Anti-Dumping
Commission

Application for a
review of
anti-dumping measures

APPLICATION UNDER SECTION 269ZA OF THE *CUSTOMS ACT 1901* FOR A REVIEW OF ANTI-DUMPING MEASURES

In accordance with section 269ZA of the *Customs Act 1901* (the Act), I request that the Anti-Dumping Commissioner initiate a review of anti-dumping measures in respect of the goods the subject of this application to:

1. **revise the level of the measures** because one or more of the variable factors relevant to the taking of measures have changed (a variable factors review)

In this case the factors that I consider have changed are:

- normal value
 export price
 non injurious price
 subsidy

The variable factors review is in relation to:

- a particular exporter – Angang Steel Company Ltd (China)
 exporters generally

or

2. **revoke the measures** because the anti-dumping measures are no longer warranted (a revocation review)

In this case the measure I consider should be revoked is:

- the dumping duty notice
 the countervailing duty notice
 the undertaking

The revocation review is in relation to:

- a particular exporter (*if so provide name and country details*)
 exporters generally

NOTE

Where seeking variable factors review as well as a revocation review, indicate this in *both* 1 and 2 above.

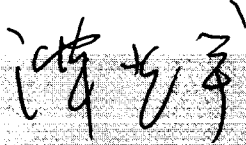

FOR OFFICIAL USE ONLY

DECLARATION

I believe that the information contained in this application:

- ◆ provides reasonable grounds for review of the anti-dumping measure; and
- ◆ is complete and correct to the best of my knowledge and belief.

Required information

1. Provide details of the name, street and postal address, of the applicant seeking the review or revocation of measures.
2. Provide details of the name of a contact person, including their position, telephone number and facsimile number, and e-mail address.
3. Name other parties supporting this application.
4. Describe your interest as an affected party (eg are you concerned with the exportation of the goods, the importation of the goods, or part of the Australian industry, or acting on behalf of the Government of an exporting country).

PUBLIC VERSION

5. Provide details of the current anti-dumping measure(s) the subject of this review application, including:
 - tariff classification
 - the countries or companies
 - specified date of publication of the measure
6. Provide the names, addresses, telephone numbers and facsimile numbers of other parties likely to have an interest in this matter e.g. Australian manufacturers, importers, exporters and/or users.

Applications for review of variable factors

If you are applying for a variable factors review (in box 1 above) provide a detailed statement setting out your reasons. Include information about:

- the factor(s) you wish to have reviewed;
- the amount by which that factor is likely to have changed since anti-dumping measures were last imposed, and evidence in support; and
- in your opinion the causes of the change and whether these causes are likely to persist.

Application for a revocation review

If you are applying for a revocation review (in box 2 above), provide a detailed statement setting out your reasons.

Include evidence in support of your view that there are reasonable grounds for asserting that the measures are no longer warranted. Refer to the “Guidelines for Preparing an Application for Review of Measures” as part of preparing your response. If you consider anti-dumping measures are no longer warranted because of:

- *no dumping or no subsidisation*: provide evidence that there is no dumping, or no subsidy, and why dumping or subsidisation is unlikely to recur if measures were revoked.
- *no injury*: provide evidence that there is no current injury, and there is unlikely to be a recurrence of injury if the measures were to be revoked.

Lodgement of the application

This application, together with the supporting evidence, must be lodged in the manner approved by the Commissioner under subsection 269SMS(2) of the Act. The Commissioner has approved lodgement of this application by:

- preferably, email, using the email address clientsupport@adcommission.gov.au; or
- post to:

The Commissioner of the Anti-Dumping Commission
GPO Box 1632
Melbourne VIC 3001; or
- facsimile, using the number (03) 8539 2499.

It may be possible to lodge an application in a manner not described above provided that the Commissioner’s written approval is obtained.

Public Record

During an investigation all interested parties are given the opportunity to defend their interests, by making a submission. The Commission maintains a public record of these submissions. The public record is available on the

PUBLIC VERSION

Commission's website at www.adcommission.gov.au.

At the time of making the application both a confidential version (for official use only) and non-confidential version (public record) of the application must be submitted. Please ensure each page of the application is clearly marked "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD". The non-confidential application should enable a reasonable understanding of the substance of the information submitted in confidence, clearly showing the reasons for seeking the review, or, if those reasons cannot be summarised, a statement of reasons why summarisation is not possible. If you cannot provide a non-confidential version, contact the Commission's client support section for advice.

PUBLIC VERSION

Country subject to the notice:

The Peoples Republic of China

Date of publication of the notice:

The publication date of the original notice was 5 August 2013. Subsequently, a review of the notice was undertaken and published on 3 August 2015.

1. GROUNDS FOR REVIEW

Angang submits that a review of the variable factors is warranted based on the change to the contemporary ascertained normal value.

ASCERTAINED NORMAL VALUE

1.1 Basis for current ascertained normal values

The current applicable ascertained normal value for Angang was determined in the original investigation into aluminium zinc coated steel (REP 190) in accordance with s.269TAC(2)(c) of the Act using Angang's weighted average cost to make and sell data (revised for raw material cost uplift), and an amount for profit based on domestic sales of like goods sold in the ordinary course of trade.

To ensure fair comparison the following adjustments were made:

Negative

- Domestic inland freight

Positive

- Export inland freight
- Export handling charges
- Angang International's and Angang HK's SG&A
- Non-refundable VAT
- Width
- Surface Treatment
- Normal Spangle
- Surface quality

The current ascertained normal value applying to Angang's exports of aluminium zinc coated steel is [REDACTED]/mt.

1.2 Grounds for review of ascertained normal values

As noted by the Commission in the original investigation into aluminium zinc coated steel (REP 190), hot-rolled coil (HRC) 'is the major raw feed material for aluminium zinc coated steel'. Since the decision to impose a fixed and variable measures on 5 August 2013 following REP 190, global iron ore prices and as a consequence hot-rolled coil prices, have experienced significant falls which has resulted in a corresponding decrease in the costs of producing aluminium zinc coated steel.

The graph below shows that HRC prices have fallen by approximately 49% since the imposition of the measures in August 2013 to December 2015 (**Confidential Exhibit A**).

[Proprietary information removed]

Source: SBB

The reduction in HRC costs has resulted in contemporary domestic selling prices for aluminium zinc coated steel being significantly lower than the currently applicable ascertained normal value. The decline in domestic selling prices for aluminium zinc coated steel is supported by the sample domestic sales invoices contained at **Confidential Exhibit B**. The submitted information shows that unit selling prices in 2016 ranged from [REDACTED]/mt to [REDACTED]/mt between May 2016 to July 2016. The weighted average domestic selling price over this period was approximately [REDACTED]/mt. This compares to the current ANV applicable to Angang’s exports of [REDACTED]/mt, or approximately a 22% decrease.

In Angang’s opinion, the contemporary domestic selling prices and normal values are likely to persist given that the trend for iron ore prices (refer to chart below) and corresponding HRC prices have been relatively stable since the beginning of 2015.

Evidence to support the above graph is attached at **Confidential Exhibit C**.

1.3 Conclusion

Angang considers that the submitted evidence supports the view that there appears to be reasonable grounds for asserting that the ascertained normal value relevant to the taking of anti-dumping measures has changed.
