Question	Response
<p>1. What countries do measures apply to?</p>	<p>Measures currently apply to goods from the People’s Republic of China (China), the Socialist Republic of Vietnam and Malaysia.</p> <p>On 28 October 2010, anti-dumping measures in the form of interim dumping duties (IDD) and interim countervailing duties (ICD) were imposed on aluminium extrusions exported from China. For more information please refer to the Final Report REP 148 and Australian Customs Dumping Notice 2010/40.</p> <p>On 9 May 2019, with an effective date of 10 May 2019, anti-dumping measures in the form of IDD and ICD were amended on aluminium extrusions exported from China following a review of measures. For more information on the review of measures, please refer to Final Report REP 482 and Anti-Dumping Notice 2019/44.</p> <p>On 27 June 2017, with an effective date of 28 June 2017, anti-dumping measures in the form of IDD were imposed on aluminium extrusions exported from Socialist Republic of Vietnam (Vietnam). Anti-dumping measures in the form of IDD and ICD were also imposed on aluminium extrusions exported from Malaysia for ‘all other exporters’ only. For further information refer to Final Report REP 362 and Anti-Dumping Notice 2017/72 and 2017/73.</p> <p>On 29 October 2018, with an effective date of 16 October 2017, anti-dumping measures in the form of IDD and ICD were varied to include additional exporters from Malaysia, Thailand and Taiwan following an anti-circumvention inquiry of the measures. For other exporters not listed from Thailand and Taiwan, the exemption type ‘SUPPLIER’ applies. For more information please refer to the Final Report REP 447 and Anti-Dumping Notice 2018/155.</p>
<p>2. What types of aluminium extrusions are subject to anti-dumping measures?</p>	<p>The goods subject to measures include:</p> <p>Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm, with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm.</p> <p>The goods include aluminium extrusion products that have been further processed or fabricated to a limited extent, after aluminium has been extruded through a die. Aluminium extrusion products that have been painted, anodised, or otherwise coated, or worked (e.g. precision cut, machined, punched or drilled) fall within the scope of the goods.</p>

2. What types of aluminium extrusions are subject to anti-dumping measures and securities? (continued)

The following descriptions are *excluded* from measures as a result of, exemption type “GOODS” applies:

The goods do not extend to intermediate or finished products that are processed or fabricated to such an extent that they no longer possess the nature and physical characteristics of an aluminium extrusion, but have become a different product.

For more information about the description of the goods subject to measures, please refer to the Final Report [REP 482](#) and [362](#).

The table below provides guidance to importers and brokers to assist in the categorisation of aluminium extrusions into the types covered by interim duties (GUC), and those not covered (Non GUC). In most cases, extrusions classified to headings 7604 or 7608 would be subject to IDD and/or ICD. Importers should use the table to categorise their goods and decide whether dumping and countervailing duties apply.

<p>4. Example of how to calculate the IDD and ICD liability</p>	<p><u>Fixed and variable measures</u></p> <p>The following is an example of how to calculate the IDD and ICD liability.</p> <ul style="list-style-type: none"> • DXP = AUD \$1,000 (Free-On-Board (FOB), cash) • AEP = AUD \$2,000 (FOB, cash) • IDD ad valorem rate = 10% • ICD ad valorem rate = 15% <p>IDD liability</p> <p><u>Fixed component of IDD:</u> The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%) \$2,000 (AEP) x 10% = \$200</p> <p><u>Variable component of IDD:</u> The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000) \$2,000 - \$1,000 = \$1,000</p> <p>Total IDD liability: \$1,200 (\$200 + \$1,000)</p> <p>ICD liability: The DXP (\$1,000) multiplied by the ICD ad valorem rate (15%): \$1,000 x 15% = \$150</p>			

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the AEP for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified for the AEP.

For example, if the AEP terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Export price - invoice amount = \$1,000
- Marine insurance and ocean freight amount = \$100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880
5. The DXP price = \$880 FOB, cash

<p>6. What information is needed to complete an import declaration for goods subject to measures?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD is:</p> <ul style="list-style-type: none"> • DXP; • Dumping Specification Number (DSN) or exemption type (where appropriate); • Country (this is usually country of origin or export country); • Tariff classification and statistical code; • Exporter / supplier; and • Quantity. <p>Please see below to determine which DSN applies to the exporter of your goods.</p>

13. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for aluminium extrusions from **China** are as follows:

Importation Period	Application Period
28 April 2019 – 27 October 2019	28 October 2019 - 27 April 2020
28 October 2019 - 27 April 2020	28 April 2020 – 27 October 2020
28 April 2020 – 27 October 2020	28 October 2020 - 27 April 2021

The duty assessment importation periods and application dates for aluminium extrusions from **Malaysia and Vietnam** are as follows:

Importation Period	Application Period
27 June 2019 – 26 December 2019	27 December 2019 – 26 June 2020
