Dear Mr Chami

Thank you for your letter of 17 December 2013 regarding Nippon Steel & Sumitomo Metal Corporation's exporter questionnaire response. I am the case manager for the Hot Rolled Structural Steel Sections dumping investigation.

In order for your client to be deemed a cooperative exporter under section 269T(1) of the *Customs Act 1901* (the Act), and therefore receive an individual dumping margin, I will require a fully completed exporter questionnaire response by **23 December 2013**.

The Anti-Dumping Commissioner is required under section 269TAC of the Act to determine the normal value in order to assess whether dumping is occurring. A fully completed exporter questionnaire that includes domestic sales and cost data is considered to be information relevant to the investigation for this purpose. Without this information your client will be considered an uncooperative exporter, as defined under section 269T(1) of the Act, and the dumping margin will be determined in accordance with section 269TACAB(1) of the Act.

In relation to the assessment of whether dumping has caused material injury to the Australian industry, during the course of the investigation the Commission collects import price data from various sources, including data provided by importers and exporters. In this regard, your letter will also be treated as a submission.

Yours sincerely
