Dear Sir/Madam,

Exemption Application EX0040 – Zinc Coated (Galvanised) Steel from PR China, Korea and Taiwan

BlueScope would like to advise that it does not object to the exemption application.

Please note however that BlueScope's no-objection position is provided on the basis that the tolerances allowable as per the goods description be amended as follows:

With tolerances allowable for specification (e) being:

- *thickness +/- 5%*
- *width +/- 5%*

The current goods description provides for tolerances at the 10% level. 5% tolerances are more appropriately aligned to Australian steel making Standards.

If you have any questions concerning this, please do not hesitate to contact me on (02) 4275 4638.

Yours faithfully,

Chad Uphill
International Trade Affairs
