| 1. What countries do measures apply to?                                  | On 9 September 2016, with an effective date of 10 September 2016, anti-dumping measures in the form of interim dumping duties (IDD) were imposed on grinding balls exported from the People’s Republic of China (China). Anti-dumping measures in the form of interim countervailing duties (ICD) have also been imposed on grinding balls exported from China, except for exports by:  
  - Changshu Longte Grinding Ball Co. Ltd,  
  - Jiangsu CP Xingcheng Special Steel Co. Ltd,  
  - Hebei Goldpro New Material Technology Co. Ltd and  
  - Jiangsu Yute Grinding International Co. Ltd.  
  For more information please refer to the Final Report REP 316 and Anti-Dumping Notices 2016/90 and 2016/91.                                                                                                                                                                                                 |
| 2. What types of grinding balls are subject to anti-dumping measures?    | **The ‘description of goods’ subject to measures are:**  
  Ferrous grinding balls, typically used for the comminution of metalliferous ores:  
  - whether or not containing alloys;  
  - cast or forged;  
  - with diameters in the range 22mm to 170mm (inclusive).  
  **The following descriptions are excluded from measures, exemption type “GOODS” applies:**  
  - stainless steel balls;  
  - precision balls that have been machined and/or polished; and  
  - ball bearings.  
  For more information about the description of the goods subject to measures, please refer to REP 316.                                                                                                                                                                                                 |
| **Please Note:**                                                        | 1. When importing goods into the country importers are required to self-assess whether the imported goods meet the goods description outlined above and whether anti-dumping measures apply.  
  2. The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.  
  3. The use of exemption types is subject to monitoring by the Anti-Dumping Commission and the Department of Immigration and Border Protection (DIBP).                                                                                                           |
3. How much IDD and ICD will an importer have to pay?

**IDD – all exporters (except Anhui Sanfang New Material Technology Co. Ltd)**

IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:

- fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; **plus**
- variable component of IDD: the amount, if any, by which the DXP is lower than the AEP.

**ICD – ‘all other exporters’ only**

The ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.

**IDD - Anhui Sanfang New Material Technology Co. Ltd**

IDD is in the form of a floor price measure. The total IDD liability is the amount, if any, by which the DXP is lower than the normal value (NV).

4. Example of how to calculate the IDD and ICD liability

**Fixed and variable measures**

The following is an example of how to calculate the IDD and ICD liability.

- **DXP** = AUD $1,000 (Free-On-Board (FOB), cash)
- **AEP** = AUD $2,000 (FOB, cash)
- IDD ad valorem rate = 10%
- ICD ad valorem rate = 15%

**IDD liability**

**Fixed component of IDD:**

The higher of the DXP ($1,000) or AEP ($2,000) multiplied by the IDD ad valorem rate (10%)

\[ \text{IDD liability} = 2,000 \times 10\% = 200 \]

**Variable component of IDD:**

the amount, if any, by which the DXP ($1,000) is lower than the AEP ($2,000)

\[ \text{IDD liability} = 2,000 - 1,000 = 1,000 \]

**Total IDD liability:** $1,200 ($200 + $1,000)

**ICD liability:** DXP ($1,000) multiplied by the countervailing duty rate (15%) = $150
### Example of how to calculate the IDD and ICD liability (continued)

<table>
<thead>
<tr>
<th><strong>Floor Price measures</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>The following is an example of how to calculate the IDD liability of a floor price measure.</td>
</tr>
<tr>
<td>• DXP = AUD $1,000 (Free-On-Board (FOB), cash)</td>
</tr>
<tr>
<td>• NV = AUD $2,000 (FOB, cash)</td>
</tr>
</tbody>
</table>

**IDD liability**
The amount, if any, by which the DXP ($1,000), is lower than the NV ($2,000)

$2,000 - $1,000 (DXP) = $1,000.

### What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

**The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.**

For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Export price - invoice amount = $1,000
- Marine insurance and ocean freight amount = $100

**Step 1 - adjust for credit terms**

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is $1,000, then the CIF, cash price = $980 ($1,000 less 2%)
5. What is the dumping export price (DXP) and how do I calculate it? (continued)

   **Step 2 - adjust for incoterms**
   3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
   4. CIF, cash price of $980 minus freight and insurance amount of $100 = $880
   5. The DXP price = $880 FOB, cash

6. What information is needed to complete an import declaration for goods subject to measures?

   The information required by an importer or Customs broker to complete an import declaration for goods subject to measures is:
   - DXP;
   - Dumping Specification Number (DSN) or exemption type (where appropriate);
   - Country (this is usually country of origin or export country);
   - Tariff classification and statistical code;
   - Exporter / supplier; and
   - Quantity.

   Please see below to determine which DSN applies to the exporter of your goods.

7. What are the rates for my exporter and what DSN do I use for my imported goods?

   The following DSNs apply to goods exported from China and entered for home consumption on or after 10 September 2016.

Please Note:
1. IDD, ICD ad valorem duty rates and AEP are considered confidential. Please see below on how importers can request the rates.
2. The actual duty liability may be higher than the effective rate of duty published due to the variable component of IDD.

8. How do I find out the confidential rate and ascertained export price for my exporter?

The IDD ad valorem rate and the AEP for each DSN are considered confidential and will not be published.

Importers of these goods may be provided with the confidential IDD ad valorem rate and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:

- A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or
- In the absence of a trading history, an offer or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier’s company letterhead – emails will not generally be accepted.

Requests and evidence should be sent to clientsupport@adcommission.gov.au

Please Note:
1. Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected.
2. Only as much of the confidential information as is necessary to enter the goods will be provided.

The ABF will conduct monitoring of imports subject to anti-dumping measures consistent with its published policy.
### Question 9: Are there any exporters exempt from anti-dumping measures?

All exporters and suppliers of grinding balls from China are subject to IDD.

All exporters and suppliers of grinding balls from China are subject to ICD, except:
- Changshu Longte Grinding Ball Co. Ltd,
- Jiangsu CP Xingcheng Special Steel Co. Ltd,
- Hebei Goldpro New Material Technology Co. Ltd and
- Jiangsu Yute Grinding International Co. Ltd.

The ‘all other exporters’ rate of IDD and ICD will apply to exported goods unless an importer has evidence that the goods are being supplied either directly by a named exporter or through a linked supplier.

### Question 10: How long are the measures in place for?

The measures have been imposed for five years, unless revoked earlier.

In the case of grinding balls from China the measures are in place until 9 September 2021.

### Question 11: What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to securities should be classified using the tariff sub-headings and associated statistical codes below:

<table>
<thead>
<tr>
<th>Tariff subheading</th>
<th>Statistical code</th>
</tr>
</thead>
<tbody>
<tr>
<td>7325.91.00</td>
<td>26</td>
</tr>
<tr>
<td>7326.11.00</td>
<td>29</td>
</tr>
<tr>
<td>7326.90.90</td>
<td>60</td>
</tr>
</tbody>
</table>

Where importers are unclear on the correct tariff classification of their goods, it is recommended they contact the DIBP on 131 881 for further advice.
An importer of goods on which an IDD has been paid, may lodge an application with the Commission requesting that the Commissioner make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for grinding balls from China are as follows:

<table>
<thead>
<tr>
<th>Importation Period</th>
<th>Application Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 September 2018 – 8 March 2019</td>
<td>9 March 2019 – 8 September 2019</td>
