Exporter Questionnaire

Product: Zinc coated (galvanised) steel
         Aluminium zinc coated steel

From: The People’s Republic of China, the
       Republic of Korea and Taiwan

Period of Investigation: 1 October 2016 to 30 September 2017

Response due by: 17 December 2017 extended to 1st January 2018

Important note: The timeliness of your response is important. Please refer below for more information.

Investigation case manager: Roman Maevsky

Phone: +61 3 8539 2440

Fax: +61 3 8539 2499

Anti-Dumping Commission
GPO Box 2013
Canberra ACT 2601
Australia
GOODS UNDER CONSIDERATION

The goods subject to anti-dumping measures, in the form of a dumping duty notice and a countervailing duty notice, are:

“flat rolled products of iron and non-alloy steel, of a width less than 600mm and, equal to or greater than 600mm, plated or coated with zinc; and

flat rolled products of alloyed steel, of a width less than 600mm and, equal to or greater than 600mm, plated or coated with zinc exported from:

• China by Angang Steel Co, Ltd or Benxi Iron and Steel (Group) International Economic & Trading Co., or
• Taiwan by Yieh Phui Enterprise Co., Ltd.”

Additional information in relation to the goods
Zinc coated (galvanized) steel is commonly referred to as galvanised steel. The amount of zinc coating on the steel is described as its coating mass and is nominated in grams per meter squared (g/m2) with the prefix being Z (Zinc) or ZF (Zinc converted to a Zinc/Iron alloy coating). Common coating masses used for zinc coating are: Z350, Z275, Z200, Z100, and for zinc/iron alloy coating are: ZF100, ZF80 and ZF30 or equivalents based on international standards and naming conventions.

Product treatment
The applications cover galvanised steel whether or not including any (combination of) surface treatment, for instance; whether passivated or not passivated, (often referred to as chromated or unchromated), oiled or not oiled, skin passed or not skin passed, phosphated or not phosphated (for zinc iron alloy coated steel only).

Excluded goods
Painted galvanised steel, pre-painted galvanised steel, electro-galvanised plate steel and corrugated galvanised steel are not covered by the dumping duty notice.

Tariff classification of the goods
Goods identified as galvanised steel, as per the description above, are classified to the following tariff subheadings in Schedule 3 to the Customs Tariff Act 1995:

• 7210.49.00 statistical code 55, 56, 57 and 58;
• 7212.30.00 statistical code 61;
• 7225.92.00* statistical code 38*; and
• 7225.99.00* statistical code 71*.

*The last two tariff subheadings only apply to the following exporters/suppliers:
• Angang;
• Benxi Iron and Steel (Group) International Economic & Trading Co.; and
• Yieh Phui.

INSTRUCTIONS

Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is responsible for investigating the allegation that zinc coated (galvanized) steel has been exported to Australia from the People’s Republic of China, the Republic of Korea and Taiwan at prices less than their normal value. For the goods exported from the People’s Republic of China, the Commission will also investigate if the manufacturers were in receipt of countervailable subsidies.

The Commission will use the information you provide to determine normal values and export prices over the investigation period. This information will determine whether zinc coated (galvanized) steel is dumped. You may make separate submissions concerning any other matter, for example injury.

The Commission investigation will be carried out under the provisions of the Part XVB of the Customs Act 1901.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem you uncooperative. In that case the Commission may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry). In that case we may assess a dumping margin for your company based upon normal values that may be the highest determined in your country during the investigation period.

It is in your interest, therefore, to provide a complete and accurate submission, capable of verification.

Due date for response

Manufacturers and exporters are requested to respond to this questionnaire and return it to the Commission within the time specified on the cover page.

The Commissioner must consider the direction from the Minister for Industry, Innovation and Science as set out in the Customs (Extensions of Time and Non-cooperation) Direction 2015 (the Direction). This Direction sets out the particular considerations that the Commissioner must take into account when:

- deciding whether a longer period is reasonably required or practicable under subsection 269TC(6) and 269TC(9) of the Customs Act 1901 (the Act), or considering whether to allow any interested party a longer period to give any response;
considering an insufficient response from an interested party;
• determining whether to have regard to a late response;
• determining whether an exporter is an uncooperative exporter;
• determining whether or not an entity is a non-cooperative entity for the purposes of section 269TAACA; and
• determining whether an entity has significantly impeded a case.

Confidential and non-confidential submissions

You are required to lodge one confidential version (for official use only) and one non-confidential version (for public record) of your submission by the due date.

Please ensure that each page of information you provide is clearly marked either “FOR OFFICIAL USE ONLY” or “PUBLIC RECORD”.

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia’s anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party’s understanding of information contained in a document.

As provided for in Australia’s anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the investigation case manager.

Exporter’s declaration

At section I, you are required to make a declaration that the information contained in your submission is complete and correct.
You must return a signed declaration with your response to the questionnaire.

**Verification of the information that you supply**

The Commission will seek to verify the information provided in your submission. Where there are a large number of exporters, the Commission may have to verify information from selected exporters only. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be complete and accurate.

Verification visits take several days. We will want to examine in detail your company’s records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have. We will ask you to prepare a non-confidential copy of the report for the public record.

**If you do not manufacture the goods**

You may export but not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods).

In such cases it is important that you forward a copy of this questionnaire to the relevant manufacturers immediately. You should also inform the investigation case officer of the contact details for these manufacturers.

You should complete those sections of the questionnaire that you are reasonably able to complete. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

**If you do not export the goods**

Depending on the arrangement for sale of the goods to Australia through an intermediary, the Commission will have to determine who is the exporter of the goods for the purpose of this investigation.

In any case, information (such as cost of production data) supplied by the manufacturer will be relevant to establishing the normal value of the goods. In the absence of verified information, the Commission may use other available information. This information may result in a decision less favourable to your company.

**Outline of information required by this questionnaire**

**Section A** General information relating to your company including financial reports.
Section B  A complete list of your company’s exports to Australia over the investigation period.

Section C  A list of goods sold on the domestic market of the country of export (like goods) that may be compared to the goods under consideration (the goods).

Section D  A detailed list of all of your company’s sales of like goods in your domestic market.

Section E  Information to allow a fair comparison between export and domestic prices.

Section F  Information in relation to your company’s exports of like goods to countries other than Australia.

Section G  Costs to make and sell, for exports to Australia and for the domestic market.

Section H  Subsidies.

Section I  Your declaration.

Section J  A checklist.

Appendix 1  A glossary of terms used in this questionnaire

Some general instructions for preparing your response

- When answering the questionnaire please carefully read all instructions. The Commission requires a response to all sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.

- Answer questions in the order presented in the questionnaire. Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.

- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.

- We recommend that you retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.

- Clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

Instructions on providing electronic data

- It is important that information is submitted in electronic format.
- Electronic data should be emailed or submitted on a CD-ROM, in IBM/MS-DOS format, or another operating system whose disk format is compatible with this MS-DOS version.

- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file).

- The Excel files must be compatible to the USA version.

- If you cannot present electronic data in the requested format contact the investigation case officer as soon as possible.

**Further information**

Before you respond to the questionnaire you should read all the documentation enclosed with this application including the applicant's non-confidential submission and the Anti-Dumping Notice notifying the initiation of the investigation. We also advise that you read the attached glossary of terms.

If you require further assistance, or you are having difficulties completing your submission, please contact the investigation case manager. The Commission will need to know the reasons.
SECTION A
COMPANY STRUCTURE AND OPERATIONS

This section requests information relating to company details and financial reports.

A-1 Identity and communication

Please nominate a person within your company who can be contacted for the purposes of this investigation:

**Head Office:**

Name: [Redacted]
Position in the company: Director of Export Sales Department
Address: No. 322 South Zhonghua Rd, Anshan, Liaoning, China
Telephone: [Redacted]
Facsimile number: [Redacted]
E-mail address of contact person: [Redacted]

**Factory:**

Address: No. 322 South Zhonghua Rd, Anshan, Liaoning, China
Telephone: [Redacted]
Facsimile number: [Redacted]
E-mail address of contact person: [Redacted]

A-2 Representative of the company for the purpose of investigation

If you wish to appoint a representative to assist you in this investigation, provide the following details:

Name: Mr. HU, Fumao (Marco HU)
Address: Dentons China, LLP, 7/F, Building D, Parkview Green FangCaoDi, No.9, Dongdaqiao Road, Chaoyang District, 100020, Beijing, China
Telephone: +86 13520237767
Facsimile/Telex number: +86 (10) 5813 7788
E-mail address of contact person: fumao.hu@dentons.cn

*Note that in nominating a representative, the Commission will assume that confidential material relating to your company in this investigation may be freely released to, or discussed with, that representative.*

[Special Attention]
In order to be fully cooperative in this review, this response to this questionnaire has been prepared on behalf of Angang Steel Company Limited (“ANSTEEL”) and all related entities involved. Prior to the full response, ANSTEEL would like to provide a brief introduction about the interrelated functions of the various companies in connection with the goods under consideration (“GUC”), and their respective roles in the daily operation of production domestic sales and export sales to Australia:

[CONFIDENTIAL, description of ANSTEEL’s marketing policy and financial system]

A-3 Company information

1. What is the legal name of your business? What kind of entity is it (eg. company, partnership, sole trader)? Please provide details of any other business names that you use to export and/or sell goods.

Response:

The legal name of our company is Angang Steel Company Limited (“ANSTEEL”). It is joint-stock limited company, listed in Hong Kong Stock Exchange and Shenzhen Stock Exchange. There are no any other business names used to export and/or sell goods.

2. Who are the owners and/or principal shareholders? Provide details of shareholding percentages for joint owners and/or principal shareholders. (List all shareholders able to cast, or control the casting of, 5% or more of the maximum amount of votes that could be cast at a general meeting of your company).

Response:

The shareholders of ANSTEEL are:

(1) Anshan Iron And Steel Group Co., Ltd, 67.29%;
(2) Hong Kong Securities Clearing Company (Nominees) Limited (“HKSCC”), 14.86%; and
(3) Other public investors in the security market, 17.85%.
As we stated above, ANSTEEL is a listed company and its shareholding structure is changing due to the trade in the security market. Thus, we provide the above shareholding structure at the end of POR.

3. If your company is a subsidiary of another company, list the principal shareholders of that company.

Response:

The shareholder of Anshan Iron And Steel Group Co., Ltd. is [CONFIDENTIAL, parent company’s shareholders and shareholding].

4. If your parent company is a subsidiary of another company, list the principal shareholders of that company.

Response:

The principal shareholder of [CONFIDENTIAL, ultimate controller of Anshan Iron And Steel Group Co., Ltd. and shareholding].

5. Provide a diagram showing all associated or affiliated companies and your company’s place within that corporate structure.

Response:

Please refer to [CONFIDENTIAL Exhibit A-3.5: External affiliation structure].

6. Are any management fees/corporate allocations charged to your company by your parent or related company?

Response:

No management fees/corporate allocations charged to my business by parent or related companies.

7. Describe the nature of your company’s business. Explain whether you are a producer or manufacturer, distributor, trading company, etc.

Response:

ANSTEEL is a producer of GUC, and also sells the goods in the domestic market and export to foreign markets via its affiliated trading company, namely Angang HK.

8. If your business does not perform all of the following functions in relation to the goods under consideration, then please provide names and addresses of the companies which perform each function:
- produce or manufacture
- sell in the domestic market
- export to Australia, and
- export to countries other than Australia.

Response:

Please refer to the answer to question 7 as above.

9. Provide your company’s internal organisation chart. Describe the functions performed by each group within the organisation.

Response:

Please refer to Exhibit A-3.9: Internal organization chart.

10. Provide a copy of your most recent annual report together with any relevant brochures or pamphlets on your business activities.

Response:

Please refer to Exhibit A-3.10: Brochure. Regarding the most recent annual report, please to Exhibit A-4.3.1.

**A-4 General accounting/administration information**

1. Indicate your accounting period.

Response:

The accounting period is from January 1 to December 31.

2. Indicate the address where the company’s financial records are held.

Response:

The financial records of ANSTEEL are held at the company’s address.

3. Please provide the following financial documents for the two most recently completed financial years plus all subsequent monthly, quarterly or half yearly statements:
   - chart of accounts;
   - audited consolidated and unconsolidated financial statements (including all footnotes and the auditor’s opinion);
   - internal financial statements, income statements (profit and loss reports), or management accounts, that are prepared and maintained in the normal course of business for the goods under consideration.

   These documents should relate to:
   - the division or section/s of your business responsible for the production and sale of the goods under consideration, and
- the company.

Response:

Please refer to Exhibit A-4.3.1: Annual report 2015-2016 & financial statements 2017.9 and Exhibit A-4.3.2: Chart of accounts.

4. If you are not required to have the accounts audited, provide the unaudited financial statements for the two most recently completed financial years, together with your taxation returns. Any subsequent monthly, quarterly or half yearly statements should also be provided.

Response:

Not applicable. The audited accounts are provided as requested.

5. Do your accounting practices differ in any way from the generally accepted accounting principles in your country? If so, provide details.

Response:

There’s no difference between the accounting practices of ANSTEEL and the generally accepted accounting principles in China.

6. Describe:

The significant accounting policies that govern your system of accounting, in particular:

- the method of valuation for raw material, work-in-process, and finished goods inventories (eg last in first out –LIFO, first in first out- FIFO, weighted average);

- costing methods, including the method (eg by tonnes, units, revenue, direct costs etc) of allocating costs shared with other goods or processes (such as front office cost, infrastructure cost etc);

- valuation methods for damaged or sub-standard goods generated at the various stages of production;

- valuation methods for scrap, by products, or joint products;

- valuation and revaluation methods for fixed assets;

- average useful life for each class of production equipment and depreciation method and rate used for each;

- treatment of foreign exchange gains and losses arising from transactions;

- treatment of foreign exchange gains/losses arising from the translation of balance sheet items;
- inclusion of general expenses and/or interest;
- provisions for bad or doubtful debts;
- expenses for idle equipment and/or plant shut-downs;
- costs of plant closure;
- restructuring costs;
- by-products and scrap materials resulting from your company’s production process; and
- effects of inflation on financial statement information.

Response:

Please refer to the accounting policy in the annual report as provided in Exhibit A-4.3.1 above.

7. In the event that any of the accounting methods used by your company have changed over the last two years provide an explanation of the changes, the date of change, and the reasons for it.

Response:

There have been no material changes to accounting policies in the last 2 years.

A-5 Income statement

Please fill in the following table. It requires information concerning all products produced and for the goods under consideration (‘Goods under consideration’ (the goods) is defined in the Glossary of Terms in the appendix to this form). You should explain how costs have been allocated.

<table>
<thead>
<tr>
<th>Most recent completed financial year (specify)</th>

<td></td>
</tr>
</tbody>
</table>

Note: if your financial information does not permit you to present information in accordance with this table please present the information in a form that closely matches the table.

Prepare this information on a spreadsheet named "Income statement".

This information will be used to verify the completeness of cost data that you provide in Section G. If, because of your company’s structure, the allocations would not be helpful in this process, please explain why this is the case.

Response:

Please refer to [CONFIDENTIAL Exhibit A-5: Income statement].
A-6 Sales

State your company's net turnover (after returns and all discounts), and free of duties and taxes. Use the currency in which your accounts are kept, in the following format:

<table>
<thead>
<tr>
<th>Most recent completed financial year (specify)</th>
<th>Investigation period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Volume</td>
<td>Value</td>
</tr>
<tr>

</tr>
<tr>
<td>Exports to Other Countries</td>
<td></td>
</tr>
</tbody>
</table>

Prepare this information in a spreadsheet named "TURNOVER".

This information will be used to verify the cost allocations to the goods under consideration in Section G.

Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.

Response:

Please refer to [CONFIDENTIAL Exhibit A-6: Turnover].
SECTION B
SALES TO AUSTRALIA (EXPORT PRICE)

This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory. Export prices are usually assessed at FOB point, but the Commission may also compare prices at the ex-factory level.

You should report prices of all goods under consideration (the goods) shipped to Australia during the investigation period.

The invoice date will normally be taken to be the date of sale. If you consider:

- the sale date is not the invoice date (see ‘date of sale’ column in question B4 below) and;

you must provide information in section D on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.

B-1 For each customer in Australia to whom you shipped goods in the investigation period list:

- name;
- address;
- contact name and phone/fax number where known; and
- trade level (for example: distributor, wholesaler, retailer, end user, original equipment).

Response:

Please refer to [CONFIDENTIAL B-4: Australian sales].

B-2 For each customer identified in B1 please provide the following information.

(a) Describe how the goods are sent to each customer in Australia, including a diagram if required.

(b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

(c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of DDP sales, explain who retains ownership when the goods enter Australia.

(d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).
(e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.

(f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (e.g., free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).

(g) Details of the forward orders of the goods under consideration (include quantities, values and scheduled shipping dates).

Response:

Please refer to [CONFIDENTIAL Exhibit B-2: Flowchart of transactions].

B-3 Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

Response:

[CONFIDENTIAL, description of exports sales channel]

B-4 Prepare a spreadsheet named “Australian sales” listing all shipments (i.e., transaction by transaction) to Australia of the goods under consideration in the investigation period. You must provide this list in electronic format. Include the following export related information:

<table>
<thead>
<tr>
<th>Column heading</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customer name</td>
<td>names of your customers</td>
</tr>
<tr>
<td>Level of trade</td>
<td>the level of trade of your customers in Australia</td>
</tr>
<tr>
<td>Model/grade/type</td>
<td>commercial model/grade or type</td>
</tr>
<tr>
<td>Product code</td>
<td>code used in your records for the model/grade/type identified. Explain</td>
</tr>
<tr>
<td></td>
<td>the product codes in your submission.</td>
</tr>
<tr>
<td>Invoice number</td>
<td>invoice number</td>
</tr>
<tr>
<td>Invoice date</td>
<td>invoice date</td>
</tr>

</tr>
</tbody>
</table>

** FOB export price and Ocean Freight:**

**FOB export price:** An FOB export price must be calculated for each shipment - regardless of the shipping terms. FOB price includes inland transportation to the port of exportation, inland insurance, handling, and loading charges. It excludes post exportation expenses such as ocean freight and insurance. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.

**Ocean freight:** as ocean freight is a significant cost it is important that the actual amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis - estimates must reflect changes in freight rates over the investigation period. Freight allocations must be checked for consistency.

* All of these costs are further explained in section E-1.

Response:

Please refer to [CONFIDENTIAL Exhibit B-4: Australian sales].
B-5 If there are any other costs, charges or expenses incurred in respect of the exports listed above which have not been identified in the table above, add a column (see “other factors” in question B-4) for each item, and provide a description of each item. For example, other selling expenses (direct or indirect) incurred in relation to the export sales to Australia.

Response:

All costs, charges or expenses incurred in respect of the exports are reported in [CONFIDENTIAL Exhibit B-4: Australian sales].

B-6 For each type of discount, rebate, allowance offered on export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met by the importer to obtain the discount.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amount shown in your response to question B4. If they vary by customer or level provide an explanation.

Response:

Not applicable, there is no discount, rebate or allowance offered on export sales to Australia.

B-7 If you have issued credit notes (directly or indirectly) to the customers in Australia, in relation to the invoices listed in the detailed transaction by transaction listing in response to question B4, provide details of each credit note if the credited amount has not been reported as a discount or rebate.

Response:

Not applicable, ANSTEEL has not issued any credit notes to the customers in Australia in relation to the invoices listed in the detailed transaction-by-transaction listing in response to question B-4.

B-8 If the delivery terms make you responsible for arrival of the goods at an agreed point within Australia (eg. delivered duty paid), insert additional columns in the spreadsheet for all other costs incurred. For example:

<table>
<thead>
<tr>
<th>Description</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Import duties</td>
<td>Amount of import duty paid in Australia</td>
</tr>
<tr>
<td>Inland transport</td>
<td>Amount of inland transportation expenses within Australia included in the selling price</td>
</tr>
<tr>
<td>Other costs</td>
<td>Customs brokers, port and other costs incurred (itemise)</td>
</tr>
</tbody>
</table>

Response:

Not applicable, for all Australian sales of ANSTEEL, the delivery term is FOB, which means ANSTEEL does not undertake any other costs mentioned in this question.
Select two shipments, in different quarters of the investigation period, and provide a complete set of all of the documentation related to the export sale. For example:

- the importer’s purchase order, order confirmation, and contract of sale;
- commercial invoice;
- bill of lading, export permit;
- freight invoices in relation to movement of the goods from factory to Australia, including inland freight contract;
- marine insurance expenses; and
- letter of credit, and bank documentation, proving payment.

The Commission will select additional shipments for payment verification at the time of the visit.

Response:

Please refer to [CONFIDENTIAL Exhibit B-9: Export sales documents].
SECTION C
EXPORTED GOODS & LIKE GOODS

C-1  Fully describe all of the goods you have exported to Australia during the investigation period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

Response:

C-2  List each type of goods exported to Australia (these types should cover all types listed in spreadsheet “Australian sales” – see section B of this questionnaire).

Response:

As we stated in C-1, we reported SAP code in Australian Sales.

C-3  If you sell like goods on the domestic market, for each type that your company has exported to Australia during the investigation period, list the most comparable model(s) sold domestically;

Response:

We claim that goods with the same SAP code are recognized as the like goods.

- and provide a detailed explanation of the differences where those goods sold domestically (ie. the like goods – see explanation in glossary) are not identical to goods exported to Australia.

Response:

We claim that goods with the same SAP code are deemed as identical.

<table>
<thead>
<tr>
<th>EXPORTED TYPE</th>
<th>DOMESTIC TYPE</th>
<th>IDENTICAL?</th>
<th>DIFFERENCES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Product code of each model of the goods exported to Australia</td>
<td>Product code of comparable model sold on the domestic market of the country of export</td>
<td>If goods are identical indicate “YES”. Otherwise “NO”</td>
<td>Where the good exported to Australia is not identical to the like goods, describe the specification differences. If it is impractical to detail specification differences in this table refer to documents which outline differences</td>
</tr>
</tbody>
</table>
Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

Response:

Please refer to [CONFIDENTIAL Exhibit C-1].
SECTION D
DOMESTIC SALES

This section seeks information about the sales arrangements and prices in the domestic market of the country of export.

All domestic sales made during the investigation period must be listed transaction by transaction. If there is an extraordinarily large volume of sales data and you are unable to provide the complete listing electronically you must contact the case officer before completing the questionnaire. If the case officer agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets the Commission requirements. If agreement cannot be reached as to the appropriate method the Commission may not visit your company.

The Commission will normally take the invoice date as being the date of sale in order to determine which sales fall within the investigation period.

If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices –

you must provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.

If you do not have any domestic sales of like goods you must contact the case officer who will explain the information the Commission requires for determining a normal value using alternative methods.

D-1 Provide:

- a detailed description of your distribution channels to domestic customers, including a diagram if appropriate;

Response:

[CONFIDENTIAL, description of distribution channel in the domestic sales]

- information concerning the functions/activities performed by each party in the distribution chain; and

Response:

[CONFIDENTIAL, description of distribution channel in the domestic sales]
- a copy of any agency or distributor agreements, or contracts entered into.

Response:

- [CONFIDENTIAL, description of distribution channel in the domestic sales]

- If any of the customers listed are associated with your business, provide details of that association. Describe the effect, if any, that association has upon the price.

Response:

- [CONFIDENTIAL, description of distribution channel in the domestic sales]

**D-2**

Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

Response:

- [CONFIDENTIAL, description of domestic selling price arrangement].

**D-3**

Explain in detail the sales process, including:

- the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
- whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

Response:

- [CONFIDENTIAL, description of pricing policy].

**D-4**

Prepare a spread sheet named “domestic sales” listing all sales of like goods made during the investigation period. The listing must be provided on a CD-ROM. Include all of the following information.

<table>
<thead>
<tr>
<th>Column heading</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customer name</td>
<td>names of your customers. If an English version of the name is not easily</td>
</tr>
</tbody>
</table>
produced from your automated systems show a customer code number and in a separate table list each code and name.

<table>
<thead>
<tr>
<th>Level of trade</th>
<th>the level of trade of your domestic customer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Model/grade/type</td>
<td>commercial model/grade or type of the goods</td>
</tr>
<tr>
<td>Product code</td>
<td>code used in your records for the model/grade/type of the goods identified. Explain the product codes in your submission.</td>
</tr>
<tr>
<td>Invoice number</td>
<td>invoice number</td>
</tr>
<tr>
<td>Invoice date</td>
<td>invoice date</td>
</tr>
<tr>
<td>Date of sale</td>
<td>refer to the explanation at the beginning of this section. If you consider that a date other than the invoice date best establishes the material terms of sale and should be used, report that date. For example, order confirmation, contract, or purchase order date.</td>
</tr>
<tr>
<td>Quarter</td>
<td>The quarter that the date of sale occurred</td>
</tr>
<tr>
<td>Order number</td>
<td>show order confirmation, contract or purchase order number if you have shown a date other than invoice date as being the date of sale.</td>
</tr>
<tr>
<td>Delivery terms</td>
<td>eg ex factory, free on truck, delivered into store</td>
</tr>
<tr>
<td>Payment terms</td>
<td>payment terms agreed with the customer eg. 60 days=60 etc</td>
</tr>
<tr>
<td>Quantity</td>
<td>quantity in units shown on the invoice eg kg.</td>
</tr>
<tr>
<td>Gross Invoice value</td>
<td>gross value shown on invoice in the currency of sale, net of taxes.</td>
</tr>
<tr>
<td>Discounts on the Invoice</td>
<td>the amount of any discount deducted on the invoice on each transaction. If a % discount applies show that % discount applying in another column.</td>
</tr>
<tr>
<td>Other charges</td>
<td>any other charges, or price reductions, that affect the net invoice value. Insert additional columns and provide description.</td>
</tr>
<tr>
<td>Net invoice value in the currency of the exporting country</td>
<td>the net invoice value expressed in your domestic currency as recorded in your accounting system</td>
</tr>
<tr>
<td>Rebates or other Allowances</td>
<td>the actual amount of any deferred rebates or allowances in the currency of sale</td>
</tr>
<tr>
<td>Quantity discounts</td>
<td>the actual amount of quantity discounts not deducted from the invoice. Show a separate column for each type of quantity discount.</td>
</tr>
<tr>
<td>Packing*</td>
<td>packing expenses</td>
</tr>
<tr>
<td>Inland transportation Costs*</td>
<td>amount of inland transportation costs included in the selling price.</td>
</tr>
<tr>
<td>Handling, loading And ancillary Expenses*</td>
<td>handling, loading &amp; ancillary expenses.</td>
</tr>
<tr>
<td>Warranty &amp; Guarantee expenses*</td>
<td>warranty &amp; guarantee expenses</td>
</tr>
<tr>
<td>Technical assistance &amp; other services*</td>
<td>expenses for after sale services such as technical assistance or installation costs.</td>
</tr>
<tr>
<td>Commissions*</td>
<td>commissions paid. If more than one type is paid insert additional columns of data.</td>
</tr>
<tr>
<td>Other factors*</td>
<td>any other costs, charges or expenses incurred in relation to the domestic sales (include additional columns as required). See question D5.</td>
</tr>
</tbody>
</table>

Costs marked with * are explained in section E-2.

Response:

Please refer to [CONFIDENTIAL, Exhibit D-4: Domestic sales].

D-5 If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see “other factors”). For example, certain other selling expenses incurred.
Response:

All of any other costs, charges or expenses incurred in relation to the domestic sales have been identified in the above Exhibit D-4.

D-6  For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:

- provide a description; and
- explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has not been reported as a discount or rebate.

Response:

There is no discount, rebate, allowance offered in domestic sales. No credit notes were issued directly or indirectly to the customers.

D-7  Select two domestic sales, in different quarters of the investigation period, that are at the same level of trade as the export sales. Provide a complete set of documentation for those two sales. (Include, for example, purchase order, order acceptance, commercial invoice, discounts or rebates applicable, credit/debit notes, long or short term contract of sale, inland freight contract, bank documentation showing proof of payment.)

The Commission will select additional sales for verification at the time of our visit.

Response:

Please refer to [CONFIDENTIAL, Exhibit D-7: Domestic sales documents].
SECTION E
FAIR COMPARISON

Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (i.e., the normal value).

Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.

As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.

To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. The Commission must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.

Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence the Commission may disallow the adjustment.

Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.

A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.

The investigation must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. The Commission will not consider new claims made after the verification visit.
E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, ‘Australian sales’)

1. Transportation
Explain how you have quantified the amount of inland transportation associated with the export sale (‘Inland transportation costs’). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

Response:

Inland transportation costs and port charges occurred are reported in Australian sales. Such expense is recorded in the general ledger account “selling expenses”.

2. Handling, loading and ancillary expenses
List all charges that are included in the export price and explain how they have been quantified (‘Handling, loading & ancillary expenses’). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes;
- document fees and customs brokers fees;
- clearance fees;
- bank charges, letter of credit fees
- other ancillary charges.

Response:

Handling, loading and ancillary expenses, if any, are reported in Australian sales.

3. Credit
The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the investigation period. Explain the nature of the interest rates most applicable to these export sales eg, short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.
Response:

Not applicable.

4. **Packing costs**
   List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed ‘Packing’.

Response:

No difference on packing is claimed for adjustment.

5. **Commissions**
   For any commissions paid in relation to the export sales to Australia:
   - provide a description; and
   - explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed “Commissions”. Identify the general ledger account where the expense is located.

Response:

[CONFIDENTIAL, description of distribution channel for exports sales]

6. **Warranties, guarantees, and after sales services**
   List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“Warranty & guarantee expenses” and “Technical assistance & other services”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

Response:

No expenses of warranties, guarantees, and after sales services are paid to any third parties for all the transactions of the company.

7. **Other factors**
   There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “Other factors”. For example, other variable or fixed selling expenses, including salesmen’s salaries, salesmen’s travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.
Response:

No other factors that affect the price comparability exist and require an adjustment.

8. Currency conversions

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a ‘sustained’ movement during the period of investigation (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect ‘sustained’ movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the investigation period.

Response:

No such claim has been made by ANSTEEL.

E-2 Costs associated with domestic sales

(These cost adjustments will relate to your responses made at question D-4, “domestic sales”)

The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.

1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (S G & A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

Response:

No significant differences exist in the physical characteristics and manufacturing cost for those domestic and export goods.

2. Import charges and indirect taxes

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;
the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon exportation and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold domestically but is not borne by the exports to Australia;

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: “Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs”

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

Response:

No such import charges and indirect taxes claimed by the company.

3. Level of trade

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.
Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

(a) **costs arising from different functions:** the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

(b) **level discount:** the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter’s domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

Response:

No difference on the level of trade is claimed for adjustment.
4.  Credit
The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:
- the rate, or average of rates, applying on actual short term borrowing’s by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the investigation period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system\(^1\), the average credit period may be determined as follows:

1.  **Calculate an accounts receivable turnover ratio**

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:
- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

**Response:**

**Not applicable. No credit is granted to the customers.**

\(^1\) Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.
2. Calculate the average credit period

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

Response:

No difference on the credit cost is claimed for adjustment.

The following items are identified in the amounts quantified at question D-4:

5. Transportation

Explain how you have quantified the amount of inland transportation associated with the domestic sales (“Inland transportation Costs”). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

Response:

Inland transportation costs occurred is reported in Australian sales. Such expense is recorded in the general ledger account “selling expenses”.

6. Handling, loading and ancillary expenses

List all charges that are included in the domestic price and explain how they have been quantified (“Handling, loading and ancillary Expenses”). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

Response:

Handling, loading and ancillary expenses, if occurred, are reported in Domestic sales.

7. Packing

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed “Packing”.

Response:

No difference on packing is claimed for adjustment.

8. Commissions

For any commissions paid in relation to the domestic sales:

- provide a description
explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed “Commissions”. Identify the general ledger account where the expense is located.

Response:

No commission is paid in relation to the domestic sales.

9. Warranties, guarantees, and after sales services
List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“Warranty & Guarantee expenses” and “Technical assistance & other services”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

Response:

No expenses of warranties, guarantees, and after sales services are paid to any third parties for all the transactions of the company.

10. Other factors
There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “Other factors”. List the factors and show how each has been quantified in per unit terms. For example:

- **inventory carrying cost**: describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;

- **warehousing expense**: an expense incurred at the distribution point;

- **royalty and patent fees**: describe each payment as a result of production or sale, including the key terms of the agreement;

- **advertising**; and

- **bad debt**.

Response:

No other factors that affect the price comparability exist and require an adjustment.

E-3 Duplication

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson’s salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.
An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

Response:

No such duplication exists in all the items of adjustment.
SECTION F
EXPORT SALES TO COUNTRIES OTHER THAN AUSTRALIA (THIRD COUNTRY SALES)

Your response to this part of the questionnaire may be used by the Commission to select sales to a third country that may be suitable for comparison with exports to Australia.

Sales to third countries may be used as the basis for normal value in certain circumstances. The Commission may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.

F-1 Using the column names and column descriptions below provide a summary of your export sales to countries other than Australia.

<table>
<thead>
<tr>
<th>Column heading</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Country</td>
<td>Name of the country that you exported like goods to over the investigation period.</td>
</tr>
<tr>
<td>Number of customers</td>
<td>The number of different customers that your company has sold like goods to in the third country over the investigation period.</td>
</tr>
<tr>
<td>Level of trade</td>
<td>The level of trade that you export like goods to in the third country.</td>
</tr>
<tr>
<td>Quantity</td>
<td>Indicate quantity, in units, exported to the third country over the investigation period.</td>
</tr>
<tr>
<td>Unit of quantity</td>
<td>Show unit of quantity eg kg</td>
</tr>
<tr>
<td>Value of sales</td>
<td>Show net sales value to all customers in third country over the investigation period</td>
</tr>
<tr>
<td>Currency</td>
<td>Currency in which you have expressed data in column SALES</td>
</tr>
<tr>
<td>Payment terms</td>
<td>Typical payment terms with customer(s) in the country eg. 60 days=60 etc.</td>
</tr>
<tr>
<td>Shipment terms</td>
<td>Typical shipment terms to customers in the third country eg CIF, FOB, ex-factory, DDP etc.</td>
</tr>
</tbody>
</table>

Supply this information in spreadsheet file named “Third country”

Response:

Please refer to [CONFIDENTIAL, Exhibit F-1: Third country sales].

F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.

Response:

There are no differences in sales to third countries that may affect the comparison to sales to Australia.
SECTION G
COSTING INFORMATION AND CONSTRUCTED VALUE

The information that you supply in response to this section of the questionnaire will be used for various purposes including:

– testing the profitability of sales of like goods on the domestic market;
– determining a constructed normal value of the goods under consideration (the goods) - ie of the goods exported to Australia; and
– making certain adjustments to the normal value.

You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (eg. non-operating expenses not included elsewhere) associated with the goods.

In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.

If, in response to question B4 (Sales to Australia, Export Price) you:

• reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and
• provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)

you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the investigation period.

At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.

G-1. Production process and capacity

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

G-2. Provide information about your company's total production in the following table:

<table>
<thead>
<tr>
<th>PREVIOUS FINANCIAL YEAR</th>
<th>MOST RECENT FINANCIAL YEAR</th>
<th>Investigation Period</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
A – Production capacity (eg kg, tonnes)*

B – Actual production in volume (eg kg, tonnes)

C – Capacity utilisation (%) (B/A x 100)

* rather than showing a ‘name-plate’ optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

Provide this information on a spreadsheet named “Production”.

Response:

Please refer to [CONFIDENTIAL Exhibit G-2: Production].

G-3. Cost accounting practices

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

Response:

The management accounting system and cost accounting of ANSTEEL is the same. In addition, ANSTEEL adopts actual cost system, which is in accordance with the generally accepted accounting principles in China, and the audited financial statements can be worked out directly based on the cost accounting information.

2. Is your company’s cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (ie differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

Response:

ANSTEEL does not use standard cost accounting system.

3. Provide details of any significant or unusual cost variances that occurred during the investigation period.

Response:

Not applicable, ANSTEEL does not use standard cost accounting system.

4. Describe the profit/cost centres in your company’s cost accounting system.

Response:

We regard the entire factory as one profit/cost center in our business cost accounting system.
5 For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

Response:

[CONFIDENTIAL, description of accounting method].

6 Describe the level of product specificity (models, grades etc) that your company’s cost accounting system records production costs.

Response:

[CONFIDENTIAL, description of accounting method].

7 List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

Response:

There are no production costs incurred by the company that are valued differently for cost accounting purposes than for financial accounting purposes.

8 State whether your company engaged in any start-up operations in relation to the goods under consideration. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

Response:

The company doesn’t engage in any start-up operations in relation to the goods under consideration.

9 State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation it its accounting records.

Response:

Please refer to the answer to the previous question.

G-4 Cost to make and sell on domestic market
This information is relevant to testing whether domestic sales are in the ordinary course of trade.²

1 Prepare this information in a spreadsheet named "Domestic CTMS".

<table>
<thead>
<tr>

</tbody>
</table>

¹ Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.

² Relating to costs of production only; identify each cost separately.

³ Identify each cost separately. Please ensure non-operating expenses that relate to the goods under consideration are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

Provide this information for each quarter (or month if your company calculates costs on a monthly basis) and over the period of the investigation.

If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.

² The Commission applies the tests set out in s.269TAAD of the Customs Act 1901 to determine whether goods are in ordinary course of trade. These provisions reflect the WTO anti-dumping agreement – see Article 2.2.1.
Please specify unit of currency.

Response:

Please refer to [CONFIDENTIAL, Exhibit G-4: Domestic CTMS].

In the original investigation, the ADC requested us to provide the cost raw data, which is directly exported from the accounting system, rather than any data to fit the requested format. The final dumping duty is also based on such raw data. In order to keep consistency, we submit the cost raw data directly exported from the cost accounting system. Further, for your convenience in the on-site verification and dumping margin calculation, we also provide a summary of unit CTM as per product type. “SAP Product code” is the connection between domestic sales and the CTMS for normal value calculation purpose.

2 Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

Response:

Please refer to [CONFIDENTIAL, Exhibit G-4: Domestic CTMS].

**G-5 Cost to make and sell goods under consideration (goods exported to Australia)**

The information is relevant to calculating the normal values based on costs. It is also relevant to calculating certain adjustments to the normal value.

1 Prepare this information in a spreadsheet named "Australian CTMS".

<table>
<thead>
<tr>
<th>Model/Type exported to Australia – from spreadsheet LIKEGOOD</th>

Provide this information for each quarter (or month if your company calculates costs on a monthly basis) and over the period of the investigation.

If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

Response:

2 Where there are cost differences between goods sold to the domestic market and those sold for export, give reasons and supporting evidence for these differences.

   Response:

   Not applicable, there is no cost differences between goods sold to the domestic market and those sold for export. ANSTEEL produces goods for export and domestic sale in the same production facility and records costs on actual basis by using product codes.

3 Give details and an explanation of any significant differences between the costs shown, and the costs as normally determined in accordance with your general accounting system. Reference should be made to any differences arising from movements in inventory levels and variances arising under standard costing methods.

   Response:

   Not applicable. Since ANSTEEL only records the costs on actual basis, there is no significant difference between the costs shown and the costs as normally determined in accordance with ANSTEEL’s accounting system.

1 Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.

2 Relating to costs of production only; identify each cost separately.

3 Identify each cost separately. Please ensure non-operating expenses that relate to the goods are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.
4 In calculating the unit cost to make and sell, provide an explanation if the allocation method used (eg number, or weight etc) to determine the unit cost differs from the prior practice of your company.

Response:

Not applicable, there is no difference between the allocation methods used to determine the unit cost differs from the prior practice of ANSTEEL.

G-6 Major raw material costs

List major raw material costs, which individually account for 10% or more of the total production cost.

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (eg market prices, transfer prices, or actual cost of production).

Where the major input is produced by an associate of your company the Commission will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at ‘spot prices’ or under long term contracts etc).

The term associate is defined in section 269TAA of the Customs Act. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.

Response:

Please refer to [CONFIDENTIAL, Exhibit G-6: Raw material purchase].

G-7 Cost to make and sell goods under consideration (goods exported to third countries)

The information is relevant to calculating the normal values based on costs. It is also relevant to calculating certain adjustments to the normal value.
Prepare this information in a spreadsheet named “THIRD COUNTRY CTMS”.

<table>
<thead>
<tr>

</tbody>
</table>

¹ Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.
² Relating to costs of production only; identify each cost separately.
³ Identify each cost separately. Please ensure non-operating expenses that relate to the goods are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

Provide this information for each quarter (or month if your company calculates costs on a monthly basis) and over the period of the investigation.

If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

Response:

Please refer to Exhibit G-4.
2 Where there are cost differences between goods sold to the domestic market and those sold for export, give reasons and supporting evidence for these differences.

Response:

Not applicable, there is no cost differences between goods sold to the domestic market and those sold for export. ANSTEEL produces goods for export and domestic sale in the same production facility and records costs on actual basis by using product codes.

3 Give details and an explanation of any significant differences between the costs shown, and the costs as normally determined in accordance with your general accounting system. Reference should be made to any differences arising from movements in inventory levels and variances arising under standard costing methods.

Response:

Not applicable, since ANSTEEL only records the costs on actual basis, there is no significant difference between the costs shown, and the costs as normally determined in accordance with ANSTEEL'S general accounting system.

4 In calculating the unit cost to make and sell, provide an explanation if the allocation method used (eg number, or weight etc) to determine the unit cost differs from the prior practice of your company.

Response:

Not applicable, because the allocation method used (eg number, or weight etc) to determine the unit cost doesn’t not differ from the prior practice of ANSTEEL’s company.
SECTION H - SUBSIDIES

Response:

Since ANSTEEL’s countervailing duty is zero in the original investigation against GUC, this Section is not applicable to ANSTEEL.

The countervailing duty notice applying to aluminium zinc coated steel and zinc coated (galvanised) steel covers subsidies under the following subsidy programs:

<table>
<thead>

**H-1 Preferential income tax programs (Programs 4-10, 34)**

Please complete questions 1 to 6 below and fill the “Income Tax Programs” and “Income Tax” spreadsheets in the “Exporter Questionnaire – Attachment” Excel workbook.

1. Did your business or any company/entity related to your business receive any benefit\(^3\) under the following income tax programs during the review period (1 October 2016 to 30 September 2017):

   **Program 4:** Preferential Tax Policies for Enterprises with Foreign Investment Established in the Coastal Economic Open Areas and in Economic and Technological Development Zones

   **Program 5:** Preferential Tax Policies for Foreign Invested Enterprises - Reduced Tax Rate for Productive Foreign Invested Enterprises scheduled to operate for a period not less than 10 years

   **Program 6:** Preferential Tax Policies for Enterprises with Foreign Investment Established in Special Economic Zones (excluding Shanghai Pudong area)

   **Program 7:** Preferential Tax Policies for Enterprises with Foreign Investment Established in Pudong area of Shanghai

   **Program 8:** Preferential Tax Policies in the Western Regions

   **Program 9:** Land Use Tax Deduction

   **Program 10:** Preferential Tax Policies for High and New Technology Enterprises

---

\(^3\) Refer to the Glossary of Terms for a definition of benefit in this context.
Program 34: VAT refund on domestic sales by local tax authority

2. For each program that you have identified above as conferring a benefit on your entity, answer the following.

   i. Provide complete details of the amount of the benefit received, including whether it was received in total or in instalments.

   ii. Indicate which goods you produced that benefited from the program (e.g. the program may have benefited all production or only certain products that have undergone research and development).

   iii. Describe the application and approval procedures for obtaining a benefit under the program.

   iv. Where applicable, provide copies of the application form or other documentation used to apply for the program, all attachments and all contractual agreements entered into between your business and the Government of China (GOC) in relation to the program.

   v. Outline the fees charged to or expenses incurred by your business in receiving the program.

   vi. Outline the eligibility criteria your business had to meet in order to receive benefits under this program.

   vii. State whether your eligibility for the program was conditional on one or more of the following criteria:

       a) whether or not your business exports or has increased its exports;
       b) the use of domestic rather than imported inputs;
       c) the industry to which your business belongs; or
       d) the region in which your business is located.

   viii. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

   ix. What records does your business keep regarding each of the benefits received under this program? Provide copies of any records kept in relation to the program.

   x. Indicate where benefits under this program can be found in your accounting system (i.e. specify the ledgers or journals) and financial statements.
xi. To your knowledge, does the program still operate or has it been terminated?

If the program has been terminated, please provide details (including when and why). When is the last date that your business could apply for or claim benefits under the program? When is the last date that your business could receive benefits under the program?

If the program terminated has been substituted for by another program, identify the program and answer all the questions in Part H-5 in relation to this program.

3. It is our understanding that the current general tax rate for enterprises in China is 25%. Confirm whether this is correct and if not, please identify the general tax rate for enterprises in China from 1 October 2016, indicating any changes in the taxation rate over the period 1 October 2016 to 30 September 2017.

4. If your business currently pays corporate income tax at a rate less than 25% (or whatever the rate of general tax is as discussed above), or paid at a rate less than that during the investigation period, please indicate whether the reduced rate relates to any of the preferential income tax programs identified in question 1 above.

5. If the income tax rate of less than the general rate does not relate to any of the programs identified above, please provide an explanation for the reduced income tax rate and answer the questions at 2 above in relation to the income tax rate reduction.

6. For each taxation year from 2012 to 2016, complete the “Income Tax” tab in the “Exporter Questionnaire – Attachment” Excel workbook.

Provide a copy (bearing the official stamp of the appropriate level of the GOC) of all:

- corporate income tax acknowledgement form(s) and the income tax return(s) that your company filed for the 2012, 2013, 2014, 2015 and 2016 tax years; and

- income tax instalment payment receipts, and all applicable income tax forms and schedules, for the 2012, 2013, 2014, 2015 and 2016 tax years.

*Note: If your company did not file an income tax return in any of the tax years indicated, provide an explanation stating the reasons why you were exempt*
from filing such a return and the applicable section[s] of the Income Tax Act under which you were exempt from doing so.
H-2 Tariff and VAT exemptions on imported materials and equipment (Program 11)

It is our understanding that certain enterprises in China are eligible for exemption from the payment of import duty and import VAT on imported inputs, technologies and machinery.

If your business or any company/entity related to your business received benefits under any such program during the period 1 October 2016 to 30 September 2017, please answer the following questions.

1. Provide complete details involving the amount of the VAT refund received, including whether the refund was received in a lump sum or multiple instalments.

2. Describe the application and approval procedures for obtaining a benefit under the program.

3. Where applicable, provide copies of the application form or other documentation used to apply for the program, all attachments and all contractual agreements entered into between your business and the GOC in relation to the program.

4. Outline the fees charged to or expenses incurred by your business in receiving the program.

5. Outline the eligibility criteria your business had to meet in order to receive benefits under this program.

6. State whether your eligibility for the program was conditional on one or more of the following criteria:
   a) whether or not your business exports or has increased its exports;
   b) the use of domestic rather than imported inputs;
   c) the industry to which your business belongs; or
   d) the region in which your business is located.

7. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

8. What records does your business keep regarding each of the benefits received under this program? Provide copies of any records kept in relation to the program.

9. Indicate where benefits under this program can be found in your accounting system (i.e., specify the ledgers or journals) and financial statements.

10. Were the materials and/or equipment that were entitled to a refund of VAT used in the production of the goods during the investigation period? If yes, provide the following information:
(a) type of inputs;  
(b) cost of inputs;  
(c) quantity of inputs; and  
(d) amount of VAT refunded.

11. Has your company received exemption from payment of or refunds of import duty and import VAT for imported material inputs (e.g. hot rolled coil, coking coal and coke) at any time that were used in the production of the goods during the investigation period? If yes, provide the following information:

(a) description of imported product;  
(b) country of origin;  
(c) quantity of imported product;  
(d) purchase price;  
(e) terms of purchase (e.g. FOB, CIF);  
(f) ocean freight;  
(g) value for duty of imported product;  
(h) regular rate of taxes and duties;  
(i) concessionary rate of taxes and duties;  
(j) amount of duties and taxes normally applicable;  
(k) amount of duties and taxes paid;  
(l) amount of duties and taxes exempt;  
(m) date of importation;  
(n) tariff classification number;  
(o) customs entry number; and  
(p) application fee.

12. Explain if (and how) the GOC determines which imported inputs are consumed by your business in the production of the subject goods and in what amounts, and the amount of duty paid or payable on the inputs (including any allowance for waste).

13. Explain how the GOC determined the percentage rate of duty exemption.

Please note that goods consumed in the production of exported goods (inputs) include:

(a) goods incorporated into the exported goods; and  
(b) energy, fuel, oil and catalysts that are used or consumed in the production of the exported goods.

14. Provide a representative sample of copies of import entry documents (for example: bill of entry, invoice from supplier, etc.) for each type of importation covering duty-exempt inputs and duty-paid inputs imported for use in the manufacturing of the subject goods.

15. In addition to the import entry documents, you must also provide copies, if applicable, of any applications submitted to and/or approval document received from the GOC relating to the exemption from the payment of import duty and import VAT on imported inputs and in relation to the VAT that is refunded on the exportation of the subject goods.
16. Provide copies of reports and audits by the GOC authority responsible for administering the duty rebate or duty drawback scheme with respect to the verification of the importation and use of inputs and the remittance or drawback of the related duty paid or payable.

17. To your knowledge, does the program still operate or has it been terminated?

If the program has been terminated, please provide details (when, why). When is the last date that your business could apply for or claim benefits under the program? When is the last date that your business could receive benefits under the program? If the program terminated has been substituted for by another program, identify the program.

H-3 Grants (Programs 12-33, 35 and 36)

In the original countervailing investigation (REP 193), it was determined that subsidy benefits under the following countervailable subsidy programs have been received by Chinese exporters of the goods.

- **Program 12**: One-time Awards to Enterprises Whose Products Qualify for ‘Well-Known Trademarks of China’ and ‘Famous Brands of China’

- **Program 13**: Matching Funds for International Market Development for small and medium size enterprises (SMEs)

- **Program 14**: Superstar Enterprise Grant

- **Program 15**: R&D Assistance Grant

- **Program 16**: Patent Award of Guangdong Province

- **Program 17**: Innovative Experimental Enterprise Grant

- **Program 18**: Special Support Fund for Non-State-Owned Enterprises

- **Program 19**: Venture Investment Fund of Hi-Tech Industry

- **Program 20**: Grants for Encouraging the Establishment of Headquarters and Regional Headquarters with Foreign Investment

- **Program 21**: Grant for Key Enterprises in Equipment Manufacturing Industry of Zhongshan

- **Program 22**: Water Conservancy Fund Deduction

- **Program 23**: Wuxing District Freight Assistance

- **Program 24**: Huzhou City Public Listing Grant
Program 25: Huzhou City Quality Award

Program 26: Huzhou Industry Enterprise Transformation & Upgrade Development Fund

Program 27: Wuxing District Public List Grant

Program 28: Anti-dumping Respondent Assistance

Program 29: Technology Project Assistance

Program 30: Capital injection

Program 31: Environmental protection grant

Program 32: High and New Technology Enterprise Grant

Program 33: Independent Innovation and High-Tech Industrialisation Program

Program 35: Environmental Prize

Program 36: Jinzhou District Research and Development Assistance Program

For the following questions, please provide responses to questions in the “Grants” spreadsheet in the “Exporter Questionnaire – Attachment” Excel workbook.

1. Did your business or any company/entity related to your business receive any benefit under the above programs during the period 1 October 2016 to 30 September 2017?

2. Did your business receive benefits under any other grant (including awards, prizes, funds) program during the period 1 October 2016 to 30 September 2017?

3. For each program identified in your answer to questions 1 and 2 above, answer the following questions:
   i. Provide complete details involving the amount of the grant received, including whether the grant was received in a lump sum or multiple instalments.
   ii. Identify the date of approval of the grant and the date the grant was received.
   iii. Identify the body responsible for administering the grant.
iv. Indicate which goods you produced that benefited from the program (e.g. the program may have benefited all production, or only certain products that have undergone research and development).

v. Describe the application and approval procedures for obtaining a benefit under the program.

vi. Where applicable, provide copies of the application form or other documentation used to apply for the program, all attachments and all contractual agreements entered into between your business and the GOC in relation to the program.

vii. Outline the fees charged to or expenses incurred by your business in receiving the program.

viii. Outline the eligibility criteria your business had to meet in order to receive benefits under this program.

ix. State whether your eligibility for the program was conditional on one or more of the following criteria:
   a) whether or not your business exports or has increased its exports;
   b) the use of domestic rather than imported inputs;
   c) the industry to which your business belongs; or
   d) the region in which your business is located.

x. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

xi. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

xii. What records does your business keep regarding each of the benefits received under this program? Provide copies of any records kept in relation to the program.

xiii. Indicate where benefits under this program can be found in your accounting system (i.e., specify the ledgers or journals) and financial statements.

xiv. To your knowledge, does the program still operate or has it been terminated?

xv. If the program has been terminated, please provide details (including when and why). When is the last date that your business could apply for or claim benefits under the program? When is the last date that your business could receive benefits under the program?
If the program terminated has been substituted for by another program, identify the program and answer all the questions in Part H-5 in relation to this program.

**H-4** Hot rolled steel provided by Government at less than adequate remuneration (Program 1)
Coking coal provided by Government at less than adequate remuneration (Program 2)
Coke provided by Government at less than adequate remuneration (Program 3)

The countervailing investigation, as outlined in *International Trade Remedies Branch Report No. 193* (REP 193), considered claims that public bodies (in the form of SOEs/SIEs) were supplying HRC, coking coal and coke, directly or indirectly, to manufacturers of zinc coated (galvanised) steel at less than fair value.

The term SOE or SIE is defined in the glossary of this questionnaire (Appendix 1).

In relation to this program, provide the following information.

1. Did your business or any company/entity related to your business receive any benefit under the above program during the inquiry period **1 October 2016 to 30 September 2017**?

2. Does your business purchase coking coal, coal or HRC from SOE/SIEs?

3. Provide a list, including a contact name and address, of all your suppliers of aluminium. Indicate whether the supplier is a SOE/SIE and whether they supply HRC, coking coal or coal.

4. Provide a listing showing the purchase price of raw material from each supplier during each month of the inquiry period.

Prepare this information in the attached spreadsheet named "Raw Material Purchases" included as part of the *Exporter Questionnaire accompanying spreadsheet* provided alongside this questionnaire (as per Section G-6).

Please add more space for additional suppliers and categories as required.

5. Did your business receive any reduction/reduced price for the purchase of these goods/services during the inquiry period? If so, describe the eligibility criteria that your business had to meet in order to qualify for any reduction in the price paid for the goods/services.

6. Provide copies of all contractual agreements that detail the obligations of the SOE/SIE and your business with reference to the granting and receipt of the assistance/benefits.

7. Did your business import any raw material during the inquiry period? If yes, please provide details of all such imports, including date, source, type, amount and price.

---

4 REP 193 investigated galvanised steel and aluminium zinc coated steel exported from China, Korea and Taiwan. Due to the close nature of these products and common interested parties, findings from both countervailing investigations were detailed in the one report.
Explain the reasons for your business’ decision to purchase imported over domestic raw materials, including the key factors affecting the decision such as price, availability etc.

8. Explain the factors that determine the price of HRC, coking coal and coal.

H-5 Any other programs

Provide answers to the following questions in the “Other programs” spreadsheet in the “Exporter Questionnaire – Attachment” Excel workbook.

1. Provide a list of all the provinces in which you have business operations (including locations of factories, sales offices, or other places of business).

2. Are you aware of any programs of the GOC, any of its agencies or any other authorised body, that benefits manufacturers of aluminium zinc coated steel and galvanised steel that have not been accounted for in this questionnaire? Provide the name of those programs you are aware of (even if your company is not eligible to receive benefit under the program).

3. Indicate the location of the program by region, province or municipal level.

4. Indicate the type of program, for example:
   a) the provision of grants, awards or prizes;
   b) the provision of goods or services at a reduced price (e.g. electricity, gas, raw materials (including, for example, zinc), transport);
   c) the reduction of tax payable including income tax and VAT;
   d) reduction in land use fees;
   e) loans from Policy Banks at below-market rates; or
   f) any other form of assistance.

5. For each program that you have identified, answer the following.
   i. Indicate whether your company benefited from any of the identified programs.
   ii. Indicate which goods you produced that benefited from the program (e.g. the program may have benefited all production or only certain products that have undergone research and development).
   iii. Describe the application and approval procedures for obtaining a benefit under the program.
   iv. Where applicable, provide copies of the application form or other documentation used to apply for the program, all attachments and all

---

5 Refer to the Glossary of Terms for a definition of benefit in this context.
contractual agreements entered into between your business and the GOC in relation to the program.

v. Outline the fees charged to or expenses incurred by your business in receiving the program.

vi. Outline the eligibility criteria your business had to meet in order to receive benefits under this program.

vii. State whether your eligibility for the program was conditional on one or more of the following criteria:

a) whether or not your business exports or has increased its exports;

b) the use of domestic rather than imported inputs;

c) the industry to which your business belongs; or

d) the region in which your business is located.

viii. If the benefit was provided in relation to a specific activity or project of your entity, please identify the activity and provide supporting documentation.

ix. What records does your business keep regarding each of the benefits received under this program? Provide copies of any records kept in relation to the program.

x. Indicate where benefits under this program can be found in your accounting system (i.e. specify the ledgers or journals) and financial statements.

xi. To your knowledge, does the program still operate or has it been terminated?

xii. If the program has been terminated, please provide details (including when and why). When is the last date that your business could apply for or claim benefits under the program? When is the last date that your business could receive benefits under the program?

*If the program terminated has been substituted for by another program, identify the program and answer all the Questions in Part H-4 in relation to this program.*
SECTION I
EXPORTER'S DECLARATION

I hereby declare that.............................................................(company) have completed the attached questionnaire and, having made due inquiry, certify that the information contained in this submission is complete and correct to the best of my knowledge and belief.

Name :......................................................................................
Signature :..............................................................................
Position in Company :................................................................
Date :.....................................................................................
**SECTION J CHECKLIST**

*This section is an aid to ensure that you have completed all sections of this questionnaire.*

APPENDIX
GLOSSARY OF TERMS

This glossary is intended to provide you with a basic understanding of technical terms that appear in the questionnaire.

Adjustments

To enable a fair comparison between the export price and the normal value Australian legislation provides for the adjustment of the domestic price paid for like goods. Adjustments are made to account for sales occurring at different times, specification differences, and differences in the terms or circumstances of the sales. The adjustment to the normal value may be upward or downward. Areas where you believe an adjustment is necessary should be identified. Section E of the questionnaire refers.

Examples of adjustments that may be made include: sales occurring at different times (it is sometimes necessary to compare domestic and export sales made at different times - in these circumstances an adjustment may be made to reflect price movements during that time); specification differences; packaging; taxes; level of trade; advertising; servicing/warranty; inland freight; warehousing; export charges; credit terms; duty drawback; commissions.

Adjustments may also be required where the normal value is based upon costs to make and sell.

Arms length

Sales are not considered to be at "arms length" on your domestic market if there is any consideration payable for the goods other than their price, or there is an association between the buyer and the seller which affects the price, or there will be a reimbursement, compensation or benefit for, or in respect of, the price.

Constructed value

In cases where domestic prices paid for the goods under consideration in the country of export cannot be used for the determination of normal value, ie. when there are no or insufficient sales or where such sales were not made in the ordinary course of trade, normal value may be based on a constructed value. Constructed value is calculated on the basis of the cost of production of the goods under consideration plus a reasonable amount for selling, general and administration costs, and for profits, that are associated with sales on the domestic market of the country of export.

Cost of production/manufacturing

The cost of production or manufacture consists of all manufacturing costs associated with the goods. It is the sum of direct materials, direct labour and factory overheads.
Cost to make and sell

The cost to make and sell is the sum of the cost of production or manufacture, and the selling, general and administration costs associated with the sale of those goods.

Country of origin

The country in which the last significant process in the manufacture or production of the goods was performed.

Date of sale

The Commission will normally use the invoice date as recorded in the exporter or producer’s records. Another date may be used if this better reflects the material terms of sale. The questionnaire directs attention to matching data sets of domestic and export sales where some other date is used, as well as matching cost information.

Direct labour cost

Direct labour is categorised as a variable cost, ie. the value varies with the level of production.

Dumping

Dumping occurs when the products of one country are exported to another country at a price less than their normal value.

Dumping margin

Where the export price is less than the normal value the dumping margin is the amount of the difference. It can be expressed as a value or as a percentage of the export price.

Export price

The export price of the goods is usually the price paid or payable to the exporter in arms length transactions, in most instances calculated at the Free on Board (FOB) level.

Exporting country

The country of export is normally the country of origin from which the goods are shipped. The country of export may be an intermediate country, except where the products are merely transhipped through that country, or the products concerned are not produced in that country, and there is no comparable price in that country.

Factory overheads

Factory overheads consist of variable costs eg. power, supplies, indirect labour and fixed costs eg. factory rent, factory insurance, factory depreciation etc.
**Goods under consideration (the goods)**

The goods to which the application for anti-dumping action relates. That is, the goods that you have exported to Australia allegedly at dumped prices.

**Incoterms**

The following abbreviations are commonly used (comment is provided concerning costs that are normally borne by the seller):

- **EXW**
  - ex works (the seller’s minimum obligation as costs relate to goods being made available at the seller’s premises)

- **FCA**
  - free carrier (main carriage not paid by seller. Pay costs until such time that the goods have been delivered at the named point into custody of a carrier named by the seller. Customs formalities, taxes etc paid if required)

- **FAS**
  - free alongside ship (main carriage not paid by seller. Deliver the goods alongside the ship)

- **FOB**
  - free on board (main carriage not paid by seller. Deliver the goods on board, provide export clearance if required, pay loading costs to the point the goods have passed the ship’s rail, pay customs formalities, taxes etc payable upon exportation)

- **CFR**
  - cost and freight (main carriage paid by seller. Pay all costs as well as freight, loading and unloading, pay customs formalities, taxes etc payable upon exportation)

- **CIF**
  - cost, insurance and freight (main carriage paid by seller. Pay all costs as under CFR as well as marine insurance)
  
  The terms CFR and CIF are only used where goods are carried by sea or waterway transport

- **CPT**
  - carriage paid to

- **CIP**
  - carriage and insurance paid to

  The terms CPT and CIP are used as alternatives to CFR and CIF where the goods are carried by air, road, rail etc

- **DAF**
  - delivered at frontier (goods carried by rail or road and cleared for export at the named place at the frontier. Pay costs until delivered at the frontier plus any discharge costs incurred to place the goods at the customers disposal)

- **DES**
  - delivered ex ship (goods made available to the buyer on board the ship uncleared for import at the named port of destination. Pay all costs incurred in placed at the disposal of the buyer, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)

- **DDU**
  - delivered duty unpaid (Pay all costs for carriage to the agreed point, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)

- **DDP**
  - delivered duty paid (goods made available at the named place in the country of importation – all risks and costs being incurred by the seller including duties, taxes etc incurred upon importation)
Investigation period

A period defined by the Commission over which importations of the goods are examined.

Like goods

Like goods are goods sold on the domestic market of the country of export (or to a third country) that are identical in all respects to the goods under consideration or that, although not alike in all respects have characteristics closely resembling those of the goods under consideration. The term ‘like goods’ also refers to the goods produced by the Australian industry allegedly being injured by dumped imports.

Normal value

Australian legislation sets out several ways to assess "normal value".

The preferred method is to use the price paid for like goods sold for domestic consumption in the country of export. Usually, these sales are made by you, but there may be circumstances where it is appropriate to use sales made by other sellers on the domestic market.

Sale prices must be at arms length and in the ordinary course of trade. In the absence of relevant or suitable domestic sales, the normal value may be determined by constructing a price based upon all costs to make and sell the goods. Profit may also be included if the sales on the domestic market are profitable. Alternatively the normal value may be ascertained using the price paid for like goods sold in the ordinary course of trade at arms length to customers in a country other than Australia, however this option is rarely used.

Finally, when a normal value cannot be ascertained by any of the above methods, or if no information is provided, the Commission will determine the normal value by considering all the relevant information, including the applicant's information. This allows the applicant's information to be used where sufficient information has not been furnished or is not available.

Where domestic price generally, and the trade of the exporting country are determined or substantially influenced by the government of the exporting country, an alternative/surrogate market economy is selected by the Commission and the normal value is determined as if the surrogate country were the export source.

Ordinary course of trade

Testing for "ordinary course of trade" includes a comparison of the selling price and the unit cost to make and sell for the same period. If sales in respect of a substantial quantity of goods over an extended period of time, usually 12 months, do not recover all costs and these losses are not likely to be recovered within a reasonable period of time, (again usually 12 months) then the sales are regarded as being not in the ordinary course of trade.

There may be circumstances where it is appropriate to use a period other than 12 months in assessing whether sales are in the ordinary course of trade.
Unprofitable sales are to be taken to have occurred in substantial quantities during an extended period where the unprofitable sales amount to 20% or more of the total volume of sales of the goods by the exporter over the period. An extended period of time is usually taken to be a period not less than 12 months. Where unprofitable sales are rejected, normal value is based upon remaining profitable sales provided they occur in sufficient number. Where all sales have been made at a loss, or profitable sales are insufficient, the normal value may be constructed from costs to make and sell.

**Selling, general and administration expenses (SG&A)**

The selling, general and administration expenses includes all selling, distribution, general and administration expenses including finance costs that would be incurred if the goods were sold for domestic consumption in the country of export. The amounts are determined in each case using all the available information and may include expenses incurred in:

- domestic sales of like goods;
- sale of goods of the same general category by the exporter; or
- sales in the industry in the country of export.

The expenses must, however, reflect the selling, general and administration costs of the goods. Administrative and selling expenses include: director’s fees, management salaries and benefits, office salaries and benefits, office supplies, insurance, promotion, entertainment, depreciation and corporate overheads.
