42

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the Working Tariff page on the ABF website or contact the ABF on 131 881.

4. How much will an importer have to pay?

Use the applicable method listed in the exporters dumping specification number (DSN)

Dumping Security Amount (DSA)

Interim dumping duty (IDD) is in the form of an *ad valorem* measure. The total IDD liability is calculated by multiplying the dumping export price (DXP) by the applicable IDD ad valorem duty rate.

Example of how to calculate the DSA liability

Ad valorem measure

The following is an **example** of how to calculate the IDD liability.

- DXP = AUD $1,000 (Free-On-Board (FOB), cash)
- IDD ad valorem rate = 10%

Total IDD liability

The DXP ($1,000) multiplied by the IDD ad valorem rate (10%): $1,000 x 10% = $100

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration (FID) for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = $100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is $1,000, then the CIF, cash price = $980 ($1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of $980 minus freight and insurance amount of $100 = $880
5. The DXP price = $880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from China entered for home consumption on or after 08 August 2026:

Exporter Name	CCID	DSN	Measure	Ad Valorem	Export Price terms
Beijing Xingtai Steel Weldmesh & Technology Development Co., Ltd.	CEX9969793R	2	DSA	29.6%	FOB, Cash
Tianjin Tiankang Metal Products Co., Ltd.	CEL6666674R	3	DSA	32.3%	FOB, Cash
Anhui BRC and Ma Steel Weldmesh Co., Ltd.	CHR7376373L	1	DSA	28.4%	FOB, Cash
All Other Exporters		4	DSA	45.3%	FOB, Cash

Please Note:

How do I lodge an entry for goods subject to dumping security?
In order to lodge an import declaration for goods subject to securities the importer or their broker must obtain a Security ID. The security is in the form of an undertaking or promise to pay should the Minister decide to impose measures at the completion of the investigation. The National Temporary Imports and Securities (NTIS) section of the Australian Border Force manages the operation of securities and granting of a Security ID. Importers/brokers will need to complete and submit a dumping security undertaking form when lodging an import declaration for goods subject to the securities. Please email NTIS@abf.gov.au for the form and further instructions.

7. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to DSA is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

8. Will dumping securities collected on my imports be converted to measures?

- Securities taken in will be either cancelled or converted to IDD.
- The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.

9. What are the key reports and notices linked to the measures on certain welded steel mesh sheets?

Date Published	Description	Report	ADN
7 August 2026	Securities imposed on exports from China	PAD	2026/107
