PUBLIC RECORD

Dear Sir,

Further to our telephone call 3/12/15 we wish to present our submission for the review of the antidumping measures applying to PVC resin under the subheading 3904.10.00 from Korea & China

As a major importer of the above commodity from Korea & China we firmly believe with the closing of domestic production this commodity should be tariff duty free from both sources. This would also mean the removal of the anti dumping duties.

We are sure you are well aware of the extremely competitive nature of imports of this commodity and over the past several years our Company has struggled to compete with imports from tariff free sources.

It is our strong belief that the removal of all tariff constraints on these 2 countries will significantly reduce the import costs thereby assisting local manufacturers to run more profitable businesses

We trust you can consider our request to favourably review the above situation to enable us to survive in this very competitive industry.

Yours faithfully

John M Watson

Managing Director
