

Customs Act 1901 – Part XVB

ANTI-DUMPING NOTICE NO. 2016/04

Certain Aluminium Extrusions

Exported from the People’s Republic of China by

Press Metal International Ltd.

Findings in Relation to a Review of Anti-Dumping Measures

Notice under subsection 269ZDB(1)(a)(iii) of the Customs Act 1901

The Commissioner of the Anti-Dumping Commission has completed a review, which commenced on 13 August 2015, of the anti-dumping measures applying to certain aluminium extrusions (‘the goods’) exported to Australia from the People’s Republic of China (China) by Press Metal International Ltd. (PMI).

Recommendations resulting from the review, reasons for the recommendations and material findings of fact and law in relation to the review are contained in *Anti-Dumping Commission Report No. 304* (REP 304).

I, KAREN LESLEY ANDREWS, the Assistant Minister for Science and Parliamentary Secretary to the Minister for Industry, Innovation and Science, have considered REP 304 and have decided to accept the recommendations and reasons for the recommendations, including all the material findings of facts and law set out in REP 304.

Under subsection 269ZDB(1)(a)(iii) of the *Customs Act 1901* (the Act), I declare that, for the purposes of the Act and the *Customs Tariff (Anti-Dumping) Act 1975* (Dumping Duty Act), with effect from the date of publication of this notice, the dumping duty notice and the countervailing duty notice currently applying to the goods exported to Australia from China are taken to have effect or to have had effect, in relation to PMI, as if I had fixed different variable factors in respect of PMI, relevant to the determination of duty.

The dumping duty that has been determined is an amount that has been worked out in accordance with subsection 8(5) of the Dumping Duty Act using the combination of fixed and variable duty method pursuant to subsection 5(2) of the *Customs Tariff (Anti-Dumping) Regulation 2013*, as detailed in the table below and the notice has effect accordingly.

The countervailing duty that has been determined is an amount that has been ascertained as a proportion of the export price of the goods pursuant to subsection 10(3B)(a) of the Dumping Duty Act, as detailed in the table below and the notice has effect accordingly.

Exporter	Rate of interim dumping duty (fixed component)	Rate of interim countervailing duty	Duty method
Press Metal International Ltd.	0.0%	0.0%	Dumping – combination of fixed and variable duty method. Countervailing – ad valorem.

Interim dumping duty will be payable on aluminium extrusions exported by PMI only when the actual export price is below the ascertained export price which is a specified (confidential) amount per kilogram.

The actual duty liability may be higher than the effective rate of duty due to a number of factors. Affected parties should contact the Anti-Dumping Commission on telephone number 13 28 46 or email at clientsupport@adcommission.gov.au for further information regarding the actual duty liability in their particular circumstance.

To preserve confidentiality, details of the revised variable factors such as the ascertained export price and ascertained normal value will not be published.

Interested parties may seek a review of this decision by lodging an application with the Anti-Dumping Review Panel (www.adreviewpanel.gov.au) in accordance with the requirements in Division 9 of Part XVB of the Act, within 30 days of the publication of this notice.

REP 304 has been placed on the public record, which may be examined at the Anti-Dumping Commission's office by contacting the case manager on the details provided below. Alternatively, the public record is available at www.adcommission.gov.au.

Enquiries about this notice may be directed to the case manager on telephone number (03) 8539 2424, fax number (03) 8539 2499 or email at operations4@adcommission.gov.au.

Dated this 4th day of February 2016

KAREN LESLEY ANDREWS
Assistant Minister for Science
Parliamentary Secretary to the Minister for Industry, Innovation and Science
