Luoyang is expected to become China's auto aluminum wheels and processing base

<http://www.smxwheel.com/> 2010-12-10 14:32:05

A total investment of more than 500 million yuan of the large projects settled in Xin'an industrial clustering. Upon completion of the project, will produce five million cars aluminum wheels, so that aluminum wheels in China Luoyang processing industries occupy a place.

The project is a private enterprise, Luoyang Luoyang pay -- Wang Investment Co., Ltd., and Taiwan Industrial Co., Ltd. common source of constant investment. Xin Industrial agglomeration areas the two sides in a joint venture aluminum wheel Safety Products Co., Ltd. in Luoyang. The project is designed by the Luoyang Nonferrous Metals Processing Research Institute of Design, an investment of 260 million yuan, annual output of 2.4 million aluminum alloy car wheels; second phase of investment is completed, will form a complete casting, machining, coating production lines, annual output of 500 million aluminum wheels.

Constant source of Taiwan companies have over 50 years history of car production hub, is Japan, the United States Motor Company's long-term suppliers. An aluminum wheel stationed in the project will take full advantage of million of liquid aluminum-based solid Group resources to achieve the products into the international market, companies win energy saving targets.
