³ INSTRUCTIONS

Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is responsible for conducting accelerated reviews of dumping notices or countervailing duty notices for certain exporters under Part XVB, Division 6 of the *Customs Act 1901* (the Act). Your company, Anhui Tongxi Jinpeng Aluminium Co., Ltd (Tongxi Jinpeng) applied for an accelerated review under Division 6 in relation to certain aluminium extrusions exported and intended to be exported to Australia from the People's Republic of China (China).

This questionnaire seeks information that the Commission will use to determine normal values, benefit from countervailable subsidy received and export price over the review period of **1 January 2017 to 31 December 2017**.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem you uncooperative. In that case, the Commission may determine that the original dumping duty notice or countervailing duty notice is to remain unchanged.

It is in your interest, therefore, to provide a complete and accurate submission, capable of verification.

Due date for response

You are requested to respond to this questionnaire and return it to the Commission within the time specified on the cover page. There is a statutory time limit imposed for the review. The Commission may not be able to consider a questionnaire received after the due date.

If you cannot lodge your submission by the due date please advise the case manager <u>as</u> <u>soon as possible</u>.

Confidential and non-confidential submissions

You are required to lodge one confidential version (for official use only) and one nonconfidential version (for public record) of your submission by the due date.

Please ensure that *each page* of information you provide is clearly marked either "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia's anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party's understanding of information contained in a document.

As provided for in Australia's anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the case manager.

Exporter's declaration

At section I, you are required to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the goods during the period of review, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

Verification of the information that you supply

The Commission will seek to verify the information provided in your submission. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be complete and accurate.

Verification visits take several days. We will want to examine in detail your company's records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have. We will ask you to prepare a non-confidential copy of the report for the public record.

Outline of information required by this questionnaire

Goods subject to measures

The goods subject to anti-dumping measures, in the form of dumping and countervailing duty notices, are described as:

Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm., with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm ("the goods").

The following additional information assists in understanding the goods:

The goods include aluminium extrusion products that have been further processed or fabricated to a limited extent, after aluminium has been extruded through a die. Aluminium extrusion products that have been painted, anodised, or otherwise coated, or worked (e.g. precision cut, machined, punched or drilled) fall within the scope of the goods.

The goods do not extend to intermediate or finished products that are processed or fabricated to such an extent that they no longer possess the nature and physical characteristics of an aluminium extrusion, but have become a different product.

Extrusion is the process of shaping heated material by forcing it through a shaped opening in a die with the material emerging as an elongated piece with the same profile as the die cavity. For greater clarity, the goods do not include goods made by the process of impact extrusion or cold extrusion.

<u>Alloys</u> are metals composed of more than one metallic element. Alloys used in aluminium extrusions contain small amounts (usually less than five percent) of elements such as copper, manganese, silicon, magnesium, or zinc which enable characteristics such as corrosion resistance, increased strength or improved formability to be imparted to the major metallic element, aluminium.

Aluminium alloys are produced to specifications in "International Alloy Designations and Chemical Composition Limits for Wrought Aluminium and Wrought Aluminium Alloys" published by The Aluminium Association. It includes all alloy designations these specifications are known in the industry as "Teal Sheets"). These specifications have equivalent designations issued by other certifying bodies such as the International Standards Organization.

Effects of Alloying Elements

Wrought Alloy Designation	Major Alloying Elements and Typical Alloy Characteristics
1xxx Series	Minimum 99% aluminium High corrosion resistance. Excellent finishability. Easily joined by all methods. Low strength. Poor machinability. Excellent workability. High electrical and thermal conductivity.
2xxx Series	Copper High strength. Relatively low corrosion resistance. Excellent machinability. Heat treatable.
3xxx Series	Manganese Low to medium strength. Good corrosion resistance. Poor machinability. Good workability.
4xxx Series	Silicon Not available as extruded products.
5xxx Series	Magnesium Low to moderate strength. Excellent marine corrosion resistance. Very good weldability.
6xxx Series	Magnesium & Silicon Most popular extrusion alloy class. Good extrudability. Good strength. Good corrosion resistance. Good machinability. Good weldability. Good formability. Heat treatable.
7xxx Series	Zinc Very high strength. Good machinability. Heat treatable.

Source: The Aluminium Association (US)

The properties and characteristics of aluminium, such as density, conductivity, corrosion resistance, finish, mechanical properties, and thermal expansion, are modified by the addition of alloying elements. The resulting effect depends upon the principal alloying elements used, as detailed in the table below.

<u>Profiles and shapes</u> - All aluminium extrusions are produced as either hollow or solid profiles. Hollow profile extrusions generally cost more to produce and obtain higher prices than solid profile extrusions. Extrusions are often produced in standard shapes such as bars, rods, pipes and tubes, angles, channels and tees but they are also produced in customised profiles.

<u>Finishes</u> - In addition to 'as extruded' or mill finish, extrusions can be finished mechanically by polishing, buffing or tumbling. Extrusions can have anodized finishes applied by means of an electro-chemical process that forms a durable, porous oxide film on the surface of the aluminium. Also, they can be finished by painting with liquid or powder coatings utilising an electrostatic application process.

For the purposes of this application, aluminium extrusions are further classified into four "finish" types:

- Mill Finish Plain metal finish, uncoated (i.e. "as extruded from the die");
- Anodised Surface converted to aluminium oxide (by electrolysis) and may be coloured by electrolytic or chemical dye means;
- Powder Coated Charged powder particles are sprayed and adhere to electrically grounded surfaces, heated and fused into a smooth coating in a curing oven; and
- Painted or Other Finish Painted or finished in other surface applications.

<u>Size range</u> - The ability to produce the full range of profiles is determined by the extrusion and ancillary equipment.

"Working" extrusions includes any operation performed other than mechanical, anodized, painted or other finishing, prior to utilisation of the extrusion in a finished product.

<u>Standards</u> - Aluminium extrusions are manufactured to a variety of Australian and International standards. Products exported to Australia are often claimed to comply with one or more of the following standards:

- ASTMB221M-88 (USA);
- BS1474.1987 (UK); and
- GB/5237.1-2000 (China).

The most common Australian / New Zealand standard is AS/NZ 1866:1997, which specifies requirements for aluminium and aluminium alloy extruded rod, bar, solid and hollow products for general engineering purposes.

The following table is provided to assist in interpreting whether goods are covered by the anti-dumping measures:

	< Goods covered by measures >			< Goods not covered by the measure

ANSWER:

Please see *Confidential Table A-5 "Income Statement"*. [Confidential information about the Company's reporting method on Table A-5.]

In the normal course of business, Tongxi Jinpeng does not prepare its income statement on a product category basis. For the purpose of the spreadsheet "Income Statement", Tongxi Jinpeng reports the amount for the Goods Under Consideration ("GUC") by allocating the company-wide expenses to the GUC by the respective sales value.

A-6 Sales Turnover

State your company's net turnover (after returns and all discounts), and free of duties and taxes. Use the currency in which your accounts are kept, in the following format (please specify the currency):

	Most recent completed previous financial year		Review period (1 January 2017 to 31 December 2017)	
	Volume	Value	Volume	Value

Prepare this information in the attached spreadsheet named "Turnover".

This information will be used to verify the cost allocations to the goods under consideration in Section G.

Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.

ANSWER:

Please see Confidential Table A-6 "Turnover".

SECTION B SALES TO AUSTRALIA (EXPORT PRICE)

This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory. Export prices are usually assessed at FOB point, but the Commission may also compare prices at the ex-factory level.

You should report prices of all goods under consideration (the goods) shipped to Australia during the review period (1 January 2017 to 31 December 2017).

The invoice date will normally be taken to be the date of sale. If you consider:

- the sale date is not the invoice date (see 'date of sale' column in question B4 below) and;
- an alternative date should be used when comparing export and domestic prices.

You **must** provide information in section B and the information provided in section D (on domestic selling prices) for the same, matching period - even if doing so means that such domestic sales data predates the commencement of the review period (1 January 2017 to 31 December 2017).

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, all questions in Sections B are not applicable to Tongxi Jinpeng.

- **B-1** For each customer in Australia to whom you shipped goods in the review period list:
 - name;
 - address;
 - contact name and phone/fax number where known; and
 - trade level (for example: distributor, wholesaler, retailer, end user, original equipment).

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

- **B-2** For each customer identified in B1 please provide the following information.
 - (a) Describe how the goods are sent to each customer in Australia, **including** <u>a diagram</u>.
 - (b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

- (c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of DDP sales, explain who retains ownership when the goods enter Australia.
- (d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).
- (e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.
- (f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (eg free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).
- (g) Details of the forward orders of the goods under consideration (include quantities, values and scheduled shipping dates).

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

B-3 Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

SECTION D DOMESTIC SALES

This section seeks information about the sales arrangements and prices in the domestic market of the country of export.

<u>All</u> domestic sales made during the review period (must be listed transaction by transaction. If there is an extraordinarily large volume of sales data <u>and</u> you are unable to provide the complete listing electronically you **must** contact the case officer **before** completing the questionnaire. If the case officer agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets the Commission requirements. If agreement cannot be reached as to the appropriate method the Commission may not visit your company.

The Commission will normally take the invoice date as being the date of sale in order to determine which sales fall within the review period).

If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices –

you **must** provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the review period.

If you do not have any domestic sales of like goods you must contact the case officer who will explain the information the Commission requires for determining a normal value using alternative methods.

- **D-1** Provide a detailed explanation **and a diagram of**:
 - your distribution channels to domestic customers;
 - information concerning the functions/activities performed by each party in the distribution chain; and
 - a copy of any agency or distributor agreements, or contracts entered into.

If any of the customers listed are associated/related to with your business, provide details of that association. Describe the effect, if any, that association has upon the price.

ANSWER:

[Confidential information about the Company's domestic distribution channel.]

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

D-2 Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are

characterised by consistent and distinct differences in functions and prices.

ANSWER:

No.

- **D-3** Explain in detail the sales process, including:
 - the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
 - whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

ANSWER:

[Confidential information about pricing method.]

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

D-4 Complete the spreadsheet entitled '**Domestic sales**' within the *Exporter Questionnaire – accompanying spreadsheet* provided alongside this questionnaire.

This spreadsheet is to list **all domestic sales of like goods** (i.e. transaction by transaction) the review period (do not include non-goods items).

Provide the completed spreadsheet in electronic format via email with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The below table provides information as to what is meant by each column heading within the spreadsheet.

<u>Notes</u>

Costs marked with * are explained in section E-2.

ANSWER:

Please see *Confidential Table D-4 "Domestic sales".* [Confidential information about the date of sale.]

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

D-5 If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see "other factors"). For example, certain other selling expenses incurred.

ANSWER:

All costs, charges or expenses incurred in respect of the sales listed in Table D-4 have been identified.

- **D-6** For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:
 - provide a description; and
 - explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

ANSWER:

Tongxi Jinpeng did not offer discount, rebate, allowance on domestic sales of like goods. [Confidential information about commission arrangement.] The commission has been reported in Table D-4 based on the amount shown on commission invoice issued to Tongxi Jinpeng.

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been

provided to the Commission in the confidential response.

D-7 Select two domestic sales, in different quarters of the review period, that are at the same level of trade as the export sales.

Provide a <u>complete</u> set of documentation for those two sales. Include, for example:

- purchase order
- order acceptance
- commercial invoice
- discounts or rebates applicable
- credit/debit notes
- long or short term contract of sale
- inland freight contract
- bank documentation showing proof of payment

Please ensure that the documents provided to support the shipments are identified in the Domestic Sales list. Please also ensure that the details in the documents can be easily reconciled against the details provided in the Domestic Sales list. Where the figures do not exactly match those in the Domestic Sales list, please provide an explanation of how the documents fit to the identified transaction.

The Commission may select additional sales for verification at the time of our visit.

ANSWER:

Please see *Confidential Exhibit D-7* for Two Sample Domestic Sales Documents

D-8 Are your domestic sales of imperial or metric product (or both)? Does your selling price differ based on whether the product sold is imperial or metric product?

ANSWER:

Tongxi Jinpeng's domestic sales are of metric product only.

SECTION E FAIR COMPARISON

Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (ie. the normal value).

Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.

As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.

To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. The Commission must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.

Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence the Commission may disallow the adjustment.

Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.

A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.

The review must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. The Commission will not consider new claims made after the verification visit.

E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, **'Australian sales**')

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, all questions in E-1 are not applicable to Tongxi Jinpeng.

1. Transportation

Explain how you have quantified the amount of inland transportation associated with the export sale ("**Inland transportation costs**"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

2. Handling, loading and ancillary expenses

List all charges that are included in the export price and explain how they have been quantified ("**Handling, loading & ancillary expenses**"). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes;
- document fees and customs brokers fees;
- clearance fees;
- bank charges, letter of credit fees
- other ancillary charges.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

3. Credit

The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, the Commission will examine whether a credit

adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the review period. Explain the nature of the interest rates most applicable to these export sales eg, short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, *and if* export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

4. Packing costs

List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed '**Packing**'.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

5. Commissions

For any commissions paid in relation to the export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed **"Commissions".** Identify the general ledger account where the expense is located.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

6. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("Warranty & guarantee expenses" and "Technical assistance & other services"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

ANSWER:
Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

7. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed "**Other factors**". For example, other variable or fixed selling expenses, including salesmen's salaries, salesmen's travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

8. Currency conversions

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a 'sustained' movement during the period of review (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect 'sustained' movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the review period.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper. Accordingly, this question is not applicable.

E-2 Costs associated with domestic sales

(These cost adjustments will relate to your responses made at question D-4, "domestic sales")

The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.

1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (SG&A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper.

Tongxi Jinpeng does not claim an adjustment on physical characteristics because the GUC sold on the domestic market are identical to those to be exported to Australia in the future.

2. Import charges and indirect taxes

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon *exportation* and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold *domestically* but is not borne by the exports to Australia;

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: "Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs"

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

ANSWER:

Tongxi Jinpeng had no export sales of goods under consideration shipped to Australia during the review period. Tongxi Jinpeng responds to this Questionnaire as a new shipper.

On the exportation of the GUC in the future, Tongxi Jinpeng will be entitled to VAT refund at 4% of FOB price. The domestic sales price reported in the Table D-4 "Domestic Sales" is VAT excluded price.

3. Level of trade

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

(a) costs arising from different functions: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

(b) level discount: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that <u>a clear pattern</u> of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

ANSWER:

This question is not applicable, as the price of GUC is not varied by the reason of level of trade.

4. Credit

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

- the rate, or average of rates, applying on actual short term borrowing's by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the review period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system¹, the average credit period may be determined as follows:

1. Calculate an accounts receivable turnover ratio

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.
- 2. Calculate the average credit period

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

ANSWER:

Tongxi Jinpeng required [Confidential information about payment terms] for all of its sales of GUC to on the domestic market during the review period. Tongxi Jinpeng negotiated the sales price with its customer on the basis of such payment terms. But this is not a factor for price setting. Tongxi Jinpeng thus does not report credit expenses. The interest rate on actual short-term borrowings by Tongxi Jinpeng during the review period is [Confidential].

This is highly sensitive commercial information, which cannot be provided in the nonconfidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

The following items are identified in the amounts quantified at question D-4:

5. Transportation

Explain how you have quantified the amount of inland transportation associated with the domestic sales ("Inland transportation Costs").

¹ Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

ANSWER:

The general ledger account "selling expenses" records the amount of inland transportation. The "inland transportation costs" is reported on an actual amount basis. Tongxi Jinpeng maintains the shipment statistics statement for each month which records the inland transportation costs paid to each forwarding company. Thus Tongxi Jinpeng is able to link the inland transportation costs incurred to specific domestic sales.

6. Handling, loading and ancillary expenses

List all charges that are included in the domestic price and explain how they have been quantified ("Handling, loading and ancillary Expenses"). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

ANSWER:

No Handling, loading and ancillary expenses are reported in Table D-4.

7. Packing

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed **"Packing"**.

ANSWER:

Tongxi Jinpeng has reported the material and labour costs associated with packing the domestically sold products. But according to its knowledge, Tongxi Jinpeng believes that there is no difference on packing cost of future export sales and domestic sales of the PUC.

8. Commissions

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed "**Commissions**". Identify the general ledger account where the expense is located.

ANSWER:

The general ledger account "selling expenses" records the amount "Commissions" reported in Table D-4.

[Confidential information on commission arrangements]. The commission has been reported in Table D-4 based on the amount shown on commission invoice issued to Tongxi Jinpeng.

This is highly sensitive commercial information, which cannot be provided in the nonconfidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

9. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("Warranty & Guarantee expenses" and "Technical assistance & other services"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

ANSWER:

Not applicable, because Tongxi Jinpeng did not provide any warranties, guarantees, or after sales services in relation to domestic sales during the review period.

10. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed "**Other factors**". List the factors and show how each has been quantified in per unit terms. For example:

- *inventory carrying cost*: describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;
- warehousing expense: an expense incurred at the distribution point;
- *royalty and patent fees*: describe each payment as a result of production or sale, including the key terms of the agreement;
- advertising; and
- bad debt.

ANSWER:

Within the time available Tongxi Jinpeng has done its best to identify costs, charges or expenses which would need to be considered for adjustment purposes. Tongxi Jinpeng reserves the right to present further information before or during the on-site verification if such information is properly identified.

E-3 Duplication

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson's salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

ANSWER:

Tongxi Jinpeng does not make any duplication for the calculating of the amount of the adjustments. In addition, Tongxi Jinpeng does not request for an adjustment for sales quantities.

SECTION F EXPORT SALES TO COUNTRIES OTHER THAN AUSTRALIA (THIRD COUNTRY SALES)

Your response to this part of the questionnaire may be used by the Commission to select sales to a third country that may be suitable for comparison with exports to Australia.

Sales to third countries may be used as the basis for normal value in certain circumstances. The Commission may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.

ANSWER:

Tongxi Jinpeng had no export sales to countries other than Australia, thus all questions in Section F are not applicable.

F-1 Complete the spreadsheet entitled '**Third country sales**' within the *Exporter Questionnaire – accompanying spreadsheet* provided alongside this questionnaire.

This spreadsheet is to list **all export sales of like goods** (i.e. transaction by transaction) to countries other than Australia in the review period (do not include non-goods items).

Provide the completed spreadsheet in electronic format via email with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The below table provides information as to what is meant by each column heading within the spreadsheet.

26	Ocean freight	The actual amount of ocean freight incurred on each export shipment listed. (As ocean freight is a significant cost, it is important that the <u>actual</u> amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis - estimates must reflect changes in freight rates over the assessment period. Freight allocations must be checked for consistency.)
27	Marine insurance	Amount of marine insurance
28	FOB export price	The free on board price at the port of shipment. (An FOB export price must be calculated for each shipment - regardless of the shipping terms. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.)

SECTION G COSTING INFORMATION AND CONSTRUCTED VALUE

The information that you supply in response to this section of the questionnaire will be used for various purposes including:

- testing the profitability of sales of like goods on the domestic market;
- determining a constructed normal value of the goods under consideration (the goods) ie of the goods exported to Australia; and
- making certain adjustments to the normal value.

You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (eg. non-operating expenses not included elsewhere) associated with the goods.

In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.

If, in response to question B4 (Sales to Australia, Export Price) you:

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)

you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the review period (1 January 2017 to 31 December 2017).

At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.

G-1. Production process and capacity

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

If your company manufactures/produces the raw material used to manufacture the goods, describe this process and provide a flowchart of this production process.

ANSWER:

Please see *Confidential Exhibit G-1.1* for a production flowchart of Tongxi Jinpeng. No by-products are generated from the production process. [Confidential information about treatment of scrap.]

Tongxi Jinpeng does not manufacture the raw materials used to manufacture the PUC.

This is highly sensitive commercial information, which cannot be provided in the nonconfidential summary. Disclosure of such confidential information could provide the Company's competitors with insights of the commercial strategy and pose a serious threat to the commercial interest of the company. This information has been provided to the Commission in the confidential response.

2. Complete the spreadsheet entitled 'Production' within the *Exporter Questionnaire* – *accompanying spreadsheet* provided alongside this questionnaire.

Provide the completed spreadsheet in electronic format via email with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

Provide information about your company's total production in the following table:

	PREVIOUS FINANCIAL YEAR	MOST RECENT FINANCIAL YEAR	Review period (1 January 2017 to 31 December 2017)
A – Production capacity (eg kg, tonnes)*			
B – Actual production in volume (eg kg, tonnes)			
C – Capacity utilisation (%) (B/A x 100)			

* rather than showing a 'name-plate' optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

Provide this information on a spreadsheet named "Production".

ANSWER:

Please see Confidential Table G-1.2, Production.

Some finished goods at anodising workshop and powder coating workshop are transferred to precise processing workshop to further process into aluminium alloy frame or aluminium furniture. [Confidential information about reporting method for Table G-1.2].

G-2. Cost accounting practices

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

ANSWER:

The management accounting system of Tongxi Jinpeng mainly includes the following parts: general accounting, finance accounting and cost accounting. Tongxi Jinpeng follows China's general accepted accounting principles and relevant laws and regulations in its accounting system and practice. Tongxi Jinpeng's cost accounting system is an integral part of its financial system used for the financial statements. The accounting information captured and booked in Tongxi Jinpeng's cost accounting is used directly to derive the information required in its financial accounting system.

In the financial statements, the account "cost of main operation (also called "cost of goods sold")" tracks the cost of production of finished goods. In its normal business, Tongxi Jinpeng calculates the production cost for each category of aluminium extrusions on monthly basis. All cost of production is allocated between different categories of aluminium extrusions. The cost of production allocated to each category of finished goods is transferred to the account "finished goods." At the end of each month, the cost of finished goods sold is debited under the account "cost of main operation (also called "cost of goods sold")" by weighted average method, while crediting another account "finished goods" at the same time. The accumulated cost of finished goods sold in the management account can be reconciled to the credit amount of the account "finished goods", i.e., production inputs (including raw materials, labor and manufacturing overheads etc.) – cost of production – finished goods – cost of main operation (also called "cost of goods") in the financial statements.

Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (ie differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

ANSWER:

No, Tongxi Jinpeng's cost accounting system is based on actual cost, not on standard (budgeted) cost.

3 Provide details of any significant or unusual cost variances that occurred during the review period

ANSWER:

There were no significant or unusual cost variances that occurred during the review period.

5 For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. G-5 Major raw material costs

List major raw material costs, which individually account for <u>10% or more</u> of the total production cost.

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (eg market prices, transfer prices, or actual cost of production).

Where the major input is produced by an associate of your company the Commission will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at 'spot prices' or under long term contracts etc).

The term associate is defined in section 269TAA of the *Customs Act*. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.

ANSWER:

Aluminium bar is the primary raw material and accounts for more than 10% of the total production cost. The *Confidential Table G-3-1 "Domestic CTMS"* provides more details in this regard. All aluminium bars are purchased from unaffiliated suppliers. Therefore, the purchase prices are all reflective of normal market practice. Tongxi Jinpeng submits that the aluminium bars are valued on market price basis.
