Dumping Commodity Register

Light Gauge Steel Stud and Track

Goods Exported from:

Country	Measure	Date Measures Imposed	Date Measures Expire	Last Anti-Dumping Notice
China	IDD & ICD	16 September 2026	16 September 2031	2026/119 2026/120

This page contains a link to the latest notice. Note that a reference to the 'date measures imposed' is a reference to the date of publication of the original notice. The measures come into effect the day after the date of publication.

All information contained in this document is provided for general information purposes only. While the Anti-Dumping Commission has taken due care in preparing the information, the Anti-Dumping Commission does not guarantee the accuracy, reliability or completeness of the information contained herein. The Anti-Dumping Commission accepts no liability for any loss or damage suffered due to the direct or indirect reliance on the information contained in this document. Interested parties should obtain their own independent professional advice prior to relying on, or making any decisions in relation to, the information provided in this document.

Contents

1. What is the function of the Dumping Commodity Register (DCR)?	3
2. What types of Light Gauge Steel Stud and Track are subject to anti-dumping measures?	3
3. What tariff classifications and statistical codes are covered by the anti-dumping measures?	4
4. How much Interim Dumping Duty (IDD)/ Interim Countervailing Duty (ICD) will an importer have to pay?	4
5. What is the dumping export price (DXP) and how do I calculate it?	5
6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?	6
7. What information is needed to complete an import declaration for goods subject to measures?	7
8. Will dumping securities collected on my imports be converted to measures?	7
9. What are the duty assessment importation and application period dates?	7
10. What are the key reports and notices linked to the measures on Light Gauge Steel Stud and Track?	8

1. What is the function of the Dumping Commodity Register (DCR)?

The Anti-Dumping Commission (ADC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the [Cases page](#) on the website for any current investigation information for this commodity.

2. What types of Light Gauge Steel Stud and Track are subject to anti-dumping measures?

The goods subject to measures include:

Light gauge steel stud and track, metallic coated, whether or not containing alloys, with a profile of up to and including 170 millimetres in width by 170 millimetres in height, and with a base metal thickness of up to and including 0.69 millimetres.

Further information

LGST are framing components used to support internal non-load-bearing building walls and partitions. A LGST is a cold-formed product, further worked from either zinc coated (galvanised) steel or aluminium zinc coated steel as the raw material (including all variants thereof, for example whether or not containing magnesium or other alloys). LGST comprise both the vertical (stud) and horizontal (track) components.

Steel framing components are categorised by gauge (thickness) and usage, being either:

LGST, as non-structural light gauge products (common in 'drywall' applications); or structural (medium and heavy gauge) steel framing members (common in high-rise buildings and exterior walling).

This description covers LGST, of varying steel grades, and whether or not including service holes.

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7216.61.00	57
7216.69.00	58
7216.91.00	59
7308.90.00	52,53, 55, 56

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the [Working Tariff page](#) on the ABF website or contact the ABF on 131 881.

4. How much Interim Dumping Duty (IDD)/ Interim Countervailing Duty (ICD) will an importer have to pay?

IDD (Ad Valorem)

IDD is in the form of an ad valorem measure. The total IDD liability is calculated by multiplying the dumping export price (DXP) by the applicable IDD ad valorem duty rate.

ICD

The ICD or countervailing securities (ICD) liability is calculated by multiplying the DXP by the ICD ad valorem duty rate

Example of how to calculate the IDD liability

The following is an **example** of how to calculate the IDD.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- IDD ad valorem rate = 10%

Total IDD liability:

The DXP (\$1,000) multiplied by the IDD ad valorem rate (10%) - \$1,000 x 10% = \$100

Example of how to calculate the IDD & ICD liability

The following is an **example** of how to calculate the IDD.

- DXP = AUD \$1,000 (Free-On-Board (FOB), cash)
- IDD ad valorem rate = 10%
- ICD ad valorem rate = 5%

Total IDD & ICD liability:

The DXP (\$1,000) multiplied by the IDD & ICD ad valorem rate combined (15%) - $\$1,000 \times 15\% = \150

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880

The DXP price = \$880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from **China** entered for home consumption on or after **16 September 2026**:

CHINA								
Exporter Name	CCID	DSN	Measure	IDD Ad valorem rate	ICD Ad valorem rate	Effective Rate of Duty	Ascertained Export Price (per piece)	Export Price terms
WENAN KAIZE BUILDING MATERIAL CO., LTD	CJN4776647X	34	IDD – Ad valorem	37.80%	N/A	37.80%	N/A	FOB, cash
All Other Exporters		35	IDD & ICD - Ad valorem	33.30%	4.50%	37.80%	N/A	FOB, cash

Please Note:

IDD & ICD are ad valorem, there are no confidential instructions.

7. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

8. Will dumping securities collected on my imports be converted to measures?

- Securities taken in will be either cancelled or converted to IDD.
- The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.

9. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Minister make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for Light Gauge Steel Stud and Track from China as per **Anti-Dumping Notice 2026/119** & **2026/120** , are as follows:

CHINA

Importation Period	Application Period
*25 May 2026 to 16 September 2026	17 September 2026 – 16 March 2027
17 September 2026 to 16 March 2027	17 March 2027 to 16 September 2027
17 March 2027 to 16 September 2027	17 September 2027 to 16 March 2028
17 September 2027 to 16 March 2028	17 March 2028 to 16 September 2028
17 March 2028 to 16 September 2028	17 September 2028 to 16 March 2029
17 September 2028 to 16 March 2029	17 March 2029 to 16 September 2029
17 March 2029 to 16 September 2029	17 September 2029 to 16 March 2030
17 September 2029 to 16 March 2030	17 March 2030 to 16 September 2030
17 March 2030 to 16 September 2030	17 September 2030 to 16 March 2031
17 September 2030 to 16 March 2031	17 March 2031 to 16 September 2031
17 March 2031 to 16 September 2031	17 September 2031 to 16 March 2032

*Security Importation Period

Applications must be received by the commission as per [Anti-Dumping Notice 2024/075](#).

10. What are the key reports and notices linked to the measures on Light Gauge Steel Stud and Track?

Date Published	Description	Report	ADN
25 May 2026	Securities imposed on Light Gauge Steel Stud and Track from China		2026/072
17 June 2026	Amendment to securities on Light Gauge Steel Stud and Track from China for 'all other exporters'		2026/085
17 September 2026	Measures imposed following investigation	REP 679	2026/119 2026/120
