

ANTI-DUMPING NOTICE NO. 2016/49

Customs Act 1901 – Part XVB

Certain Aluminium Road Wheels

Exported from the People’s Republic of China by

Danyang Jingyi Aluminum Industry Co., Ltd

Findings in relation to an Accelerated Review of Anti-Dumping Measures

Notice under subsection 269ZG(3)(b) of the Customs Act 1901

The Commissioner of the Anti-Dumping Commission (the Commissioner) has completed the accelerated review, which commenced on 29 January 2016, of the anti-dumping measures applying to aluminium road wheels (“the goods”) exported to Australia from the People’s Republic of China by Danyang Jingyi Aluminum Industry Co., Ltd (“the applicant”).

Recommendations resulting from that accelerated review, reasons for the recommendations and material findings of fact and law in relation to the accelerated review are contained in *Anti-Dumping Commission Report No. 336* (REP 336).

I, KAREN LESLEY ANDREWS, the Assistant Minister for Science and the Parliamentary Secretary to the Minister for Industry, Innovation and Science¹, have considered REP 336 and have decided to accept the recommendations and reasons for the recommendations, including all the material findings of facts and law set out in REP 336.

Under subsection 269ZG(3)(b) of the *Customs Act 1901* (the Act), I declare that, with effect from 29 January 2016, the Act and the *Customs Tariff (Anti-Dumping) Act 1975* (the Dumping Duty Act) have effect as if the original dumping duty notice and countervailing duty notice had applied to the applicant but the Parliamentary Secretary had fixed specified different variable factors relevant to the determination of duty.

The duty that has been determined is an amount worked out in accordance with the combination of fixed and variable duty method, as detailed in the table below.

¹ On 20 September 2015, the Prime Minister appointed the Parliamentary Secretary to the Minister for Industry, Innovation and Science as the Assistant Minister for Science.

Exporter	Effective rate of interim dumping duty (fixed component)	Effective rate of interim countervailing duty	Effective rate of combined interim countervailing duty and interim dumping duty*	Duty Method
Danyang Jingyi Aluminum Industry Co., Ltd	0.0%	0.0%	0.0%	Dumping – combination of fixed and variable duty method. Countervailing – proportion of the export price of the goods

* The calculation of combined dumping and countervailing duties is not simply a matter of adding the dumping and subsidy margins together for any given exporter, or group of exporters. Rather, the combined interim dumping duty and interim countervailing duty imposed in relation to the goods, is the sum of:

- the countervailing duty rate calculated for all countervailable subsidy programs, and
- the dumping duty rate calculated, less an amount for the countervailing duty rate applying to Program 1.

The actual duty liability may be higher than the effective rate of duty due to a number of factors. Affected parties should contact the Anti-Dumping Commission (the Commission) on 13 28 46 or at clientsupport@adcommission.gov.au for further information regarding the actual duty liability calculation in their particular circumstance.

REP 336 has been placed on the public record, available at www.adcommission.gov.au. The public record may also be examined at the Anti-Dumping Commission office by contacting the case manager on the details provided below.

Enquiries about this notice may be directed to the Case Manager on telephone number +61 3 8539 2473, fax number +61 3 8539 2499 or email at Operations1@adcommission.gov.au.

Dated this day of May 2016

KAREN LESLEY ANDREWS

Parliamentary Secretary to the Minister for Industry, Innovation and Science
