### ***Customs Act 1901 – Part XVB***

I, Dale Seymour, the Commissioner of the Anti-Dumping Commission, have commenced an accelerated review of the anti-dumping measures applying to certain aluminium extrusions exported to Australia from the People's Republic of China (China), in so far as they relate to a new exporter, Goomax Metal Co., Ltd. (Goomax).

The lodgement date of 11 March 2016 is the commencement date of this accelerated review.

#### **The goods**

The goods subject to anti-dumping measures ("the goods"), in the form of a dumping duty notice and a countervailing duty notice, are

*Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm., with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm.*

- 7610.10.00 / 12 doors, windows and their frames and thresholds for doors
- 7610.90.00 / 13 other

The goods exported to Australia from China are subject to Customs duty at rates ranging from 1.7 – 3 per cent.

### **Existing measures**

Anti-dumping measures in relation to exports of the goods to Australia were initially imposed by public notice on 28 October 2010 by the then Attorney General following consideration of *Trade Remedies Branch Report No. 148* (REP 148), and applied to all exporters of aluminium extrusions from China, with the exception of Tai Ao Aluminium Tai Shan Co. Ltd.

These measures were reviewed in *Anti-Dumping Commission Report No. 248* (REP 248) and on 19 August 2015, I published Anti-Dumping Notice (ADN) 2015/96, whereby the notice published on 28 October 2010 is to be taken to have effect as if different variable factors had been fixed. Further in 2015, a continuation inquiry was undertaken in *Anti-Dumping Commission Report No. 287* (REP 287) determining that the dumping duty notice and countervailing duty notice continue in force until 28 October 2020. This determination was published Anti-Dumping Notice (ADN) 2015/125.

### **The current review**

On 11 March 2016, Goomax lodged an application under subsection 269ZE(1) of the *Customs Act 1901* (the Act) for an accelerated review of the dumping duty notice and the countervailing duty notice in relation to its exports of the goods to Australia from China.

Following consideration of the application, I have decided not to reject the application. Further detail on the consideration of the application is contained in *Anti-Dumping Commission Consideration Report No. 347* (CON 347).

After concluding the accelerated review, I will make a recommendation under subsection 269ZG(1) of the Act to the Assistant Minister for Science and the Parliamentary Secretary to the Minister for Industry, Innovation and Science (Parliamentary Secretary)<sup>1</sup> that the dumping duty notice and the countervailing duty notice:

- (i) remain unaltered; or
- (ii) be altered so as to apply to the applicant as if different variable factors had been fixed.

If recommending to the Parliamentary Secretary that different variable factors be applied to the applicant, I may propose a change in the method to determine the dumping duty, which currently applies to the goods exported to Australia in accordance with the combination fixed and variable duty method. The amount could be worked out in accordance with the combination of fixed and variable duty method, the floor price duty method, the fixed duty method, or the *ad valorem* duty method.

<sup>1</sup> On 20 September 2015, the Prime Minister appointed the Parliamentary Secretary to the Minister for Industry, Innovation and Science as the Assistant Minister for Science.

Pursuant to subsection 269ZH(b) of the Act, the Commonwealth may require and take securities under section 42 of the Act in respect of interim dumping duty and interim countervailing duty that may be payable on importation of the goods to which the application relates. The effective rate of interim duty has been determined in accordance with *ad valorem* duty method.
