RE Application for tariff dispensation by EASY TOOLS PTY LTD/ Footscray/ Victoria

Dear Commissioner

I/we wish to reply to your kind emails date 16th of October 2017, for a response to the Easy Tools Pty Ltd application for tariff dispensation and make objection to this on the following ground.

- A)** As a member intruder of the Australia Extruders Association Group, I'm aware that there is growing excess capacity for extrusions now available in Australia.
- B)** After viewing of the shapes used by the Easy Tools Pty Ltd, it would appear the shapes being imported from Asia are will within the capabilities of the **Shape Aluminium** extrusions facility at Gosford NSW who would welcome the opportunity to quote.
Contact Ph – 02 4340 4344
Email – al@alushapes.com.ua
- C)** The advantages of local production and a extremely short delivery time coupled with the Buy Australia made (Fully) products would assist Easy Tools in their marketing especially as this is one of their main advertisements. (BUY AUSTRALIA MADE CAMPAIGN)
- D)** Malaysia like other Asian countries it been established some that they export tonnages more than they produce. (As per attached) which also have some export incentivise enacted.

These are some brief statements in support of our recommendation that Easy Tools application although well presented as not really an exception as we also import some aluminium profiles and sections outside of our current capabilities and really manufacture locally for both the domestic and export markets.

I/we trust you will view the above submissions positively and decline this application. Should you require further information please contact myself or Simon Williams our

National Manufacturer.

Vietnamese Government Stops Issuing Certificates of Origin for Firm Suspected of Transshipment

08 JULY 2017 BY STAFF ([HTTP://ALUMINIUMINSIDER.COM/AUTHOR/ADMIN/](http://aluminiuminsider.com/author/admin/))

According to a report (<http://tuoitre.vn/tin/kinh-te/20170615/dung-cap-chung-nhan-xuat-xu-cho-nhom-cua-nhom-toan-cau/1332312.html>) in domestic media, the Vietnamese government has ceased issuing certificates of origin for a firm that imports aluminium from the People's Republic of China.

The director of Vung Tao's branch of the Vietnam Chamber of Commerce and Industry indicated that certificates will no longer be issued to Global Vietnam Aluminium Company, Limited (GVA) until the conclusion of an investigation currently being conducted by the Ministry of Industry and Trade regarding the import of 1.5 million metric tons of 7604 aluminium from China.

Inspectors are concerned that the shipments may be linked to a global transshipment scheme that allegedly involves movement of partially-formed aluminium ingots through Mexico, Vietnam, and Malaysia in order to evade import duties and qualify for rebates for which raw ingots would not be eligible.

Investigators say that the aluminium in question, which is worth billions of U.S. dollars on the open market, would likely be assessed anti-dumping levies totaling 400 percent if sent from Mexico or China, whereas it would only cost an additional 4 percent in duties if it originated from Vietnam.

Global Vietnam Aluminium Company is based in My Xuan, a commune and village in the southeastern province of Ba Ria-Vung Tao. Began in 2011 with a US\$50 million investment from current general manager Jacky Cheung, the firm is a 100 percent **foreign capital enterprise operated by investors from Australia**. GVA specializes in aluminium extrusions.
