INSTRUCTIONS

Why you have been asked to fill out this questionnaire?

The Commissioner of the Anti-Dumping Commission, has initiated an inquiry into whether the continuation of anti-dumping measures, in the form of a dumping duty notice and a countervailing duty notice, in respect of certain aluminium road wheels (the goods) exported to Australia from the People's Republic of China (China) is justified.

The Commission will use the information you provide:

- to determine normal values, export prices and the extent to which countervailable subsidies have been received over the inquiry period. This information will determine whether certain aluminium road wheels are dumped and subsidised. You may make separate submissions concerning any other matter, for example injury; and
- in making recommendations to the Minister, for example whether the notice should remain unchanged, apply as if different variable factors had been fixed, cease to apply to certain exporters, whether the measures should continue or expire and whether the Minister should have mandatory regard to the lesser duty rule.

The Anti-Dumping Commission's (the Commission) inquiry will be carried out under the provisions of the Part XVB of the *Customs Act 1901*.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry). In that case we may assess a dumping and subsidy margins for your company based upon all other relevant information.

It is in your interest, therefore, to provide a complete, relevant and accurate submission, capable of verification.

Due date for response

As outlined in Anti-Dumping Notice (ADN) No. 2016/109, only selected manufacturers and exporters are requested to respond to this questionnaire. Questionnaires must be returned to the Commission by the due date, 5 December 2016.

The Commissioner must consider the directions from the Minister for Industry, Innovation and Science as set out in the *Customs (Extensions of Time and Non-cooperation) Direction 2015* (the Direction). This Direction sets out the particular considerations that the Commissioner must take into account when:

- deciding whether a longer period is reasonably required or practicable or considering whether to allow any interested party a longer period to give any response;
- considering an insufficient response from an interested party;

PUBLIC RECORD

5

- determining whether to have regard to a late response;
- determining whether an exporter is an uncooperative exporter;
- determining whether or not an entity is a non-cooperative entity for the purposes of section 269TAACA; and
- determining whether an entity has significantly impeded a case.

The full text of the Direction and the accompanying explanatory statement is available on the Comlaw website at www.comlaw.gov.au.

Confidential and non-confidential submissions

You are required to lodge one confidential version (for official use only) and one non-confidential version (for public record) of your submission by the due date.

Please ensure that *each page* of information you provide is clearly marked either “FOR OFFICIAL USE ONLY” or “PUBLIC RECORD”.

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia’s anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party’s understanding of information contained in a document.

As provided for in Australia’s anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the case manager.

Exporter’s declaration

At section H, you are required to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the goods during the inquiry period, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

Verification of the information that you supply

The Commission may seek to verify the information provided in your submission by conducting a visit to your company. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be relevant, complete and accurate.

Verification visits take several days. We will want to examine in detail your company's records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have. We will ask you to prepare a non-confidential copy of the report for the public record.

If you do not manufacture the goods

You may export but not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods).

You may wish to forward a copy of this questionnaire to the relevant manufacturers. You should also inform the case officer of the contact details for these manufacturers.

You should complete those sections of the questionnaire that you are reasonably able to complete. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

If you do not export the goods

Depending on the arrangement for sale of the goods to Australia through an intermediary, the Commission will have to determine who is the exporter of the goods for the purpose of this inquiry.

In any case, information (such as cost of production data) supplied by the manufacturer will be relevant to establishing the normal value of the goods. In the absence of verified information, the Commission may use other available information. This information may result in a decision less favourable to your company.

Appendix 1 A glossary of terms used in this questionnaire

Some general instructions for preparing your response

- When answering the questionnaire please carefully read all instructions. The Commission requires a response to *all* sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.
- Answer questions in the order presented in the questionnaire. Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.
- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.
- We recommend that you retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.
- Clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

Instructions on providing electronic data

- It is important that information is submitted in electronic format.
- Electronic data should be emailed or submitted on a CD-ROM, in IBM/MS-DOS format, or another operating system whose disk format is compatible with this MS-DOS version.
- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file).
- The Excel files must be compatible to the USA version.
- If you cannot present electronic data in the requested format contact the case manager as soon as possible.

Further information

Before you respond to the questionnaire you should read all the documentation enclosed with this application including the applicant's non-confidential submission and the notice of the initiation of the inquiry (ADN 2016/109). We also advise that you read the attached glossary of terms.

If you require further assistance, or you are having difficulties completing your submission, please contact the case manager. The Commission will need to know the reasons.

**SECTION B
SALES TO AUSTRALIA (EXPORT PRICE)**

Response: The Company didn't export the goods to Australia during the review period, so this section is not applicable.

SECTION C EXPORTED GOODS & LIKE GOODS

C-1 Fully describe all of the goods you have exported to Australia during the inquiry period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

Response: Not applicable. The Company didn't export the goods to Australia during the review period.

C-2 List each type of goods exported to Australia (these types should cover all types listed in spreadsheet "**Australian sales**" – see section B of this questionnaire).

Response: Not applicable. The Company didn't export the goods to Australia during the review period.

C-3 If you sell like goods on the domestic market, for each type that your company has exported to Australia during the inquiry period, list the most comparable model(s) sold domestically;

- and provide a detailed explanation of the differences where those goods sold domestically (ie. the like goods – see explanation in glossary) are not identical to goods exported to Australia.

EXPORTED TYPE	DOMESTIC TYPE	IDENTICAL?	DIFFERENCES
Product code of each model of the goods exported to Australia	Product code of comparable model sold on the domestic market of the country of export	If goods are identical indicate "YES". Otherwise "NO"	Where the good exported to Australia is not identical to the like goods, describe the specification differences. If it is impractical to detail specification differences in this table refer to documents which outline differences

Response: Please refer to [Exhibit C-3: Product Specification](#). **【Confidential Exhibit】**

C-4 Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

Response: Please refer to [Exhibit C-3: Product Specification](#). **【Confidential Exhibit】**

SECTION D DOMESTIC SALES

This section seeks information about the sales arrangements and prices in the domestic market of the country of export.

*All domestic sales made during the inquiry period must be listed transaction by transaction. If there is an extraordinarily large volume of sales data and you are unable to provide the complete listing electronically you **must** contact the case officer **before** completing the questionnaire. If the case officer agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets the Commission requirements. If agreement cannot be reached as to the appropriate method the Commission may not visit your company.*

The Commission will normally take the invoice date as being the date of sale in order to determine which sales fall within the inquiry period.

If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices –

*you **must** provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the inquiry period.*

If you do not have any domestic sales of like goods you must contact the case officer who will explain the information the Commission requires for determining a normal value using alternative methods.

D-1 Provide:

- a detailed description of your distribution channels to domestic customers, including a diagram if appropriate;
- information concerning the functions/activities performed by each party in the distribution chain; and
- a copy of any agency or distributor agreements, or contracts entered into.

If any of the customers listed are associated with your business, provide details of that association. Describe the effect, if any, that association has upon the price.

Response: The Company sells the goods to customers in the domestic market. It directly issues the invoice to the customers and collects payments accordingly. The domestic sales are relatively simple and straightforward. The Company engages in the production of the goods.

D-2 Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

Response: The domestic selling prices don't vary according to the distribution channels.

D-3 Explain in detail the sales process, including:

- the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
- whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

Response:

1. The Company negotiates price with domestic customers.
2. After negotiating price, if reach an agreement, The Company will receive a confirmation from domestic customers.
3. After concluding the sales conditions with the domestic customers, when the goods are prepared, The Company will directly contact the customer to pick up.
4. The Company will issue the invoice to the customer.
5. The delivery term is [REDACTED].
【 Confidential delivery and collection information 】

Prices are not based on price lists

D-4 Prepare a spreadsheet named “**domestic sales**” listing **all** sales of like goods made during the inquiry period. The listing must be provided on a CD-ROM. Include all of the following information.

Response: Please refer to Exhibit D-4: Domestic Sales. **【 Confidential Exhibit 】**

D-5 If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see “other factors”). For example, certain other selling expenses incurred.

Response: Not applicable.

D-6 For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:

- provide a description; and
- explain the terms and conditions that must be met by the customer to qualify for payment.

PUBLIC RECORD

22

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

Response: The Company did not offer any discounts, rebates or allowances on its domestic sales. The Company did not issue any credit notes directly or indirectly to domestic customers during the review period.

D-7 Select two domestic sales, in different quarters of the inquiry period, that are at the same level of trade as the export sales. Provide a complete set of documentation for those two sales. (Include, for example, purchase order, order acceptance, commercial invoice, discounts or rebates applicable, credit/debit notes, long or short term contract of sale, inland freight contract, bank documentation showing proof of payment.)

The Commission will select additional sales for verification at the time of our visit.

Response: Please refer to Exhibit D-7.1: Domestic sample sales documents-1 **【 Confidential Exhibit 】** and Exhibit D-7.2: Domestic sample sales documents-2 **【 Confidential Exhibit 】** .

SECTION E FAIR COMPARISON

Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (ie. the normal value).

Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.

As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.

To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. The Commission must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.

Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence the Commission may disallow the adjustment.

Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.

A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.

The inquiry must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. The Commission will not consider new claims made after the verification visit.

E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, 'Australian sales')

Response: The Company didn't export the goods to Australia during the review period, so this part E-1 is not applicable.

E-2 Costs associated with domestic sales

(These cost adjustments will relate to your responses made at question D-4, "domestic sales")

The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.

1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (S G & A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

Response: The Company does not claim such physical characteristics adjustment.

2. Import charges and indirect taxes

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon *exportation* and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold *domestically* but is not borne by the exports to Australia;

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: *“Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs”*

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

[Response: No import charges are exempted or drawn back nor are any indirect taxes refunded on exportation of the subject goods.](#)

3. Level of trade

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

- (a) *costs arising from different functions*: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

- (b) *level discount*: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

Response: No difference on the level of trade is claimed for adjustment.

4. Credit

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

- the rate, or average of rates, applying on actual short term borrowing's by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the inquiry period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system¹, the average credit period may be determined as follows:

1. *Calculate an accounts receivable turnover ratio*

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

2. *Calculate the average credit period*

¹ Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

The following items are identified in the amounts quantified at question D-4:

Response: No difference of credit is claimed for adjustment.

5. Transportation

Explain how you have quantified the amount of inland transportation associated with the domestic sales (“**Inland transportation Costs**”). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

Response: The delivery terms is [REDACTED].
【 Confidential delivery information 】

6. Handling, loading and ancillary expenses

List all charges that are included in the domestic price and explain how they have been quantified (“**Handling, loading and ancillary Expenses**”). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

Response: There is no such expenses.

7. Packing

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed “**Packing**”.

Response: No difference on packing is claimed for adjustment.

8. Commissions

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed “**Commissions**”. Identify the general ledger account where the expense is located.

Response: The Company did not pay any commissions in relation to its domestic sales.

9. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“**Warranty & Guarantee expenses**” and “**Technical assistance & other services**”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

Response: The Company did not incur any warranty, guarantee or after sales service expenses in relation to its domestic sales.

10. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. List the factors and show how each has been quantified in per unit terms. For example:

- *inventory carrying cost*: describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;
- *warehousing expense*: an expense incurred at the distribution point;
- *royalty and patent fees*: describe each payment as a result of production or sale, including the key terms of the agreement;
- *advertising*; and
- *bad debt*.

Response: The Company has not identified any other costs, charges or expenses incurred in relation to its domestic sales.

E-3 Duplication

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson’s salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

Response: As confirmed, there is no duplication in the adjustments identified.

SECTION F
EXPORT SALES TO COUNTRIES OTHER THAN
AUSTRALIA (THIRD COUNTRY SALES)

Your response to this part of the questionnaire may be used by the Commission to select sales to a third country that may be suitable for comparison with exports to Australia.

Sales to third countries may be used as the basis for normal value in certain circumstances. The Commission may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.

F-1 Using the column names and column descriptions below provide a summary of your export sales to countries other than Australia.

[Response:](#) Please refer to [Exhibit F-1: Third Country Sales](#). **【 Confidential Exhibit 】**

F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.

[Response:](#) There are no differences in sales to third countries that may affect the comparison to sales to Australia.

SECTION G

COSTING INFORMATION AND CONSTRUCTED VALUE

The information that you supply in response to this section of the questionnaire will be used for various purposes including:

- testing the profitability of sales of like goods on the domestic market;*
- determining a constructed normal value of the goods under consideration (the goods) - ie of the goods exported to Australia; and*
- making certain adjustments to the normal value.*

You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (eg. non-operating expenses not included elsewhere) associated with the goods.

In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.

If, in response to question B4 (Sales to Australia, Export Price) you:

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and*
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)*

you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the inquiry period.

At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.

G-1. Production process and capacity

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

[Response: For the production process, please refer to Exhibit G-1: Flowchart of the process](#)
【 Confidential Exhibit 】 . The Company purchased aluminium alloy as the major raw material for producing the goods under consideration. The production facilities are only used to manufacture the aluminium road wheels. All scraps generated from the production process are reused. No by-products result from the production of the goods.

G-2. Provide information about your company's total production in the following table:

	PREVIOUS FINANCIAL YEAR	MOST RECENT FINANCIAL YEAR	Inquiry period
A – Production capacity (eg kg, tonnes)*			
B – Actual production in volume (eg kg, tonnes)			
C – Capacity utilisation (%) (B/A x 100)			

* rather than showing a 'name-plate' optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

Provide this information on a spreadsheet named "**Production**".

Response: Please refer to [Exhibit G-2: Production](#). **【 Confidential Exhibit 】**

G-3. Cost accounting practices

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

Response:

[REDACTED]

【 Confidential account information 】

2. Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (ie differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

Response: Taian Qicheng's cost accounting system is based on actual costs.

3. Provide details of any significant or unusual cost variances that occurred during the inquiry period.

Response: No significant or unusual cost variances occurred during the investigation period.

4. Describe the profit/cost centres in your company's cost accounting system.

Response: Taian Qicheng's cost accounting system is based on actual cost, not standard cost, thus Taian Qicheng doesn't set the profit/cost centres, and this question is not applicable.

- 5 For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

Response: Taian Qicheng's cost accounting system is based on actual cost, not standard cost, thus Taian Qicheng doesn't set the profit/cost centres, and this question is not applicable.

- 6 Describe the level of product specificity (models, grades etc) that your company's cost accounting system records production costs.

Response: The level of product is specified into diameter and width, please refer to Exhibit C-3: Product Specification **【Confidential Exhibit】** for the required information.

- 7 List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

Response: There are no production costs incurred by Taian Qicheng which are valued differently for cost accounting purposes than for financial accounting purposes.

- 8 State whether your company engaged in any start-up operations in relation to the goods under consideration. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

Response: Taian Qicheng doesn't engage in any start-up operations in relation to the goods under consideration.

- 9 State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation in its accounting records.

Response: Not applicable.

G-4 Cost to make and sell on domestic market

This information is relevant to testing whether domestic sales are in the ordinary course of trade.²

1. Please provide (in the format shown in the table below) the actual unit cost to make and sell each model/type* (identified in section C) of the like goods sold on the domestic market. Provide this cost data for each quarter over the inquiry period. If your company calculates costs monthly, provide monthly costs.

² The Commission applies the tests set out in s.269TAAD of the Customs Act 1901 to determine whether goods are in ordinary course of trade. These provisions reflect the WTO anti-dumping agreement – see Article 2.2.1.

PUBLIC RECORD

2. Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

G-5 Cost to make and sell goods under consideration (goods exported to Australia)

Response: The Company didn't export the goods to Australia during the review period, so this part G-5 is not applicable.

G-6 Major raw material costs

List major raw material costs, which individually account for 10% or more of the total production cost.

Response: The major raw material costs, which individually account for 10% or more of the total production cost is only aluminium alloy.

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (eg market prices, transfer prices, or actual cost of production).

Response: The aluminium alloy are all purchased from a non-associative supplier. And please refer to Exhibit G-6: Aluminum Purchases **【 Confidential Exhibit 】** for the detail of supplier. The basis of valuing the major raw material is market price.

Where the major input is produced by an associate of your company the Commission will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at 'spot prices' or under long term contracts etc).

The term associate is defined in section 269TAA of the *Customs Act*. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.

Section H Particular Market Situation

For this continuation inquiry, the Commission seeks to confirm whether a 'market situation' exists in respect of ARWs from China due to government influence on both the prices of the goods and the major raw material inputs (aluminium) used in the manufacture of the goods.

The existence of a 'market situation' could affect the Commission's approach to calculating normal value within its dumping assessment and is relevant to whether the Minister is required to have mandatory regard to the lesser duty rule if the measures are continued.

In broad terms, it is generally the case that the normal value of the goods is the price paid for like goods sold for home consumption in the country of export. One of the exceptions to using domestic selling prices for this purpose provides that the domestic selling prices are not an appropriate basis for normal value if the Minister is satisfied that a situation in the market has rendered domestic selling prices unsuitable for establishing normal values (i.e. a 'particular market situation' exists).

One of these situations may be where the domestic selling prices in the country of export have been materially affected by government influence rendering those prices unsuitable for use in establishing normal values.

Through this questionnaire, the Commission is providing producers/exporters of the subject goods in China the opportunity to supply evidence that the sector under investigation is operating under market conditions. In examining the matter, the Commission will also send questionnaires to the government of China (GOC) and continue to examine information available from third-party sources.

It may be necessary for the Commission to request additional information following receipt and review of your response.

There are three parts to this section:

PART H-1 - Requests information concerning the organisation of your company and the GOC's involvement in the business of your company.

PART H-2 - Requests information concerning the GOC's measures with respect to the aluminium industry in China.

PART H-3 - Requests information concerning the ARWs sector in the region where your company is located.

PART H-1 General information

The information requested in this part will provide an overview of your corporate organisation and the GOC's involvement in your business. In addition to your response to each of the questions, all necessary supporting documentation is requested.

1. Specific questions are asked throughout this questionnaire in relation to the GOC's interaction with your businesses.

However, please generally describe all interaction that your business has with the GOC at all levels, including (but not limited to):

- a) reporting requirements;

Response: Taian Qicheng need to do industry and commerce annual inspection every year.

- b) payment of taxes;

Response: Taian Qicheng should pay taxes in accordance with the regulation.

- c) senior management representation within your business;

Response: Not applicable.

- d) approval/negotiation of business decisions (e.g. investment decisions, management decisions, pricing decisions, production decisions, sales decisions);

Response: Taian Qicheng make business decisions by its own.

- e) licensing;

Response: Not applicable.

- f) restrictions on land use;

Response: Not applicable.

- g) provision of loans; or

Response: Not applicable.

- h) provision of grants, awards or other funds.

Response: Not applicable.

2. Business structure, ownership and management

- a) Indicate whether your company is an SOE or SIE (refer to the Glossary of Terms for definition).

PUBLIC RECORD

39

Response: Taian Qicheng is a SIE company. The daily business of Taian Qicheng is based on open market and decisions are made without any influence of the GOC.

- b) List the Board of Directors and Board of Shareholders of your business and all other entities/businesses your business is related to.

Indicate the names of common directors and officers between yours and related businesses, where applicable.

Response: Not applicable, Taian Qicheng doesn't set the Board of Directors and Board of Shareholders, only sets an executive director.

- c) Are any members of your business' (and/or all other entities your business is related to) Board of Directors or Board of Shareholders representatives, employees, or otherwise affiliated with the GOC (at any level, from any agency, party, or otherwise associated entity, including SASAC)?

If so, identify the individuals, their role on that Board and their affiliation with the GOC.

Response: Not applicable.

- d) Does your business' (and/or all other entities your business is related to) Board of Directors or Board of Shareholders have a representative from the Chinese Communist Party (CCP)? If so, identify their name and title and indicate their position at the board level.

Response: Not applicable.

- e) Are any members of your business' (and/or all other entities your business is related to) Board of Directors or Board of Shareholders appointed, managed or recommended by the GOC? If so, identify the government department(s) they represent.

Response: Not applicable.

- f) Indicate who owns what percentage of all shares in your business and identify whether they are:

- an affiliate, representative, agency or otherwise representative of the GOC;
- employees of your business;
- foreign investors; or
- other (please specify).

Response: Not applicable. None of the above-mentioned situations apply to Taian Qicheng.

- g) Provide the details of any significant changes in the ownership structure of your business during the inquiry period.

Response: Not applicable. None of the above-mentioned situations apply to Taian Qicheng.

PUBLIC RECORD

- h) Identify any positions within your business that are appointments or designated to act on behalf of GOC authorities.

Response: Not applicable. None of the above-mentioned situations apply to Taian Qicheng.

- i) Explain whether there are requirements in law and in practice to have government representation at any level of your business. If there is such a requirement, explain the role of government representatives appointed to any level of your business.

Response: Not applicable. None of the above-mentioned situations apply to Taian Qicheng.

- j) If your business is a publicly-traded company, what are the rules regarding the issuance of shares by your business? Identify any stock exchanges on which your business is listed.

Response: Not applicable. Taian Qicheng is not a publicly-traded company.

- k) Provide the monthly trading volume and average monthly trading price of your listed security between 1 January 2016 to 31 December 2016.

Response: Not applicable. Taian Qicheng is not a publicly-traded company.

- l) Who has the ability to reward fire or discipline your business' senior managers?

Response: The general manager has the ability to reward, fire and discipline the Company's senior managers.

- m) Do any of your company's senior managers hold positions in any GOC departments or organisations, associations or Chambers of Commerce? If so describe the nature of these positions.

Response: Not applicable. No one of the company's senior managers hold positions in any GOC departments or organisations, associations or Chambers of Commerce.

- n) Provide the names and positions of your company's pricing committee.

Response: Not applicable. Taian Qicheng does not have pricing committee.

3. Licensing

- a) Provide a copy of your business license(s).

Response: Please refer to the Exhibit A-3.1: Business License. **【 Confidential Exhibit 】**

- b) Identify the GOC departments or offices responsible for issuing the license(s).

Response: The Administration for Industry and Commerce of Taian had issued the license.

PUBLIC RECORD

41

c) Describe the procedures involved in applying for the license(s).

Response: Taian Qicheng applied the business license according to Company Law of P.R. China and Regulation of the P.R. China on the Administration of Company Registration. Items for company registration include: (1) name; (2) residence; (3) name of the legal representative; (4) registered capital; (5) type of enterprise; (6) business scope; (7) term of operation; and (8) names of the shareholders of limited liability companies or names of promoters of joint stock limited companies as well as the amount, time and form of contributions as subscribed and actually paid.

d) Describe any requirements or conditions that must be met in order to obtain the license(s).

Response: Taian Qicheng needs to prepare and submit required documents to the Administration for Industry and Commerce of Taian. The documents are:

Lease or land using right certificate;
Articles of Association;
Company's seals;
Company's bank accounts for capital registration;
Capital verification report;
Tax registration;
Invoice information;

e) Describe and explain any restrictions imposed on your business by the business license(s).

Response: No restrictions imposed on Taian Qicheng's business within the business scope.

f) Describe any sanctions imposed on your business if you act outside the scope of your business license(s).

Response: Taian Qicheng does not operate outside the scope of the business license.

g) Describe and explain any rights or benefits conferred to your business under the license(s).

Response: No rights or benefits conferred to the business license.

h) Describe the circumstances under which your business license(s) can be revoked, and who has the authority to revoke the license(s).

Response:

- The company is declared bankrupt according to law;
- The company is dissolved by a resolution of the shareholders' meeting; or
- Any other circumstance of dissolution set out by a law or administrative regulations.

4. Decision-making, planning and reporting

PUBLIC RECORD

42

a) Provide a description of your business' decision-making structure in general and in respect of aluminium products. This should identify the persons or bodies primarily responsible for deciding:

- (i) what goods are produced;
- (ii) how the goods are produced;
- (iii) how levels of inputs such as raw materials, labour and energy are set and secured;
- (iv) how the use of your outputs, such as how your product mix is determined; and
- (v) how your business' profit is distributed, etc., is determined.

Response: All of the decisions above-mentioned are made by Taian Qicheng itself.

b) Provide a description of any GOC input into the decision-making process respecting your manufacture, marketing and sale of aluminium products.

Response: Not applicable. There is no any GOC input into the decision-making process respecting Taian Qicheng's manufacture, marketing and sale of aluminium products.

c) Provide a list of all government departments/offices that are involved, either directly or indirectly, in your manufacture, sale or purchase of aluminium products.

Response: Not applicable.

d) List and describe all reports that must be submitted to the GOC periodically by your company, and identify the government department/office where each report is filed.

Response: Not applicable.

e) Provide a copy of the last two Provincial/City Five Year Plans (including the appendices) for the province/city in which your business is located, whichever is applicable. The copies should be fully translated including the appendices, along with the original Chinese version.

Response: Not applicable.

f) Does your business develop any five-year plans or similar planning documents? If so, provide copies of these plans and advise whether these plans have been submitted, reviewed or approved by the GOC (including the National Development and Reform Commission).

Response: Not applicable.

g) Provide copies of the minutes of your Board of Directors and Board of Shareholders meetings over the inquiry period.

Response: Not applicable.

h) Provide copies of the notes to company meetings where pricing decisions on aluminium products have been made over the inquiry period.

Response: Not applicable.

PART H-2 GOC Measures in the aluminium sector

The information requested in this part will allow for a better understanding of the GOC's measures in respect of aluminium in China, in addition to your response to each of the questions, all necessary supporting documentation is requested.

1. Are there any other GOC opinions, directives, decrees, promulgations, measures, etc. concerning the aluminium industry/sector that were put in place or operating during the inquiry period?

If yes, please provide a copy of that documentation and a translation as well. Also provide documentation concerning the GOC or any association of the GOC's notification of the measures concerning aluminium to your company over the inquiry period.

Response: Not applicable. The Company is a private company engaged in producing aluminium wheels, is not aware any of the GOC opinions, directives, decrees, promulgations, measures, etc. concerning the aluminium industry/sector.

2. Provide information concerning the name of any GOC departments, bureaus or agencies responsible for the administration of all GOC measures concerning the aluminium industry in the regions, provinces or special economic zones where your company is located.

Ensure that your response includes contact information regarding the following areas:

- industrial policy and guidance on the aluminium industry sector;
- market entry criteria for the aluminium industry sector;
- environmental enforcement for the aluminium industry sector;

Response: No. Taian Qicheng didn't receive any benefit under this program during the period.

2. Does your business purchase primary aluminium or aluminium alloy from SOE/SIEs?

Response: Taian Qicheng only purchased aluminium alloy during the period through [REDACTED] **【 Confidential supplier information 】**, and [REDACTED] **【 Confidential supplier information 】**

3. Provide a list, including a contact name and address, of all your suppliers of aluminium. Indicate whether the supplier is a SOE/SIE and whether they supply pure aluminium, aluminium alloy, or both.

Response: Please see below table for detail information about the aluminium alloy supplier and producer, and refer to [Exhibit I-4.1: Sample purchase invoice](#) **【 Confidential Exhibit 】** , and [Exhibit I-4.2: Shareholder of supplier and producer](#) **【 Confidential Exhibit 】** for screenshots of the shareholding information for the supplier and producer.

Supplier	Supplier Add.	Is the supplier a SOE/SIE	Producer	Is the producer a SOE/SIE	Supply
[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

【 Confidential supplier information 】

4. Provide a listing showing the purchase price of aluminium from each supplier during each month of the inquiry period.

Prepare this information in the attached spreadsheet named "**Aluminium Purchases**" included as part of the *ARWS Exporter Questionnaire – CHINA – accompanying spreadsheet* provided alongside this questionnaire.

Please add more space for additional suppliers and aluminium categories as required.

Response: Please refer to [Exhibit G-6: Aluminum Purchases](#) **【 Confidential Exhibit 】**

5. Did your business receive any reduction/reduced price for the purchase of these goods/services during the inquiry period? If so, describe the eligibility criteria that your business had to meet in order to qualify for any reduction in the price paid for the goods/services.

Response: Not applicable. The Company did not receive any reduction/reduced price in purchasing aluminium alloy during the POI.

6. Provide copies of all contractual agreements that detail the obligations of the SOE/SIE and your business with reference to the granting and receipt of the assistance/benefits.

Response: Not applicable. The Company did not receive any assistance or benefits from aluminium alloy suppliers, as all suppliers and producers were Non-SOE/SIEs.

7. Did your business import any raw material during the inquiry period? If yes, please provide details of all such imports, including date, source, type, amount and price. Explain the reason/s for your business' decision to purchase imported over domestic raw materials, including the key factors affecting the decision such as price, availability etc.

Response: No. Taian Qicheng didn't import any raw material.

8. Explain the factors that determine the price of aluminium or aluminium alloy.

Response: The price of aluminium is based on the market price which might be fluctuated.

PART I-5 ANY OTHER PROGRAMS

If the GOC, any of its agencies or any other authorised body has provided any other benefit under any other assistance programs to your entity not previously addressed, identify the program(s).

This may have included:

- the provision of grants, awards or prizes;
- the provision of goods or services at a reduced price (e.g. electricity, gas, raw materials (including, for example, transport, etc));
- the reduction of tax payable including income tax and VAT;
- reduction in land use fees;
- loans from Policy Banks at below-market interest rates; or
- any other form of assistance.

For **each program** that you have identified above as conferring benefit on your entity, answer the following.

Response: The Company did not receive any benefit under any other assistance program apart from those already reported above. Accordingly, the following questions are not applicable.

1. Indicate which goods you produced that benefited from the program (e.g. the program may have benefited all production or only certain products that have undergone research and development).

Response: Not applicable.

2. Describe the application and approval procedures for obtaining a benefit under the program.

Response: Not applicable.

3. Where applicable, provide copies of the application form or other documentation used to apply for the program, all attachments and all contractual agreements entered into between your business and the GOC in relation to the program.

Response: Not applicable.

4. Outline the fees charged to, or expenses incurred by your business for purposes of receiving the program.

Response: Not applicable.

5. Outline the eligibility criteria your business had to meet in order to receive benefits under this program.

PUBLIC RECORD

64

Response: Not applicable.

6. State whether your eligibility for the program was conditional on one or more of the following criteria:
- whether or not your business exports or has increased its exports;
 - the use of domestic rather than imported inputs;
 - the industry to which your business belongs; or
 - the region in which your business is located.

Response: Not applicable.

7. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

Response: Not applicable.

8. What records does your business keep regarding each of the benefits received under this program? Provide copies of any records kept in relation to the program.

Response: Not applicable.

9. Indicate where benefits under this program can be found in your accounting system (i.e., specify the ledgers or journals) and financial statements.

Response: Not applicable.

10. To your knowledge, does the program still operate or has it been terminated?

Response: Not applicable.

11. If the program has been terminated, please provide details (when, why). When is the last date that your business could apply for or claim benefits under the program? When is the last date that your business could receive benefits under the program?

If the program terminated has been substituted for by another program, identify the program and answer all the questions in Part I-1 in relation to this programme.

Response: Not applicable.

SECTION J

EXPORTER'S DECLARATION

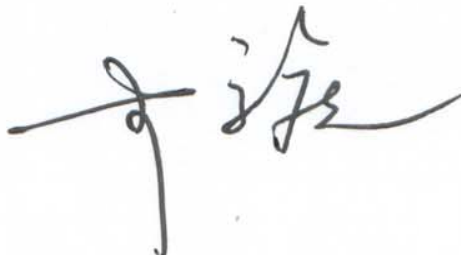

I hereby declare that Taian Qicheng Wheel Manufacturing Co.,Ltd. did, during the inquiry period export the goods under consideration and have completed the attached questionnaire and, having made due inquiry, certify that the information contained in this submission is complete and correct to the best of my knowledge and belief.

I hereby declare that.....(company) did not, during the inquiry period, export the goods under consideration and therefore have not completed the attached questionnaire.

APPENDIX GLOSSARY OF TERMS

This glossary is intended to provide you with a basic understanding of technical terms that appear in the questionnaire.

Adjustments

To enable a fair comparison between the export price and the normal value Australian legislation provides for the adjustment of the domestic price paid for like goods. Adjustments are made to account for sales occurring at different times, specification differences, and differences in the terms or circumstances of the sales. The adjustment to the normal value may be upward or downward. Areas where you believe an adjustment is necessary should be identified. Section E of the questionnaire refers.

Examples of adjustments that may be made include: *sales occurring at different times* (it is sometimes necessary to compare domestic and export sales made at different times - in these circumstances an adjustment may be made to reflect price movements during that time); *specification differences; packaging; taxes; level of trade; advertising; servicing/warranty; inland freight; warehousing; export charges; credit terms; duty drawback; commissions.*

Adjustments may also be required where the normal value is based upon costs to make and sell.

Arms length

Sales are not considered to be at "arms length" on your domestic market if there is any consideration payable for the goods other than their price, or there is an association between the buyer and the seller which affects the price, or there will be a reimbursement, compensation or benefit for, or in respect of, the price.

Constructed value

In cases where domestic prices paid for the goods under consideration in the country of export cannot be used for the determination of normal value, ie. when there are no or insufficient sales or where such sales were not made in the ordinary course of trade, normal value may be based on a constructed value. Constructed value is calculated on the basis of the cost of production of the goods under consideration plus a reasonable amount for selling, general and administration costs, and for profits, that are associated with sales on the domestic market of the country of export.

Cost of production/manufacturing

The cost of production or manufacture consists of all manufacturing costs associated with the goods. It is the sum of direct materials, direct labour and factory overheads.

Cost to make and sell

The cost to make and sell is the sum of the cost of production or manufacture, and the selling, general and administration costs associated with the sale of those goods.

Country of origin

The country in which the last significant process in the manufacture or production of the goods was performed.

Date of sale

The Commission will normally use the invoice date as recorded in the exporter or producer's records. Another date may be used if this better reflects the material terms of sale. The questionnaire directs attention to matching data sets of domestic and export sales where some other date is used, as well as matching cost information.

Direct labour cost

Direct labour is categorised as a variable cost, ie. the value varies with the level of production.

Dumping

Dumping occurs when the products of one country are exported to another country at a price less than their normal value.

Dumping margin

Where the export price is less than the normal value the dumping margin is the amount of the difference. It can be expressed as a value or as a percentage of the export price.

Export price

The export price of the goods is usually the price paid or payable to the exporter in arms length transactions, in most instances calculated at the Free on Board (FOB) level.

Exporting country

The country of export is normally the country of origin from which the goods are shipped. The country of export may be an intermediate country, except where the products are merely transhipped through that country, or the products concerned are not produced in that country, and there is no comparable price in that country.

Factory overheads

Factory overheads consist of variable costs eg. power, supplies, indirect labour and fixed costs eg. factory rent, factory insurance, factory depreciation etc.

Goods under consideration (the goods)

The goods to which the anti-dumping measures relate.

Incoterms

The following abbreviations are commonly used (comment is provided concerning costs that are normally borne by the seller):

EXW	ex works (the seller's minimum obligation as costs relate to goods being made available at the sellers premises)
FCA	free carrier (main carriage not paid by seller. Pay costs until such time that the goods have been delivered at the named point into custody of a carrier named by the seller. Customs formalities, taxes etc paid if required)
FAS	free alongside ship (main carriage not paid by seller. Deliver the goods alongside the ship)
FOB	free on board (main carriage not paid by seller. Deliver the goods on board, provide export clearance if required, pay loading costs to the point the goods have passed the ship's rail, pay customs formalities, taxes etc payable upon exportation)
CFR	cost and freight (main carriage paid by seller. Pay all costs until delivered as well as freight, loading and unloading, pay customs formalities, taxes etc payable upon exportation)
CIF	cost, insurance and freight (main carriage paid by seller. Pay all costs as under CFR as well as marine insurance) the terms CFR and CIF are only used where goods are carried by sea or waterway transport
CPT	carriage paid to
CIP	carriage and insurance paid to the terms CPT and CIP are used as alternatives to CFR and CIF where the goods are carried by air, road, rail etc
DAF	delivered at frontier (goods carried by rail or road and cleared for export at the named place at the frontier. Pay costs until delivered at the frontier plus any discharge costs incurred to place the goods at the customers disposal)
DES	delivered ex ship (goods made available to the buyer on board the ship uncleared for import at the named port of destination. Pay all costs incurred in placed at the disposal of the buyer, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)
DDU	delivered duty unpaid (Pay all costs for carriage to the agreed point, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)
DDP	delivered duty paid (goods made available at the named place in the country of importation – all risks and costs being incurred by the seller including duties, taxes etc incurred upon importation)

Inquiry period

A period defined by the Commission over which importations of the goods are examined.

Like goods

Like goods are goods sold on the domestic market of the country of export (or to a third country) that are identical in all respects to the goods under consideration or that, although not alike in all respects have characteristics closely resembling those of the goods under consideration. The term 'like goods' also refers to the goods produced by the Australian industry allegedly being injured by dumped imports.

Normal value

Australian legislation sets out several ways to assess "normal value".

The preferred method is to use the price paid for like goods sold for domestic consumption in the country of export. Usually, these sales are made by you, but there may be circumstances where it is appropriate to use sales made by other sellers on the domestic market.

Sale prices must be at arms length and in the ordinary course of trade. In the absence of relevant or suitable domestic sales, the normal value may be determined by constructing a price based upon all costs to make and sell the goods. Profit may also be included if the sales on the domestic market are profitable. Alternatively the normal value may be ascertained using the price paid for like goods sold in the ordinary course of trade at arms length to customers in a country other than Australia, however this option is rarely used.

Finally, when a normal value cannot be ascertained by any of the above methods, or if no information is provided, the Commission will determine the normal value by considering all the relevant information, including the applicant's information. This allows the applicant's information to be used where sufficient information has not been furnished or is not available.

Where domestic price generally, and the trade of the exporting country are determined or substantially influenced by the government of the exporting country, an alternative/surrogate market economy is selected by the Commission and the normal value is determined as if the surrogate country were the export source.

Ordinary course of trade

Testing for "ordinary course of trade" includes a comparison of the selling price and the unit cost to make and sell for the same period. If sales in respect of a substantial quantity of goods over an extended period of time, usually 12 months, do not recover all costs and these losses are not likely to be recovered within a reasonable period of time, (again usually 12 months) then the sales are regarded as being not in the ordinary course of trade.

There may be circumstances where it is appropriate to use a period other than 12 months in assessing whether sales are in the ordinary course of trade.

Unprofitable sales are to be taken to have occurred in substantial quantities during an extended period where the unprofitable sales amount to 20% or more of the total volume of sales of the goods by the exporter over the period. An extended period of time is usually taken to be a period not less than 12 months. Where unprofitable sales are rejected, normal value is based upon remaining profitable sales provided they occur in sufficient number. Where all sales have been made at a loss, or profitable sales are insufficient, the normal value may be constructed from costs to make and sell.

Selling, general and administration expenses (SG&A)

The selling, general and administration expenses includes all selling, distribution, general and administration expenses including finance costs that would be incurred if the goods were sold for domestic consumption in the country of export. The amounts are determined in each case using all the available information and may include expenses incurred in:

- . domestic sales of like goods;
- . sale of goods of the same general category by the exporter; or
- . sales in the industry in the country of export.

The expenses must, however, reflect the selling, general and administration costs of the goods. Administrative and selling expenses include: director's fees, management salaries and benefits, office salaries and benefits, office supplies, insurance, promotion, entertainment, depreciation and corporate overheads.
