

## Exporter Questionnaire

**Product:** Certain polyvinyl chloride (PVC) flat electric cables

**From:** The People's Republic of China

**Period of Investigation:** 1 July 2013 to 30 June 2014

**Response due by:** 23 December 2014

**Investigation case manager:** Rhys Piper

**Phone:** +61 3 9244 8252

**Fax:** 1300 882 506

**E-mail:** [operations1@adcommission.gov.au](mailto:operations1@adcommission.gov.au)

**Anti-Dumping Commission website:** [www.adcommission.gov.au](http://www.adcommission.gov.au)

**Return completed  
questionnaire to:**

Anti-Dumping Commission  
1010 La Trobe Street  
Docklands VIC 3008

Attention: Director Operations 1

## GOODS UNDER CONSIDERATION

The goods under consideration (the goods) i.e. the goods exported to Australia, allegedly at dumped price, are:

*Flat, electric cables, comprising two copper conductor cores and an 'earth' (copper) core with a nominal conductor cross sectional area of between, and including, 2.5mm<sup>2</sup> and 3 mm<sup>2</sup>, insulated and sheathed with polyvinyl chloride (PVC) materials, and suitable for connection to mains electricity power installations at voltages exceeding 80 V but not exceeding 1000 V, and complying with Australian / New Zealand Standard AS/NZS 5000.2 (the Australian Standard), and whether or not fitted with connectors.*

The applicant indicated that the following products are excluded from the goods:

- single core cables, being cables with a single active core;
- "aerial cables" as defined by the Australian Standard;
- twin active flat cables, that is, flat cables comprising two active cores but no earth core;
- "circular cables" as defined by the Australian Standard;
- cables insulated and / or sheathed with non-PVC material, including but not limited to cross-linked polyethylene (XLPE) materials, including a combination of PVC and non-PVC material;
- cables comprising cores made of aluminium conductors; and
- "flexible cables (cords)" as defined by AS/NZS 3191 and/or AS/NZS 60227.

The application contains the following further information in relation to the goods the subject of the application:

*The goods are commonly referred to as "building wire", because of its use by the building and construction industry in domestic, commercial and industrial mains power supply low-voltage wiring installations. For the purpose of this definition, the term "flat cables" means cables where the conductor and earth cores are laid parallel in the same plane, as defined by the Australian Standard.*

*For the avoidance of doubt, reference to "two copper conductor cores" refers to the "phase core" and "neutral core". The earth core (also comprising of copper) is additional to these two active cores.*

## INSTRUCTIONS

### Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is responsible for investigating the allegation that certain PVC flat electric cable has been exported to Australia from the People's Republic of China (China) at prices less than their normal value and that the dumping has caused material injury to the Australian industry

The Commission will use the information you provide to determine normal values and export prices over the investigation period. This information will determine whether PVC flat electric cables are dumped. You may make separate submissions concerning any other matter, for example injury.

The Commission investigation will be carried out under the provisions of the Part XVB of the *Customs Act 1901*.

### What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem you uncooperative. In that case the Commission may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry). In that case we may assess a dumping margin for your company based upon normal values that may be the highest determined in your country during the investigation period.

It is in your interest, therefore, to provide a complete and accurate submission, capable of verification.

### Due date for response

Manufacturers and exporters are requested to respond to this questionnaire and return it to the Commission within the time specified on the cover page. There is a statutory time limit imposed for the investigation. The Commission may not be able to consider submissions received after the due date.

If you cannot lodge your submission by the due date please advise the investigation case manager as soon as possible.

### Confidential and non-confidential submissions

You are required to lodge one confidential version (for official use only) and one non-confidential version (for public record) of your submission by the due date. Please ensure that *each page* of information you provide is clearly marked either "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia's anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party's understanding of information contained in a document.

As provided for in Australia's anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the investigation case manager.

### **Exporter's declaration**

At section H, you are required to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the goods during the period of investigation, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

### **Verification of the information that you supply**

The Commission will seek to verify the information provided in your submission. Where there are a large number of exporters, the Commission may have to verify information from selected exporters only. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be complete and accurate.

Verification visits take several days. We will want to examine in detail your company's records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have. We will ask you to prepare a non-confidential copy of the report for the public record.

### **If you do not manufacture the goods**

You may export but not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods).

In such cases it is important that you forward a copy of this questionnaire to the relevant manufacturers **immediately**. You should also inform the investigation case officer of the contact details for these manufacturers.

You should complete those sections of the questionnaire that you are reasonably able to complete. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

## If you do not export the goods

Depending on the arrangement for sale of the goods to Australia through an intermediary, the Commission will have to determine who is the exporter of the goods for the purpose of this investigation.

In any case, information (such as cost of production data) supplied by the manufacturer will be relevant to establishing the normal value of the goods. In the absence of verified information, the Commission may use other available information. This information may result in a decision less favourable to your company.

## Outline of information required by this questionnaire

- Section A** General information relating to your company including financial reports.
- Section B** A complete list of your company's exports to Australia over the investigation period.
- Section C** A list of goods sold on the domestic market of the country of export (like goods) that may be compared to the goods under consideration (the goods).
- Section D** A detailed list of all of your company's sales of like goods in your domestic market.
- Section E** Information to allow a fair comparison between export and domestic prices.
- Section F** Information in relation to your company's exports of like goods to countries other than Australia.
- Section G** Costs to make and sell, for exports to Australia and for the domestic market.
- Section H** Your declaration.
- Section I** A checklist.
- Appendix 1** A glossary of terms used in this questionnaire

## Some general instructions for preparing your response

- When answering the questionnaire please carefully read all instructions. The Commission requires a response to *all* sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.
- Answer questions in the order presented in the questionnaire. Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.
- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.
- We recommend that you retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.

- Clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

### **Instructions on providing electronic data**

- It is important that information is submitted in electronic format.
- Electronic data should be emailed or submitted on a CD-ROM, in IBM/MS-DOS format, or another operating system whose disk format is compatible with this MS-DOS version.
- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file).
- The Excel files must be compatible to the USA version.
- If you cannot present electronic data in the requested format contact the investigation case officer as soon as possible.

### **Further information**

Before you respond to the questionnaire you should read all the documentation enclosed with this application including the applicant's non-confidential submission, the booklet *Australia's Anti-Dumping and Countervailing Administration* and the Anti-Dumping Notice notifying the initiation of the investigation. We also advise that you read the attached glossary of terms.

If you require further assistance, or you are having difficulties completing your submission, please contact the investigation case manager. The Commission will need to know the reasons.

## SECTION A COMPANY STRUCTURE AND OPERATIONS

This section requests information relating to company details and financial reports.

### A-1 Identity and communication

Please nominate a person within your company who can be contacted for the purposes of this investigation:

*Head Office:*

Name: 【    】

Position in the company: 【    】

Address: **Hongying Industrial Park, Longping Highway, Fenggang  
Dongguan City, Guangdong PRChina**

Telephone: 【    】

Facsimile number: 【    】

E-mail address of contact person: 【    】

*Factory:*

Address: **Hongying Industrial Park, Longping Highway, Fenggang  
Dongguan City, Guangdong PRChina**

Telephone: 【    】

Facsimile number: 【    】

E-mail address of contact person: 【    】

### A-2 Representative of the company for the purpose of investigation

If you wish to appoint a representative to assist you in this investigation, provide the following details:

Name: **WangJiesan**

Address: **16th Floor, Suite A, China Technology Exchange Building, No. 66  
North 4th Ring West Road, Haidian District, Beijing**

Telephone: **0086-10-62684688**

Facsimile/Telex number: **0086-10-62684288**

E-mail address of contact person: **wangjiesan@whlaw.cn**

*Note that in nominating a representative, the Commission will assume that confidential material relating to your company in this investigation may be freely released to, or discussed with, that representative.*

### A-3 Company information

1. What is the legal name of your business? What kind of entity is it (eg. company, partnership, sole trader)? Please provide details of any other business names that you use to export and/or sell goods.

**Response:**

**The legal name of the Company is DongguanMinxing Cables Co., Ltd, which is a company and there is no other business names that the Company use to export goods.**

2. Who are the owners and/or principal shareholders? Provide details of shareholding percentages for joint owners and/or principal shareholders. (List all shareholders able to cast, or control the casting of, 5% or more of the maximum amount of votes that could be cast at a general meeting of your company).

**Response:**

**The shareholders of the Company are:**

**[ ]**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

3. If your company is a subsidiary of another company, list the principal shareholders of that company.

**Response:**

**Not applicable. The company is not a subsidiary of another company.**

4. If your parent company is a subsidiary of another company, list the principal shareholders of that company.

**Response:**

**Not applicable.**

5. Provide a diagram showing all associated or affiliated companies and your company's place within that corporate structure.

**Response:**

**Not applicable. There is no affiliated company of the company.**

6. Are any management fees/corporate allocations charged to your company by your parent or related company?

**Response:**

**Not applicable.**

7. Describe the nature of your company's business. Explain whether you are a producer or manufacturer, distributor, trading company, etc.

**Response:**

**The Company is a producer.**

8. If your business does not perform all of the following functions in relation to the goods under consideration, then please provide names and addresses of the companies which perform each function:

- produce or manufacture
- sell in the domestic market
- export to Australia, and
- export to countries other than Australia.

**Response:**

**Not applicable. The Company performed all of the following functions in relation to the goods under consideration.**

9. Provide your company's internal organisation chart. Describe the functions performed by each group within the organisation.

**Response:**

**Please see the Exhibit-A-3.9-The Internal Organisation of the Company.**

### **Functions of the Department**

**1) Sales Department:**

**The Sales Department deals on marketing matters such as client communication, monitoring production of marketing material to make sure consistency is maintained within the company. The department is responsible for direct shipment orders and negotiating shipping dates with buyers in co-ordination with factories.**

**2) Financial Department:**

**Financial Department coordinates the monthly closing process and drafts financial statements in a timely manner. The department manages the flow of information to and from the international subsidiaries. The department also prepares payments and invoices.**

**3) Administrative Department:**

**The Administrative Department is responsible for dealing with personnel records and the processing of all payrolls. This department is also responsible for cleaning and safeguard**

**4) Purchasing Department:**

**The Purchasing Department reviews purchase order placement by factory and makes sure the goods are ordered in optimum delivery, the process of ordering running smoothly. The Purchasing Department also participates in the development of specifications for services, equipments, products, supplies or substitute materials.**

**5) Technical Department:**

**The Technical Department is responsible for improving the technology of the products.**

**6) Quality Control Department:**

The Quality Control Department provides instruction, quality inspections and testing requirements specified to each product. Visual and quality inspection is carried out at the production area or production line.

#### 7) Workshop

**Workshop is responsible for manufacturing the products.**

10. Provide a copy of your most recent annual report together with any relevant brochures or pamphlets on your business activities.

**Response:**

**Not applicable. There is no annual report or any relevant brochure or pamphlets on the Company's business activities.**

### A-4 General accounting/administration information

1. Indicate your accounting period.

**Response:**

**The accounting period of the Company is from 1st Jan. to 31st Dec.**

2. Indicate the address where the company's financial records are held.

**Response:**

**The address where the company's financial records are held is Hongying Industrial Park, Longping Highway, Fenggang Dongguan City, Guangdong PR China.**

3. Please provide the following financial documents for the two most recently completed financial years plus all subsequent monthly, quarterly or half yearly statements:

- chart of accounts;
- audited consolidated and unconsolidated financial statements (including all footnotes and the auditor's opinion);
- internal financial statements, income statements (profit and loss reports), or management accounts, that are prepared and maintained in the normal course of business for the goods under consideration.

These documents should relate to:

- the division or section/s of your business responsible for the production and sale of the goods under consideration, and
- the company.

- **Response:**

- **【Please see the Exhibit-A-4.3.1-chart of accounts and Exhibit-A-4.3.2-Audit Report of 2012, 2013, Financial Statement of June of 2014.】**
- **This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

4. If you are not required to have the accounts audited, provide the unaudited financial statements for the two most recently completed financial years, together with your taxation returns. Any subsequent monthly, quarterly or half yearly statements should also be provided.

**Response:**

**Not applicable.**

5. Do your accounting practices differ in any way from the generally accepted accounting principles in your country? If so, provide details.

**Response:**

**Not applicable. Our financial accounting practices are in accordance with accepted accounting principles in China.**

6. Describe:

The significant accounting policies that govern your system of accounting, in particular:

- the method of valuation for raw material, work-in-process, and finished goods inventories (e.g. last in first out –LIFO, first in first out- FIFO, weighted average);

**Response:**

**The delivered inventories shall be calculated with weighted averaging method. The ending inventories shall be calculated on the lower one between actual cost and net realizable value. Working material was amortized with method of one time write-off.**

- costing methods, including the method (e.g. by tonnes, units, revenue, direct costs etc.) of allocating costs shared with other goods or processes (such as front office cost, infrastructure cost etc.);

**Response:**

**When the construction in progress reaches the expected condition for use, it should be transferred into fixed assets items in real expenditure. Construction in progress reaching expected status of use but without a final settlement of account, shall be accounted as fixed asset with estimated fixed assets value, and shall adjust the former temporary-estimated value in accordance with actual cost when final settlement of account was made. The expenditure of production shall be aggregated by cost item and accounting object. Direct expenditure shall be booked into cost of production and indirect expenditure shall be allocated among products by a specific distribution coefficient.**

**Response:**

**Damaged or sub-standard goods shall be valued on market price.**

- valuation methods for scrap, by products, or joint products;

**Response:**

**Scrap, by products and joint products shall be sold on market price.**

- valuation and revaluation methods for fixed assets;

**Response:**

**Fixed assets are initially measured at actual cost from purchase and depreciation will be made from the following month with straight line method.**

- average useful life for each class of production equipment and depreciation method and rate used for each;

**Response:**

<b>Asset category</b>	<b>Expected economic life span (year)</b>	<b>residual value(%)</b>	<b>Annual Depreciation ratio(%)</b>
<b>House\buildings</b>	<b>20-40</b>	<b>0-3</b>	<b>2.5-5</b>
<b>Mechanical equipment</b>	<b>10-20</b>	<b>0-10</b>	<b>4.5-10</b>
<b>Transport equipment</b>	<b>3-5</b>	<b>0-10</b>	<b>18-33.3</b>
<b>Office equipment and Other equipment</b>	<b>3-5</b>	<b>0-10</b>	<b>18-33.3</b>

- treatment of foreign exchange gains and losses arising from transactions;

**Response:**

**Transactions denominated in foreign currencies are translated into RMB by the sight rate on the transaction day. Foreign currency of non-monetary items valued by fair value are translated into RMB on the sight standard rate of the date of fair value recognition, difference from translation directly booked into current income statement as fair value movement.**

- treatment of foreign exchange gains/losses arising from the translation of balance sheet items;

**Response:**

**Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated into RMB at the exchange rates at sight. Exchange differences arising from these translations are taken to the income statement, with exception that gains/losses related to special foreign currency fund borrowing during fixed assets purchase period are capitalized.**

- inclusion of general expenses and/or interest;

**Response:**

**Loan expenses such as interest and foreign exchange differences from loans for purchasing fixed assets are capitalized and calculated into that asset's cost, at the time when asset expenditure and loan expenses incur and when purchasing or building activities start as a necessity to make that asset reach expected usable condition. Expenses of other loans are accounted into current period's income statement.**

- provisions for bad or doubtful debts;

**Response:**

For those individually significant accounts receivable and other receivables, when proof exists to show the company will not be able to collect them according to prescribed clauses, bad debt provision is made and the method of accrual of bad debt provision is: accrued according to the difference between the present value of its expected future cash flow lower than its book value. For individually non-significant, and individually tested after individually significant but not impaired receivables (including accounts receivable and other receivables), the proportion of accrual on aging analysis basis combined with actual loss rate basis is listed as follows: aged 1-2 years, 10% of their balance of provision; aged 2 -3 years, 20% of their balance of provision; aged 3-5 years or more, 50% of their balance of provision; aged 5 years or more, 100% of their balance of provision. There is strong evidence for the existence of significant differences in the recoverability of receivables, individual test for impairment will be made and bad debt provision will be accrued according to the difference between the present value of its expected future cash flow lower than its book value.

For other items (including notes receivable, prepayments, interest receivable, long-term receivables, etc.), method of accrual of bad debt provision is: accrued according to the difference between the present value of its expected future cash flow lower than its book value.

- expenses for idle equipment and/or plant shut-downs;

**Response:**

**Not applicable.**

- costs of plant closure;

**Response:**

**Not applicable.**

- restructuring costs;

**Response:**

**Restructuring costs, including the accounting and auditing fees, legal fees, consulting fees, etc., are booked into the cost of M&A.**

- by-products and scrap materials resulting from your company's production process; and

**Response:**

**There are no by-products. The scrap materials are Insulation and sheath.**

- effects of inflation on financial statement information.

**Response:**

**Not applicable.**

7. In the event that any of the accounting methods used by your company have changed over the last two years provide an explanation of the changes, the date of change, and the reasons for it.

**Response:**

**Not applicable.**

## **A-5 Income statement**

Please fill in the following table. It requires information concerning all products produced and for the goods under consideration (*'goods under consideration'* (the goods) is defined in the Glossary of Terms in the appendix to this form). You should explain how costs have been allocated.

Note: if your financial information does not permit you to present information in accordance with this table please present the information in a form that closely matches the table.

**Response:**

**【Please see the Spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Prepare this information on a spreadsheet named "**Income statement**".

*This information will be used to verify the completeness of cost data that you provide in Section G. If, because of your company's structure, the allocations would not be helpful in this process, please explain why this is the case.*

**A-6 Sales**

State your company's net turnover (after returns and all discounts), and free of duties and taxes. Use the currency in which your accounts are kept, in the following format:

**Response:**

**【Please see the Spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Prepare this information in a spreadsheet named "TURNOVER".

*This information will be used to verify the cost allocations to the goods under consideration in Section G.*

*Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.*

## SECTION B

### SALES TO AUSTRALIA (EXPORT PRICE)

*This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory. Export prices are usually assessed at FOB point, but the Commission may also compare prices at the ex factory level.*

*You should report prices of **all** goods under consideration (the goods) **shipped** to Australia during the investigation period.*

*The invoice date will normally be taken to be the date of sale. If you consider:*

*the sale date is not the invoice date (see 'date of sale' column in question B4 below) and;*

*an alternative date should be used when comparing export and domestic prices*

*you **must** provide information in section D on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.*

**B-1** For each customer in Australia to whom you shipped goods in the investigation period list:

[ ]

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

**B-2** For each customer identified in B1 please provide the following information.

(a) Describe how the goods are sent to each customer in Australia, including a diagram if required.

**Response:**

**The goods are sent to the customer in Australia by ship, delivery terms are FOB and CIF.**

(b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

**Response:**

**We exported the goods to Australia customer directly and there is no commission between us.**

- (c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of DDP sales, explain who retains ownership when the goods enter Australia.

**Response:**

**The delivery terms of the Company are CIF and FOB, the Australia customer retains the ownership when the goods enter Australia.**

- (d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).

**Response:**

**Not applicable. There is no such distributor agreement or other contracts.**

- (e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.

**Response:**

**Please see Exhibit B-2-e-Flow Chart Exported to Australia.**

**The export prices are based on order with the client and there is no price lists of the company.**

- (f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (eg free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).

**Response:**

**Not applicable. The Company is not related to any of its Australian customers.**

- (g) Details of the forward orders of the goods under consideration (include quantities, values and scheduled shipping dates).

**Response:**

**Not applicable.**

- B-3** Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

**Response:**

**Not applicable.**

**B-4** Prepare a spreadsheet named “Australian sales” listing all shipments (i.e. transaction by transaction) to Australia of the goods under consideration in the investigation period. You must provide this list in electronic format. Include the following export related information:

**Response:**

**【Please see the Spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company’s competitors with insights into the Company’s commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

\*\* FOB export price and Ocean Freight:

FOB export price: An FOB export price must be calculated for each shipment - regardless of the shipping terms. FOB price includes inland transportation to the port of exportation, inland insurance, handling, and loading charges. It excludes post exportation expenses such as ocean freight and insurance. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.

Ocean freight: as ocean freight is a significant cost it is important that the actual amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis - estimates must reflect changes in freight rates over the investigation period.

Freight allocations must be checked for consistency.

\* All of these costs are further explained in section E-1.

**B-5** If there are any other costs, charges or expenses incurred in respect of the exports listed above which have not been identified in the table above, add a column (see “other factors” in question B-4) for each item, and provide a description of each item. For example, other selling expenses (direct or indirect) incurred in relation to the export sales to Australia.

**Response:**

**Not applicable.**

**B-6** For each type of discount, rebate, allowance offered on export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met by the importer to obtain the discount.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amount shown in your response to question B4. If they vary by customer or level provide an explanation.

**Response:**

**Not applicable.**

**B-7** If you have issued credit notes (directly or indirectly) to the customers in Australia, in relation to the invoices listed in the detailed transaction by transaction listing in response to question B4, provide details of each credit note if the credited amount has **not** been reported as a discount or rebate.

**Response:**

**Not applicable.**

**B-8** If the delivery terms make you responsible for arrival of the goods at an agreed point within Australia (eg. delivered duty paid), insert additional columns in the spreadsheet for all other costs incurred. For example:

Import duties	Amount of import duty paid in Australia
Inland transport	Amount of inland transportation expenses within Australia included in the selling price
Other costs	Customs brokers, port and other costs incurred (itemise)

**Response:**

**Not applicable.**

**B-9** Select two shipments, in different quarters of the investigation period, and provide a complete set of all of the documentation related to the export sale. For example:

- the importer's purchase order, order confirmation, and contract of sale;
- commercial invoice;
- bill of lading, export permit;
- freight invoices in relation to movement of the goods from factory to Australia, including inland freight contract;
- marine insurance expenses; and
- letter of credit, and bank documentation, proving payment.

The Commission will select additional shipments for payment verification at the time of the visit.

**Response:**

**【Please see Exhibit B-9-two transactions documents related to export Australia】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

## SECTION C

### EXPORTED GOODS & LIKE GOODS

**C-1** Fully describe all of the goods you have exported to Australia during the investigation period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

**Response:**

The goods we have exported to Australia during the investigation period are flat, electric cables, comprising two copper conductor cores and an 'earth' (copper) core with a nominal conductor cross sectional area of between, It is 2.5 mm<sup>2</sup>, insulated and sheathed with polyvinylchloride (PVC) materials, and suitable for connection to mains electricity power installations at voltages exceeding 80 V but not exceeding 1000 V, and complying with Australian / New Zealand Standard AS/NZS 5000.2 (the Australian Standard), and whether or not fitted with connectors.

**C-2** List each type of goods exported to Australia (these types should cover all types listed in spreadsheet "Australian sales" – see section B of this questionnaire).

**Response:**

The goods we exported to Australia only have one type, which is [            ]

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.

**C-3** If you sell like goods on the domestic market, for each type that your company has exported to Australia during the investigation period, list the most comparable model(s) sold domestically.

The worksheet "Like goods comparison" should be completed to provide a detailed explanation of the differences where those goods sold domestically (ie. the like goods – see explanation in glossary) are not identical to goods exported to Australia.

**Response:**

**Not applicable. The company did not sell like goods on the domestic market during the investigation period.**

**C-4** Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

**Response:**

**Not applicable.**

## SECTION D DOMESTIC SALES

*This section seeks information about the sales arrangements and prices in the domestic market of the country of export.*

*All domestic sales made during the investigation period must be listed transaction by transaction. If there is an extraordinarily large volume of sales data and you are unable to provide the complete listing electronically you **must** contact the case officer **before** completing the questionnaire. If the case officer agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets the Commission requirements. If agreement cannot be reached as to the appropriate method the Commission may not visit your company.*

*The Commission will normally take the invoice date as being the date of sale in order to determine which sales fall within the investigation period.*

*If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices –*

*you **must** provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.*

*If you do not have any domestic sales of like goods you must contact the case officer who will explain the information the Commission requires for determining a normal value using alternative methods.*

### **D-1** Provide:

- a detailed description of your distribution channels to domestic customers, including a diagram if appropriate;
- information concerning the functions/activities performed by each party in the distribution chain; and
- a copy of any agency or distributor agreements, or contracts entered into.

If any of the customers listed are associated with your business, provide details of that association. Describe the effect, if any, that association has upon the price.

### **Response:**

**Please see Exhibit D-1-Flow Chart in the Domestic Market.**

**There is no agency or distributor agreements, or contracts between clients and our company.**

### **D-2** Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

### **Response:**

**Not applicable, there was no domestic sale of the investigated products during the POI.**

**D-3** Explain in detail the sales process, including:

- the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
- whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

**Response:**

In general, sales department get the offer from clients and send the message to production department. Having the confirmation from the production department; sales department will sign the contract with clients. After receiving the payment from the clients, the Company will deliver the products to the warehouse of clients. The price includes the cost of delivery to customer.

And there is no price list of the Company.

**D-4** Prepare a spreadsheet named “**domestic sales**” listing **all** sales of like goods made during the investigation period. The listing must be provided on a CD-ROM. Include all of the following information.

**Response:**

**Not applicable. There was no domestic sale of the investigated products during the POI.**

Costs marked with \* are explained in section E-2.

**D-5** If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see “other factors”). For example, certain other selling expenses incurred.

**Response:**

**Not applicable. There was no domestic sale of the investigated products during the POI.**

**D-6** For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:

- provide a description; and
- explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

**Response:**

**Not applicable. There was no domestic sale of the investigated products during the POI.**

**D-7** Select two domestic sales, in different quarters of the investigation period, that are at the same level of trade as the export sales. Provide a complete set of documentation for those two sales. (Include, for example, purchase order, order acceptance, commercial invoice, discounts or rebates applicable, credit/debit notes, long or short term contract of sale, inland freight contract, bank documentation showing proof of payment.)

The Commission will select additional sales for verification at the time of our visit.

**Response:**

**Not applicable. There was no domestic sale of the investigated products during the POI.**

## SECTION E FAIR COMPARISON

*Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (ie. the normal value).*

*Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.*

*As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.*

*To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. The Commission must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.*

*Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence the Commission may disallow the adjustment.*

*Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.*

*A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.*

*The investigation must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. The Commission will not consider new claims made after the verification visit.*

## E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, 'Australian sales')

### 1. Transportation

Explain how you have quantified the amount of inland transportation associated with the export sale ("**Inland transportation costs**"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

#### Response:

**The expense was booked in operating expenses of the general ledger account, the details and evidence of payment refers to [Exhibit B-9-two transactions documents related to export Australia]**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

### 2. Handling, loading and ancillary expenses

List all charges that are included in the export price and explain how they have been quantified ("**Handling, loading & ancillary expenses**"). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes;
- document fees and customs brokers fees;
- clearance fees;
- bank charges, letter of credit fees
- other ancillary charges.

#### Response:

- **The expense was booked in operating expenses of the general ledger account, the details and evidence of payment refers to [Exhibit B-9-two transactions documents related to export Australia]**
- **This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

**3. Credit**

The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the investigation period. Explain the nature of the interest rates most applicable to these export sales eg, short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, *and if* export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.

**Response:**

**Not applicable.**

**4. Packing costs**

List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed '**Packing**'.

**Response:**

**Not applicable. The packing costs are included in the manufacture costs, the products do not need to pack after it leaves the factory.**

**5. Commissions**

For any commissions paid in relation to the export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed "**Commissions**". Identify the general ledger account where the expense is located.

**Response:**

**Not applicable.**

**6. Warranties, guarantees, and after sales services**

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("**Warranty & guarantee expenses**" and "**Technical assistance & other services**"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

**Response:**

**Not applicable.**

**7. Other factors**

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. For example, other variable or fixed selling expenses, including salesmen’s salaries, salesmen’s travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.

**Response:**

**Not applicable.**

## 8. Currency conversions

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a ‘sustained’ movement during the period of investigation (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect ‘sustained’ movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the investigation period.

**Response:**

**Please see the exchange rate table, which comes from People's Bank of China.**

Date	RMB	USD
1-Jul-13	6.1805	1
1-Aug-13	6.1778	1
1-Sep-13	6.1702	1
1-Oct-13	6.1415	1
1-Nov-13	6.1452	1
1-Dec-13	6.1329	1
1-Jan-14	6.099	1
1-Feb-14	6.1089	1
1-Mar-14	6.119	1
1-Apr-14	6.1503	1
1-May-14	6.156	1
1-Jun-14	6.171	1

## E-2 Costs associated with domestic sales

(These cost adjustments will relate to your responses made at question D-4, “**domestic sales**”)

*The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.*

### 1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (S G & A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

**Response:**

**Not applicable. There is no domestic sale during the investigation period.**

**2. Import charges and indirect taxes**

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon *exportation* and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold *domestically* but is not borne by the exports to Australia;

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: *“Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs”*

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

**Response:**

**VAT shall be imposed when the Company purchases inputs to produce the merchandise. Currently, the VAT rate is 17%. VAT refunds are given on exports. The export tax refund rate of the products was 17%. More details on export tax refunds are provided in Exhibit E2.2-legislation on Export Tax Refund.**

**The total tax refunds=the total exported amount \* tax refund rate of the subject product, and it is allocated to the product in accordance with the exported amount.**

**3. Level of trade**

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade may be adjusted for using either of the following methods:

- (a) *costs arising from different functions*: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

- (b) *level discount*: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

**Response:**

**There is no domestic sale during the investigation period**

**For export sales, the company has only one type of customer, which is wholesaler.**

**4. Credit**

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

- the rate, or average of rates, applying on actual short term borrowings by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the investigation period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system<sup>1</sup>, the average credit period may be determined as follows:

1. *Calculate an accounts receivable turnover ratio*

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

2. *Calculate the average credit period*

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

**Response:**

**Not applicable.**

*The following items are identified in the amounts quantified at question D-4:*

**5. Transportation**

Explain how you have quantified the amount of inland transportation associated with the domestic sales (“**Inland transportation Costs**”). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

**Response:**

**The transportation expense is booked in operating expenses of the general ledger account.**

**6. Handling, loading and ancillary expenses**

---

<sup>1</sup>Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

List all charges that are included in the domestic price and explain how they have been quantified (“**Handling, loading and ancillary Expenses**”). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

**Response:**

**The transportation expense is booked in operating expenses of the general ledger account.**

**7. Packing**

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed “**Packing**”.

**Response:**

**Not applicable. The packing costs are included in the manufacture costs, the products do not need to pack once it leaves the factory.**

**8. Commissions**

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed “**Commissions**”. Identify the general ledger account where the expense is located.

**Response:**

**Not applicable.**

**9. Warranties, guarantees, and after sales services**

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“**Warranty & Guarantee expenses**” and “**Technical assistance & other services**”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

**Response:**

**Not applicable.**

**10. Other factors**

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. List the factors and show how each has been quantified in per unit terms. For example:

- *inventory carrying cost*: describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;
- *warehousing expense*: an expense incurred at the distribution point;

- *royalty and patent fees*: describe each payment as a result of production or sale, including the key terms of the agreement;
- *advertising*; and
- *bad debt*.

**Response:**

**Not applicable.**

### **E-3 Duplication**

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson's salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

**Response:**

**Not applicable.**

## **SECTION F**

### **EXPORT SALES TO COUNTRIES OTHER THAN AUSTRALIA (THIRD COUNTRY SALES)**

*Your response to this part of the questionnaire may be used by the Commission to select sales to a third country that may be suitable for comparison with exports to Australia.*

*Sales to third countries may be used as the basis for normal value in certain circumstances. The Commission may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.*

**F-1 Using the column names and column descriptions below provide a summary of your export sales to countries other than Australia.**

**Response:**

**【Please see the spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Supply this information in spreadsheet file named "Third Country"

**F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.**

**Response:**

**Not applicable. There was no any difference in sales to third countries which may affect their comparison to export sales to Australia**

## SECTION G

### COSTING INFORMATION AND CONSTRUCTED VALUE

*The information that you supply in response to this section of the questionnaire will be used for various purposes including:*

- testing the profitability of sales of like goods on the domestic market;*
- determining a constructed normal value of the goods under consideration (the goods) - ie of the goods exported to Australia; and*
- making certain adjustments to the normal value.*

*You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (eg. non-operating expenses not included elsewhere) associated with the goods.*

*In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.*

*If, in response to question B4 (Sales to Australia, Export Price) you:*

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and*
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)*

*you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the investigation period.*

*At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.*

#### **G-1. Production process and capacity**

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

**Response:**

**【Please see Exhibit G-1-The Manufacturing Process of the Company】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response**

#### **G-2. Provide information about your company's total production**

**in the following table:**

\* rather than showing a 'name-plate' optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

**Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Provide this information on a spreadsheet named "**Production**".

**G-3. Cost accounting practices**

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

**Response:**

**【Please see Exhibit G-3- Flowchart of Cost Accounting System】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

- 2 Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (ie differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

**Response:**

**The Company's cost accounting system based on actual cost.**

- 3 Provide details of any significant or unusual cost variances that occurred during the investigation period.

**Response:**

**There are no any significant or unusual cost variances that occurred during the investigation period.**

- 4 Describe the profit/cost centres in your company's cost accounting system.

**Response:**

**The company adopt actual cost and do not have the profit /cost centres.**

- 5 For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

**Response:**

**The expenditure of production shall be aggregated by cost item and accounting object. Direct expenditure shall be booked into cost of production and indirect expenditure shall be allocated among products by a specific distribution coefficient.**

- 6 Describe the level of product specificity (models, grades etc) that your company's cost accounting system records production costs.

**Response:**

**The level of product can be specified into size**

- 7 List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

**Response:**

**Not applicable.**

- 8 State whether your company engaged in any start-up operations in relation to the goods under consideration. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

**Response:**

**Not applicable.**

- 9 State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation in its accounting records.

**Response:**

**Not applicable.**

#### **G-4 Cost to make and sell on domestic market**

*This information is relevant to testing whether domestic sales are in the ordinary course of trade.<sup>2</sup>*

1. Please provide (in the format shown in the table below) the actual unit cost to make and sell each model/type\* (identified in section C) of the like goods sold on the domestic market. Provide this cost data for each quarter over the investigation period. If your company calculates costs monthly, provide monthly costs.

**Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

---

<sup>2</sup> The Commission applies the tests set out in s.269TAAD of the Customs Act 1901 to determine whether goods are in ordinary course of trade. These provisions reflect the WTO anti-dumping agreement – see Article 2.2.1.

2. Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

**Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Prepare this information in a spreadsheet named "**Domestic CTMS**".

<sup>1</sup> Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.

<sup>2</sup> Relating to costs of production only; identify each cost separately.

<sup>3</sup> Identify each cost separately. Please ensure non-operating expenses **that relate to the goods under consideration** are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

*Provide this information for each quarter (or month if your company calculates costs on a monthly basis) over the period of the investigation.*

*Provide the information broken down into fixed and variable costs, and indicate the % total cost represented by fixed costs.*

*If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.*

*Please specify unit of currency.*

**Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

## G-5 Cost to make and sell goods under consideration (goods exported to Australia)

*The information is relevant to calculating the normal values based on costs. It is also relevant to calculating certain adjustments to the normal value.*

Prepare this information in a spreadsheet named "**Australian CTMS**".

<sup>1</sup> Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.

<sup>2</sup> Relating to costs of production only; identify each cost separately.

<sup>3</sup> Identify each cost separately. Please ensure non-operating expenses **that relate to the goods** are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

*Provide this information for each quarter (or month if your company calculates costs on a monthly basis) over the period of the investigation.*

*Provide the information broken down into fixed and variable costs, and indicate the % total cost represented by fixed costs.*

*If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.*

*Please specify unit of currency.*

### **Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

- 1 Where there are cost differences between goods sold to the domestic market and those sold for export, give reasons and supporting evidence for these differences.

### **Response:**

**Not applicable. There was no domestic sale for the product during the investigation period.**

- 2 Give details and an explanation of any significant differences between the costs shown, and the costs as normally determined in accordance with your general accounting system. Reference should be made to any differences arising from movements in inventory levels and variances arising under standard costing methods.

### **Response:**

**Not applicable.**

- 3 In calculating the unit cost to make and sell, provide an explanation if the allocation method used (e.g. number, or weight etc.) to determine the unit cost differs from the prior practice of your company.

**Response:**

**Not applicable.**

## **G-6 Major raw material costs**

List major raw material costs, as

- Copper (specify whether purchased as copper rod or wire);
- Polyvinyl chloride (PVC) resin by type/grade; and
- other.

**Response:**

**The major raw material costs are Copper and PVC**

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (e.g. market prices, transfer prices, or actual cost of production).

Please complete worksheets “**Copper Purchases**” and “**PVC Resin Purchases**” for this purpose.

**Response:**

**【Please see spreadsheet】**

**This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company’s competitors with insights into the Company’s commercial strategy, thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.**

Where the major input is produced by an associate of your company the Commission will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered. Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at ‘spot prices’ or under long term contracts etc).

The term associate is defined in section 269TAA of the *Customs Act*. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

**Response:**

**Not applicable. The major input is not produced by an associate of our company the Commission will compare our purchase price to a normal market price**

**Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.**

## SECTION I CHECKLIST

*This section is an aid to ensure that you have completed all sections of this questionnaire.*

Section	Please tick if you have responded to all questions
Section A – general information	✓
Section B – export price	✓
Section C – like goods	✓
Section D – domestic price	✓
Section E – fair comparison	✓
Section F – exports to third countries	✓
Section G – costing information	✓
Section H – declaration	✓

Electronic Data	Please tick if you have provided spreadsheet
<b>INCOME STATEMENT</b>	✓
<b>TURNOVER</b> – sales summary	✓
<b>AUSTRALIAN SALES</b> – list of sales to Australia	✓
<b>DOMESTIC SALES</b> – list of all domestic sales of like goods	✓
<b>THIRD COUNTRY</b> – third country sales	✓
<b>PRODUCTION</b> – production figures	✓
<b>DOMESTIC COSTS</b> – costs of goods sold domestically	✓
<b>AUSTRALIAN COSTS</b> – costs of goods sold to Australia	✓

## APPENDIX

### GLOSSARY OF TERMS

This glossary is intended to provide you with a basic understanding of technical terms that appear in the questionnaire.

#### **Adjustments**

To enable a fair comparison between the export price and the normal value Australian legislation provides for the adjustment of the domestic price paid for like goods. Adjustments are made to account for sales occurring at different times, specification differences, and differences in the terms or circumstances of the sales. The adjustment to the normal value may be upward or downward. Areas where you believe an adjustment is necessary should be identified. Section E of the questionnaire refers.

Examples of adjustments that may be made include: *sales occurring at different times* (it is sometimes necessary to compare domestic and export sales made at different times - in these circumstances an adjustment may be made to reflect price movements during that time); *specification differences*; *packaging*; *taxes*; *level of trade*; *advertising*; *servicing/warranty*; *inland freight*; *warehousing*; *export charges*; *credit terms*; *duty drawback*; *commissions*.

Adjustments may also be required where the normal value is based upon costs to make and sell.

#### **Arm's length**

Sales are not considered to be at "arm's length" on your domestic market if there is any consideration payable for the goods other than their price, or there is an association between the buyer and the seller which affects the price, or there will be a reimbursement, compensation or benefit for, or in respect of, the price.

#### **Constructed value**

In cases where domestic prices paid for the goods under consideration in the country of export cannot be used for the determination of normal value, i.e. when there are no or insufficient sales or where such sales were not made in the ordinary course of trade, normal value may be based on a constructed value. Constructed value is calculated on the basis of the cost of production of the goods under consideration plus a reasonable amount for selling, general and administration costs, and for profits, that are associated with sales on the domestic market of the country of export.

#### **Cost of production/manufacturing**

The cost of production or manufacture consists of all manufacturing costs associated with the goods. It is the sum of direct materials, direct labour and factory overheads.

## **Cost to make and sell**

The cost to make and sell is the sum of the cost of production or manufacture, and the selling, general and administration costs associated with the sale of those goods.

## **Country of origin**

The country in which the last significant process in the manufacture or production of the goods was performed.

## **Date of sale**

The Commission will normally use the invoice date as recorded in the exporter or producer's records. Another date may be used if this better reflects the material terms of sale. The questionnaire directs attention to matching data sets of domestic and export sales where some other date is used, as well as matching cost information.

## **Direct labour cost**

Direct labour is categorised as a variable cost, i.e. the value varies with the level of production.

## **Dumping**

Dumping occurs when the products of one country are exported to another country at a price less than their normal value.

## **Dumping margin**

Where the export price is less than the normal value the dumping margin is the amount of the difference. It can be expressed as a value or as a percentage of the export price.

## **Export price**

The export price of the goods is usually the price paid or payable to the exporter in arm's length transactions, in most instances calculated at the Free on Board (FOB) level.

## **Exporting country**

The country of export is normally the country of origin from which the goods are shipped. The country of export may be an intermediate country, except where the products are merely transhipped through that country, or the products concerned are not produced in that country, and there is no comparable price in that country.

## **Factory overheads**

Factory overheads consist of variable costs eg. power, supplies, indirect labour and fixed costs e.g. factory rent, factory insurance, factory depreciation etc.

## Goods under consideration (the goods)

The goods to which the application for anti-dumping action relates. That is, the goods that you have exported to Australia allegedly at dumped prices.

## Incoterms

The following abbreviations are commonly used (comment is provided concerning costs that are normally borne by the seller):

EXW	ex works (the seller's minimum obligation as costs relate to goods being made available at the seller's premises)
FCA	free carrier (main carriage not paid by seller. Pay costs until such time that the goods have been delivered at the named point into custody of a carrier named by the seller. Customs formalities, taxes etc paid if required)
FAS	free alongside ship (main carriage not paid by seller. Deliver the goods alongside the ship)
FOB	free on board (main carriage not paid by seller. Deliver the goods on board, provide export clearance if required, pay loading costs to the point the goods have passed the ship's rail, pay customs formalities, taxes etc payable upon exportation)
CFR	cost and freight (main carriage paid by seller. Pay all costs until delivered as well as freight, loading and unloading, pay customs formalities, taxes etc payable upon exportation)
CIF	cost, insurance and freight (main carriage paid by seller. Pay all costs as under CFR as well as marine insurance) the terms CFR and CIF are only used where goods are carried by sea or waterway transport
CPT	carriage paid to
CIP	carriage and insurance paid to the terms CPT and CIP are used as alternatives to CFR and CIF where the goods are carried by air, road, rail etc
DAF	delivered at frontier (goods carried by rail or road and cleared for export at the named place at the frontier. Pay costs until delivered at the frontier plus any discharge costs incurred to place the goods at the customer's disposal)
DES	delivered ex ship (goods made available to the buyer on board the ship uncleared for import at the named port of destination. Pay all costs incurred in placed at the disposal of the buyer, pay customs formalities, taxes etc. payable upon exportation, and where necessary for transit through another country)
DDU	delivered duty unpaid (Pay all costs for carriage to the agreed point, pay customs formalities, taxes etc. payable upon exportation, and where necessary for transit through another country)
DDP	delivered duty paid (goods made available at the named place in the country of importation – all risks and costs being incurred by the seller including duties, taxes etc. incurred upon importation)

## Investigation period

A period defined by the Commission over which importations of the goods are examined.

## Like goods

Like goods are goods sold on the domestic market of the country of export (or to a third country) that are identical in all respects to the goods under consideration or that, although not alike in all respects have characteristics closely resembling those of the goods under consideration. The term 'like goods' also refers to the goods produced by the Australian industry allegedly being injured by dumped imports.

## Normal value

Australian legislation sets out several ways to assess "normal value".

The preferred method is to use the price paid for like goods sold for domestic consumption in the country of export. Usually, these sales are made by you, but there may be circumstances where it is appropriate to use sales made by other sellers on the domestic market.

Sale prices must be at arm's length and in the ordinary course of trade. In the absence of relevant or suitable domestic sales, the normal value may be determined by constructing a price based upon all costs to make and sell the goods. Profit may also be included if the sales on the domestic market are profitable. Alternatively the normal value may be ascertained using the price paid for like goods sold in the ordinary course of trade at arm's length to customers in a country other than Australia, however this option is rarely used.

Finally, when a normal value cannot be ascertained by any of the above methods, or if no information is provided, the Commission will determine the normal value by considering all the relevant information, including the applicant's information. This allows the applicant's information to be used where sufficient information has not been furnished or is not available.

Where domestic price generally, and the trade of the exporting country are determined or substantially influenced by the government of the exporting country, an alternative/surrogate market economy is selected by the Commission and the normal value is determined as if the surrogate country were the export source.

## Ordinary course of trade

Testing for "ordinary course of trade" includes a comparison of the selling price and the unit cost to make and sell for the same period. If sales in respect of a substantial quantity of goods over an extended period of time, usually 12 months, do not recover all costs and these losses are not likely to be recovered within a reasonable period of time, (again usually 12 months) then the sales are regarded as being not in the ordinary course of trade.

There may be circumstances where it is appropriate to use a period other than 12 months in assessing whether sales are in the ordinary course of trade.

Unprofitable sales are to be taken to have occurred in substantial quantities during an extended period where the unprofitable sales amount to 20% or more of the total volume of sales of the goods by the exporter over the period. An extended period of time is usually taken to be a period not less than 12 months. Where unprofitable sales are rejected, normal value is based upon remaining profitable sales provided they occur in sufficient number. Where all sales have been made at a loss, or profitable sales are insufficient, the normal value may be constructed from costs to make and sell.

### **Selling, general and administration expenses (SG&A)**

The selling, general and administration expenses includes all selling, distribution, general and administration expenses including finance costs that would be incurred if the goods were sold for domestic consumption in the country of export. The amounts are determined in each case using all the available information and may include expenses incurred in:

- . domestic sales of like goods;
- . sale of goods of the same general category by the exporter; or
- . sales in the industry in the country of export.

The expenses must, however, reflect the selling, general and administration costs of the goods. Administrative and selling expenses include: director's fees, management salaries and benefits, office salaries and benefits, office supplies, insurance, promotion, entertainment, depreciation and corporate overheads.
