INVESTIGATION 355: STEEL SHELVING UNITS FROM THE PEOPLE’S REPUBLIC OF CHINA

**Submission by the Australian industry – Summit Select Pty Ltd (Summit)
Further information on excluded goods**

Dear Ryan,

I write in response to the questions posed by the Anti-Dumping Commission (the Commission) in your email of 19 July 2016.

In that email, you identified that Summit’s application for the above investigation specifically excluded ‘industrial shelving’ and ‘slotted angle shelving’ and requested Summit to clarify what is meant by these terms. You also queries whether Summit manufactured these shelving types itself.

Responses in relation to each shelving type are detailed below.

INDUSTRIAL SHELVING

Industrial shelving is defined as pallet racking/heavy duty commercial shelving. This shelving is commonly purchased for industrial, warehousing and commercial fit-out applications throughout Australia. Summit does not manufacture Industrial Shelving.

Images that represent examples of Industrial Shelving:

**Heavy Duty
Construction**

**Stepped Heavy
Beam**

**Easy
Adjustment**

SLOTTED ANGLE

Slotted Angle steel is used in a wide variety of applications including shelving, workbenches, trolleys and light construction work such as creating supports or structural bracing.

Slotted Angle steel's unique pre-punched holes allow multiple steel sections to be bolted together to form customised sturdy storage systems and fabrication solutions.

'Slotted Angle shelving' refers to shelving units that use slotted angle steel as their structural components (beams and legs) and have shelves positioned on the slotted angle steel structure. The shelves themselves may be made of various materials including wood, MDF or steel.

Summit have a division (Stormor Shelving Australia) who manufacture and sell Slotted Angle in Australia which is branded Handy Angle.

Images that represent examples of Slotted Angle steel, structures using slotted angle steel, and slotted angle steel shelving:

Figure 4: slotted angle steel

Figure 5: slotted angle steel used as bracing in a construction application

Figure 6: stairs made from slotted angle steel

Figure 7: shelving made from slotted angle steel (excluded from the application)

I trust the above information is of use to the Commission and other interested parties to the investigation. Please do not hesitate to contact me should you require further information.

Kind regards,
