2. What types of aluminium extrusions are subject to anti-dumping measures?
(continued)

The table below provides guidance to importers and brokers to assist in the categorisation of aluminium extrusions into the types covered by interim duties (GUC), and those not covered (Non GUC). In most cases, extrusions classified to headings 7604 or 7608 would be subject to IDD and/or ICD. Importers should use the table to categorise their goods and decide whether dumping and countervailing duties apply.

<p>4. Example of how to calculate the IDD and ICD liability</p>	<p><u>Fixed and variable measures</u></p> <p>The following is an example of how to calculate the IDD and ICD liability.</p> <ul style="list-style-type: none"> • DXP = AUD \$1,000 (Free-On-Board (FOB), cash) • AEP = AUD \$2,000 (FOB, cash) • IDD ad valorem rate = 10% • ICD ad valorem rate = 15% <p>IDD liability</p> <p><u>Fixed component of IDD:</u> The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%) \$2,000 (AEP) x 10% = \$200</p> <p><u>Variable component of IDD:</u> The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000) \$2,000 - \$1,000 = \$1,000</p> <p>Total IDD liability: \$1,200 (\$200 + \$1,000)</p> <p>ICD liability: The DXP (\$1,000) multiplied by the ICD ad valorem rate (15%): \$1,000 x 15% = \$150</p>
<p>5. What is the dumping export price (DXP) and how do I calculate it?</p>	<p>The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.</p> <p>The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the AEP for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified for the AEP.</p> <p>For example, if the AEP terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.</p> <ul style="list-style-type: none"> • step 1 - an adjustment for interest on credit terms will need to be made; and • step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

<p>5. What is the dumping export price (DXP) and how do I calculate it? (continued)</p>	<p>Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.</p> <p>An example of adjusting for credit and incoterms is provided below:</p> <ul style="list-style-type: none"> • Invoice terms = CIF, 60 days • Specified terms = FOB, cash • Export price - invoice amount = \$1,000 • Marine insurance and ocean freight amount = \$100 <p>Step 1 - adjust for credit terms</p> <ol style="list-style-type: none"> 1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%) 2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%) <p>Step 2 - adjust for incoterms</p> <ol style="list-style-type: none"> 3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent 4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880 5. The DXP price = \$880 FOB, cash
<p>6. What information is needed to complete an import declaration for goods subject to measures?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD is:</p> <ul style="list-style-type: none"> • DXP; • Dumping Specification Number (DSN) or exemption type (where appropriate); • Country (this is usually country of origin or export country); • Tariff classification and statistical code; • Exporter / supplier; and • Quantity. <p>Please see below to determine which DSN applies to the exporter of your goods.</p>

7. Will dumping securities collected on my imports be converted to measures? & how do I lodge an entry for goods subject to dumping security?

Securities taken will be either cancelled or converted to IDD after the Minister's decision at the completion of the investigation. The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to securities.

Goods subject to DSA/CSA, must be entered using the DSN shown below.

Importers/brokers will need to complete and submit a dumping security undertaking form when lodging an entry for goods subject to these measures.

Importers and Customs brokers should contact the National Temporary Imports and Securities section of the Australian Border Force at NTIS@abf.gov.au to obtain and lodge the undertaking form and for further information relating to the operation of securities.

Which exporters and associated suppliers are considered residual exporters/suppliers?</p>	<p>The IDD/DSA ad valorem rate, floor price and the AEP for each DSN are considered confidential and will not be published.</p> <p>Importers of these goods may be provided with the confidential IDD ad valorem rate and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:</p> <ul style="list-style-type: none">• A previous trading history with a nominated exporter/supplier of the goods. 12. How long are the measures in place for?

Goods are generally, but not exclusively, classified to the tariff classifications and associated statistical codes below:

Tariff Classification	Statistical code
7604.10.00	06
7604.21.00	07, 08
7604.29.00	09, 10
7608.10.00	09
7608.20.00	10
7610.10.00	12
7610.90.00	13

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the [Working Tariff page](#) on the ABF website or contact the ABF on 131 881.

13. What tariff classifications and statistical codes are covered by the anti-dumping measures?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for aluminium extrusions from **China** as per **Anti-Dumping Notice 2020/103**, are as follows:
