Question	Response
<p>1. What countries do measures apply to?</p>	<p>Measures currently apply to goods from the People’s Republic of China (China), the Kingdom of Thailand (Thailand), Republic of Indonesia (Indonesia), the Federative Republic of Brazil (Brazil), Finland, the Republic of Korea (Korea), the Russian Federation (Russia) and the Slovak Republic (Slovakia).</p> <p>On 19 April 2017, with an effective date of 20 April 2017, anti-dumping measures in the form of interim dumping duty (IDD) were imposed on A4 Copy Paper exported from the People’s Republic of China (China), the Republic of Indonesia (Indonesia), the Federative Republic of Brazil (Brazil) and the Kingdom of Thailand (Thailand). Anti-dumping measures in the form of interim countervailing duty (ICD) were also imposed on A4 Copy Paper exported from China. For more information please refer to the final report and Anti-Dumping Notices ADN 2017/39 and ADN 2017/40.</p> <p>On 10 April 2019, with an effective date of 11 April 2019, anti-dumping measures in the form of IDD were imposed on A4 Copy Paper exported from Finland, Republic of Korea, Russian Federation (Russia) and Slovak Republic (Slovakia). For more information please refer to the final report REP 463 and Anti-Dumping Notice ADN 2019/37.</p> <p>On 19 March 2021, with an effective date of 28 April 2020, the description of the goods has been altered for A4 copy paper exported from China as a result of Anti-Circumvention Inquiry 552. For further information refer to the Anti-Dumping Notice ADN 2021/024</p>
<p>2. What types of A4 copy paper are subject to anti-dumping measures?</p>	<p>The goods subject to measures include:</p> <ul style="list-style-type: none"> • uncoated white paper of a type used for writing, printing or other graphic purposes, in the nominal basis weight range of 70 to 100 gsm and cut to sheets of metric size A4 (210mm x 297mm) (also commonly referred to as cut sheet paper, copy paper, office paper or laser paper). • The paper is not coated, watermarked or embossed and is subjectively white. It is made mainly from bleached chemical pulp and/or from pulp obtained by a mechanical or chemi-mechanical process and/or from recycled pulp. <p>For more information about the description of the goods subject to measures, please refer to section 3 of the Final Report.</p> <p>Description of the goods exported from China only:</p> <ul style="list-style-type: none"> • uncoated white paper of a type used for writing, printing or other graphic purposes, in the nominal basis weight range of 67 to 100 gsm and cut to sheets of metric size A4 (210mm x 297mm) (also commonly referred to as cut sheet paper, copy paper, office paper or laser paper). <p>For information on the description of the goods exported from China refer to Anti-Dumping Notice ADN 2021/024.</p>

<p>2. What types of A4 copy paper are subject to anti-dumping measures? (continued)</p>	<p><u>Please Note:</u></p> <ol style="list-style-type: none"> 1. When importing goods into the country importers are required to self-assess whether the imported goods meet the goods description outlined above and whether anti-dumping measures apply. 2. The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above. 3. The use of exemption types is subject to monitoring by the Anti-Dumping Commission (the Commission) and the Australian Border Force (ABF).
<p>3. How much Interim Dumping Duty (IDD) / Interim Countervailing Duty (ICD) will an importer have to pay?</p>	<p><u>IDD - all exporters (except Tjiwi Kimia, Indah Kiat, Pindo Deli and Mondi SCP)</u></p> <p>IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:</p> <ul style="list-style-type: none"> • fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; plus • variable component of IDD: the amount, if any, by which the DXP is lower than the AEP. <p><u>ICD – all Chinese exporters (except UPM and Asia Symbol)</u></p> <p>The ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.</p>
<p>4. Example of how to calculate the IDD / ICD liability</p>	<p><u>Fixed and variable measures</u></p> <p>The following is an example of how to calculate the IDD fixed and variable liability and ICD liability.</p> <ul style="list-style-type: none"> • DXP = AUD \$1,000 (Free-On-Board (FOB), cash) • AEP = AUD \$2,000 (FOB, cash) • IDD ad valorem rate = 10% • ICD ad valorem rate = 15% <p><u>Fixed component of IDD:</u> The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD/DSA ad valorem rate (10%) \$2,000 x 10% = \$200</p> <p><u>Variable component of IDD:</u> the amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000) \$2,000 - \$1,000 = \$1,000</p> <p>Total IDD liability: \$1,200 (\$200 + \$1,000)</p> <p>Total ICD liability: DXP (\$1,000) multiplied by the ICD Ad Valorem rate (15%) = \$150</p>

<p>5. What is the dumping export price (DXP) and how do I calculate it?</p>	<p>The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.</p> <p>The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.</p>
<p>5. What is the dumping export price (DXP) and how do I calculate it?</p>	<p>For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.</p> <ul style="list-style-type: none"> • step 1 - an adjustment for interest on credit terms will need to be made; and • step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price. <p>Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.</p> <p>An example of adjusting for credit and incoterms is provided below:</p> <ul style="list-style-type: none"> • Invoice terms = CIF, 60 days • Specified terms = FOB, cash • Export price - invoice amount = \$1,000 • Marine insurance and ocean freight amount = \$100 <p>Step 1 - adjust for credit terms</p> <ol style="list-style-type: none"> 1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%) 2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%) <p>Step 2 - adjust for incoterms</p> <ol style="list-style-type: none"> 3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent 4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880 5. The DXP price = \$880 FOB, cash

<p>6. What information is needed to complete an import declaration for goods subject to measures or securities?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to DSA is:</p> <ul style="list-style-type: none">• DXP;• Dumping Specification Number (DSN) or exemption type (where appropriate);• Country (this is usually country of origin or export country);• Tariff classification and statistical code;• Exporter / supplier; and• Quantity. <p>Please see below to determine which DSN applies to the exporter of your goods.</p>

8. How do I find out the confidential rate and ascertained export price for my exporter?	<p>The IDD ad valorem rate and the AEP for each DSN are considered confidential and will not be published.</p> <p>Importers of these goods may be provided with the confidential IDD ad valorem rate and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:</p> <ul style="list-style-type: none"> • A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or • In the absence of a trading history, an offer or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. What tariff classifications and statistical codes are covered by the anti-dumping measures?</p>	<p>Goods subject to measures should be classified using the tariff sub-headings and associated statistical codes below:</p> <table border="1" data-bbox="712 240 1370 320"> <thead> <tr> <th>Tariff subheading</th> <th>Statistical code</th> </tr> </thead> <tbody> <tr> <td>4802.56.10</td> <td>03, 09</td> </tr> </tbody> </table> <p>These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.</p> <p>The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. <p>12. What are the duty assessment importation and application period dates?</p>	<p>An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.</p> <p>This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.</p> <p>There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods).
