

# Dumping Commodity Register

## Rod in Coil

### Exported from the People's Republic of China

Document release date	Brief description of change(s)
17 June 2015	Implementation of measures.
22 April 2016	Implementation of measures for goods exported from China.
19 August 2016	Revocation of measures for goods exported from Indonesia.
13 January 2017	Amendment of measures following decision from Anti-Dumping Review Panel
20 April 2018	Measures adjusted for Jiangsu Yonggang Group and Hunan Valin Xiangtan Iron and Steel following a review of measures.
1 May 2018	Adjustments to duty assessment importation periods
14 November 2018	Amendment of measures following decision from Anti-Dumping Review Panel
19 February 2019	Amendment to measures from China following a review of measures.
17 June 2020	Measures from Taiwan expired.
24 December 2020	Amendment to measures for exporters from China following Review 564
23 April 2021	Amendment to measures for China following continuation inquiry Case 562

**Note:**

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Please refer to the [Cases page](#) on the website to locate any current information for this commodity.

Question	Response
<p>1. What countries do measures apply to?</p>	<p>Measures currently apply to goods from the People’s Republic of China (China).</p> <p>On 17 June 2015, with an effective date of 18 June 2015, anti-dumping measures in the form of Interim Dumping Duties (IDD) were imposed on rod in coil exported from Taiwan. For more information please refer to the Final Report <a href="#">REP 240</a> and Anti-Dumping Notice <a href="#">2015/76</a>. Measures expired on 17 June 2020.</p> <p>On 22 April 2016, with an effective date of 23 April 2016, anti-dumping measures in the form of IDD were imposed on rod in coil exported from the People’s Republic of China (China). For more information please refer to the Final Report <a href="#">REP 301</a> and Anti-Dumping Notice <a href="#">2016/47</a>.</p> <p>On 20 April 2018, with an effective date of 21 April 2018, IDD was varied following a review of anti-dumping measures for rod in coil exported from China. For more information please refer to the Final Report <a href="#">REP 413/414</a> and Anti-Dumping Notice <a href="#">2018/50</a>.</p> <p>On 24 December 2020, with an effective date of 25 December 2020, anti-dumping measures were revised on rod in coil exported from China following a Review. For further information please refer to Final Report <a href="#">REP 564</a> and Anti-Dumping Notice <a href="#">2020/141</a></p> <p>On 12 April 2021, with an effective date from 23 April 2021, anti-dumping measures were continued on rod in coil exported from China following a Continuation Inquiry. For more information please refer to Final Report <a href="#">REP 562</a> and Anti-Dumping Notice <a href="#">2021/032</a></p>

<p>2. What types of rod in coil are subject to anti-dumping measures?</p>	<p><b>The goods subject to measures include:</b></p> <ul style="list-style-type: none"> <li>• Hot rolled rods in coil of steel, whether or not containing alloys, that have maximum cross sections that are less than 14mm.</li> </ul> <p><b>The following descriptions are <u>excluded</u> from measures, exemption type “GOODS” applies:</b></p> <ul style="list-style-type: none"> <li>• deformed bar in coil; and</li> <li>• stainless steel in coil.</li> </ul> <p>For more information about the description of the goods subject to measures, please refer to the Final Reports <a href="#">REP240</a> &amp; <a href="#">REP301</a>.</p> <p><b><u>Please Note:</u></b></p> <ol style="list-style-type: none"> <li>1. When importing goods into the country importers are required to self-assess whether the imported goods meet the goods description outlined above and whether anti-dumping measures apply.</li> <li>2. The Anti-Dumping Commission is not in a position to provide advice on whether certain goods meet the description above.</li> <li>3. The use of exemption types is subject to monitoring by the Anti-Dumping Commission (the Commission) and Australian Border Force (ABF).</li> </ol>
<p>3. How much Interim Dumping Duties (IDD) will an importer have to pay?</p>	<p><b><u>IDD - all exporters from China</u></b></p> <p>IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:</p> <ul style="list-style-type: none"> <li>• fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; <b>plus</b></li> <li>• variable component of IDD: the amount, if any, by which the DXP is lower than the AEP.</li> </ul>
<p>4. Example of how to calculate the Interim Dumping Duties (IDD) liability</p>	<p><b><u>Fixed and variable measures</u></b></p> <p>The following is an <b><u>example</u></b> of how to calculate the IDD liability.</p> <ul style="list-style-type: none"> <li>• DXP = AUD \$1,000 (Free-On-Board (FOB), cash)</li> <li>• AEP = AUD \$2,000 (FOB, cash)</li> <li>• IDD ad valorem rate = 10%</li> </ul> <p><b><u>IDD liability</u></b></p> <p><b><u>Fixed component of IDD:</u></b></p> <p>The higher of the DXP (\$1,000) or AEP (\$2,000) multiplied by the IDD ad valorem rate (10%)  \$2,000 (AEP) x 10% = \$200</p>

<p>4. Example of how to calculate the Interim Dumping Duties (IDD) liability (continued)</p>	<p><u>Variable component of IDD:</u>  The amount, if any, by which the DXP (\$1,000) is lower than the AEP (\$2,000)  \$2,000 - \$1,000 = \$1,000</p> <p><b>Total IDD liability:</b> \$1,200 (\$200 + \$1,000)</p>
<p>5. What is the dumping export price (DXP) and how do I calculate it?</p>	<p>The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.</p> <p><b>The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export price for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.</b></p> <p>For example, if the export terms are “FOB, cash” and the actual invoice terms of the goods are “CIF, 60 days, packed”, the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.</p> <ul style="list-style-type: none"> <li>• step 1 - an adjustment for interest on credit terms will need to be made; and</li> <li>• step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.</li> </ul> <p>Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.</p>

<p>5. What is the dumping export price (DXP) and how do I calculate it? (continued)</p>	<p>An example of adjusting for credit and incoterms is provided below:</p> <ul style="list-style-type: none"> <li>• Invoice terms = CIF, 60 days</li> <li>• Specified terms = FOB, cash</li> <li>• Export price - invoice amount = \$1,000</li> <li>• Marine insurance and ocean freight amount = \$100</li> </ul> <p><b>Step 1 - adjust for credit terms</b></p> <ol style="list-style-type: none"> <li>1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)</li> <li>2. If the invoiced CIF, 60 days price is \$1,000, then the CIF, cash price = \$980 (\$1,000 less 2%)</li> </ol> <p><b>Step 2 - adjust for incoterms</b></p> <ol style="list-style-type: none"> <li>1. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent</li> <li>2. CIF, cash price of \$980 minus freight and insurance amount of \$100 = \$880</li> <li>3. The DXP price = \$880 FOB, cash</li> </ol>																								
<p>6. What information is needed to complete an import declaration for goods subject to measures?</p>	<p>The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD is:</p> <ul style="list-style-type: none"> <li>• DXP;</li> <li>• Dumping Specification Number (DSN) or exemption type (where appropriate);</li> <li>• Country (this is usually country of origin or export country);</li> <li>• Tariff classification and statistical code;</li> <li>• Exporter / supplier; and</li> <li>• Quantity.</li> </ul> <p>Please see below to determine which DSN applies to the exporter of your goods.</p>																								
<p>7. What are the rates for my exporter and what DSN do I use for my imported goods?</p>	<p>The following DSNs apply to goods exported from China and entered for home consumption on or after 25 December 2020.</p> <table border="1" data-bbox="501 1129 2018 1305"> <thead> <tr> <th>Exporter</th> <th>CCID</th> <th>Description</th> <th>Measure</th> <th>Ascertained Export Price</th> <th>IDD Ad Valorem Rate</th> <th>Export Terms</th> <th>DSN</th> </tr> </thead> <tbody> <tr> <td colspan="8"><b>China</b></td> </tr> <tr> <td><u>All Exporters</u></td> <td></td> <td>All types</td> <td>IDD</td> <td>Confidential</td> <td>33.1%</td> <td>FOB, cash</td> <td>148</td> </tr> </tbody> </table> <p><b>Please Note:</b></p> <ol style="list-style-type: none"> <li>1. AEP are considered confidential. Please see below on how importers can request the rates.</li> <li>2. The actual duty liability may be higher than the rate of duty published due to the variable component of IDD.</li> </ol>	Exporter	CCID	Description	Measure	Ascertained Export Price	IDD Ad Valorem Rate	Export Terms	DSN	<b>China</b>								<u>All Exporters</u>		All types	IDD	Confidential	33.1%	FOB, cash	148
Exporter	CCID	Description	Measure	Ascertained Export Price	IDD Ad Valorem Rate	Export Terms	DSN																		
<b>China</b>																									
<u>All Exporters</u>		All types	IDD	Confidential	33.1%	FOB, cash	148																		

<p>8. How do I find out the confidential rate and ascertained export price for my exporter?</p>	<p>The AEP for each DSN are considered confidential and will not be published.</p> <p>Importers of these goods may be provided with the confidential AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of rebar by providing evidence of:</p> <ul style="list-style-type: none"> <li>• A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments; or</li> <li>• In the absence of a trading history, an offer or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier's company letterhead.</li> </ul> <p>Requests and evidence should be sent to <a href="mailto:clientsupport@adcommission.gov.au">clientsupport@adcommission.gov.au</a>.</p> <p><b>Please note:</b></p> <ol style="list-style-type: none"> <li>1. Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected.</li> <li>2. Only as much of the confidential information as is necessary to enter the goods will be provided.</li> </ol> <p>The ABF will conduct monitoring of imports subject to anti-dumping measures consistent with its published policy.</p>						
<p>9. Are there any exporters exempt from anti-dumping measures?</p>	<p>All exporters and suppliers of rod in coil from China are subject to IDD.</p> <p>The 'all other exporters' rate of IDD will apply to exported goods unless an importer has evidence that the goods are being supplied either directly by a named exporter or through a linked supplier.</p>						
<p>10. How long are the measures in place for?</p>	<p>The measures have been imposed for five years, unless revoked earlier.</p> <p>In the case of rod in coil from China, the measures are in place until 22 April 2026.</p>						
<p>11. What tariff classifications and statistical codes are covered by the anti-dumping measures?</p>	<p>Goods subject to measures should be classified using the tariff sub-headings and associated statistical codes below:</p> <table border="1" data-bbox="707 1150 1368 1281"> <thead> <tr> <th>Tariff subheading</th> <th>Statistical code</th> </tr> </thead> <tbody> <tr> <td>7213.91.00</td> <td>44</td> </tr> <tr> <td>7227.90.90</td> <td>02</td> </tr> </tbody> </table> <p>These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.</p>	Tariff subheading	Statistical code	7213.91.00	44	7227.90.90	02
Tariff subheading	Statistical code						
7213.91.00	44						
7227.90.90	02						

<p>11. What tariff classifications and statistical codes are covered by the anti-dumping measures? (continued)</p>	<p>The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.</p> <p>Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the <a href="#">Working Tariff page</a> on the ABF website or contact the ABF on 131 881.</p>																												
<p>12. What are the duty assessment importation and application period dates?</p>	<p>An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Parliamentary Secretary make an assessment of the final liability of those goods to duty.</p> <p>This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.</p> <p>There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods). The duty assessment importation periods and application dates for rod in coil from <b>China</b> are as follows:</p> <table border="1" data-bbox="573 895 1536 1374"> <thead> <tr> <th>Importation Period</th> <th>Application Period</th> </tr> </thead> <tbody> <tr> <td>22 October 2019 – 21 April 2020</td> <td>22 April 2020 – 21 October 2020</td> </tr> <tr> <td>22 April 2020 – 21 October 2020</td> <td>22 October 2020 – 21 April 2021</td> </tr> <tr> <td>22 October 2020 – 21 April 2021</td> <td>22 April 2021 – 21 October 2021</td> </tr> <tr> <td>22 April 2021 – 21 October 2021</td> <td>22 October 2021 – 21 April 2022</td> </tr> <tr> <td>22 October 2021 – 21 April 2022</td> <td>22 April 2022 – 21 October 2022</td> </tr> <tr> <td>22 April 2022 – 21 October 2022</td> <td>22 October 2022 – 21 April 2023</td> </tr> <tr> <td>22 October 2022 – 21 April 2023</td> <td>22 April 2023 – 21 October 2023</td> </tr> <tr> <td>22 April 2023 – 21 October 2023</td> <td>22 October 2023 – 21 April 2024</td> </tr> <tr> <td>22 October 2023 – 21 April 2024</td> <td>22 April 2024 – 21 October 2024</td> </tr> <tr> <td>22 April 2024 – 21 October 2024</td> <td>22 October 2024 – 21 April 2025</td> </tr> <tr> <td>22 October 2024 – 21 April 2025</td> <td>22 April 2025 – 21 October 2025</td> </tr> <tr> <td>22 April 2025 – 21 October 2025</td> <td>22 October 2025 – 21 April 2026</td> </tr> <tr> <td>22 October 2025 – 22 April 2026</td> <td>23 April 2026 – 22 October 2026</td> </tr> </tbody> </table> <p>More information about duty assessments is available on the <a href="#">Anti-Dumping Commission website</a>.</p>	Importation Period	Application Period	22 October 2019 – 21 April 2020	22 April 2020 – 21 October 2020	22 April 2020 – 21 October 2020	22 October 2020 – 21 April 2021	22 October 2020 – 21 April 2021	22 April 2021 – 21 October 2021	22 April 2021 – 21 October 2021	22 October 2021 – 21 April 2022	22 October 2021 – 21 April 2022	22 April 2022 – 21 October 2022	22 April 2022 – 21 October 2022	22 October 2022 – 21 April 2023	22 October 2022 – 21 April 2023	22 April 2023 – 21 October 2023	22 April 2023 – 21 October 2023	22 October 2023 – 21 April 2024	22 October 2023 – 21 April 2024	22 April 2024 – 21 October 2024	22 April 2024 – 21 October 2024	22 October 2024 – 21 April 2025	22 October 2024 – 21 April 2025	22 April 2025 – 21 October 2025	22 April 2025 – 21 October 2025	22 October 2025 – 21 April 2026	22 October 2025 – 22 April 2026	23 April 2026 – 22 October 2026
