

PUBLIC RECORD

ANTI-CIRCUMVENTION INQUIRY

NUMBER 291

EXPORTS OF SLIGHTLY MODIFIED GOODS TO AUSTRALIA

**HOLLOW STRUCTURAL SECTIONS EXPORTED FROM THE PEOPLE'S
REPUBLIC OF CHINA, THE REPUBLIC OF KOREA AND MALAYSIA**

EXPORTER QUESTIONNAIRE

Periods of inquiry: 1 JULY 2010 TO 31 MARCH 2015

Response due by: **29 July 2015**

RETURN OF QUESTIONNAIRE

By email: operations2@adcommission.gov.au

By mail
(on CD-ROM or USB): Attn: Director, Operations 2
Anti-Dumping Commission
Department of Industry and Science
GPO BOX 9839
CANBERRA CITY ACT 2601

1. BACKGROUND

1.1. Original investigation and measures

On 3 July 2012, following consideration of *Anti-Dumping Commission Report No. 177*, the then Attorney-General published a dumping duty notice and a countervailing duty notice imposing anti-dumping measures in the form of interim dumping duty (IDD) on hollow structural sections (HSS) **made from carbon steel** exported to Australia from the People's Republic of China (China), the Republic of Korea (Korea), Malaysia and Taiwan and interim countervailing duty (ICD) on HSS exported to Australia from China.

The dumping duty notice covers all exporters of HSS from China, Korea, Malaysia and Taiwan.

The countervailing duty notice covers all exporters of HSS from China except for Huludao City Steel Pipe Industrial Co., Ltd and Qingdao Xiangxing Steel Pipe Co., Ltd.

1.2. Background to anti-circumvention inquiry

1.2.1. Application and initiation

On 7 April 2015, Austube Mills Pty Ltd (ATM), a member of the Australian industry producing like goods, lodged an application under s.269ZDBC(1) of the *Customs Act 1901* (the Act)¹ for an anti-circumvention inquiry in relation to HSS exported from China, Korea, Malaysia and Taiwan.

In its application, ATM alleged that the applicable anti-dumping measures in respect of HSS from China, Korea, Malaysia and Taiwan were being circumvented by importers and exporters of the goods through the slight modification of those goods. Specifically, ATM alleged that HSS that would otherwise be subject to the anti-dumping measures, was being slightly modified through the addition of alloys to those goods, which allows for those goods to no longer be considered HSS made from carbon steel HSS, but rather **alloyed** HSS.

In its application, ATM highlighted that it considers HSS including the alloying element of boron has been imported and circumvented the anti-dumping measures. ATM identified that other alloys (such as chromium) may also have been used in such a modification.

Following consideration of this application, the Commissioner of the Anti-Dumping Commission (the Commissioner) decided to not reject the application in so far as it related to HSS exported from China, Korea and Malaysia, and an anti-circumvention inquiry was initiated into the slight modification of those goods. This anti-circumvention inquiry was initiated on 11 May 2015.

¹ All legislative references in this document refer to provisions of the Act unless specifically stated otherwise.

PUBLIC RECORD

Following consideration of ATM's application, the Commissioner decided to reject the application in so far as it related to HSS exported from Taiwan..

Details of the Commissioner's consideration of ATM's application are in *Consideration Report 291*.

1.2.2. Inquiry process

The anti-circumvention inquiry will examine whether any exporters of HSS from China, Korea or Malaysia have engaged in circumvention activity where there is a slight modification of goods exported to Australia, as outlined in subsection 48(2) of the *Customs (International Obligations) Regulation 2015*.

The alleged circumvention goods exported to Australia during the period 1 July 2010 to 31 March 2015 will be examined to determine whether the circumvention activity has occurred..

Unless the inquiry is terminated earlier, after concluding the inquiry, the Commissioner will provide a report and recommendations to the Parliamentary Secretary to the Minister for Industry and Science (the Parliamentary Secretary).

This report will recommend to the Parliamentary Secretary that, pursuant to subsection 269ZDBG(1) of the Act, the original dumping duty notice in respect of HSS:

- remain unaltered; or
- be altered following a finding that circumvention activity in relation to the original notice/s has occurred; and
- the alterations to be made

After considering the report and any other information that the Parliamentary Secretary considers relevant, the Parliamentary Secretary may leave the original notice unaltered or alter the original notice, specifying different goods that are subject to the notice, and altering variable factors in respect of certain exporters subject to the notice.

The Commission inquiry will be carried out under the provisions of the Part XVB of the Act.

2. THE GOODS AND THE CIRCUMVENTION GOODS

2.1. The goods subject to anti-dumping measures (the goods)

The goods subject to the dumping duty notice and the countervailing duty notice (the goods) are described as:

Certain electric resistance welded pipe and tube made of carbon steel, comprising circular and non-circular hollow sections in galvanised and non-galvanised finishes.

For the purposes of this questionnaire, the goods will be referred to as '**non-alloy HSS**' or as '**the goods**'.

2.1.1. Additional product information

Further to the above description of the goods, the following additional information may assist in identifying the goods:

The goods are normally referred to as either CHS (circular hollow sections) or RHS (rectangular or square hollow sections). The goods are collectively referred to as HSS (hollow structural sections). Finish types for the goods include inline galvanised (ILG), pre-galvanised, hot-dipped galvanised (HDG) and non-galvanised HSS.

Sizes of the goods are, for circular products, those exceeding 21mm up to and including 165.1mm in outside diameter and, for oval, square and rectangular products those with a perimeter up to and including 1277.3mm.

Categories of HSS excluded from the goods are conveyor tube; precision RHS with a nominal thickness of less than 1.6mm and air heater tubes to Australian Standard (AS) 2556.

2.1.2. Tariff classifications of the goods

The goods are classified to tariff subheadings:

- 7306.30.00 (statistical codes 31, 32, 33, 34, 35, 36 and 37);
- 7306.61.00 (statistical codes 21, 22 and 25); and
- 7306.69.00 (statistical code 10)

of Schedule 3 to the *Customs Tariff Act 1995* (Tariff Act).

The general rate of duty is 5% for goods imported under these tariff subheadings.

The goods exported to Australia:

- from Korea are subject to a 3% rate of duty; and
- from China and Malaysia are subject to a 4% rate of duty.

2.2. The goods subject to the inquiries (the circumvention goods)

The goods subject to the anti-circumvention inquiries (the circumvention goods) are described as:

certain electric resistance pipe and tube made of alloy steel

For the purposes of this questionnaire, the circumvention goods are referred to as 'alloyed HSS' or as 'the circumvention goods'.

IMPORTANT: the circumvention goods are HSS that includes any alloy(s) and not only HSS that contains boron. Please answer questions in this questionnaire in relation to the circumvention goods regarding any type of alloyed HSS manufactured and/or sold by your company.

2.2.1. Tariff classifications of the circumvention goods

The circumvention goods are classified to tariff subheadings:

- 7306.50.00 (statistical code 45); and
- 7306.61.00 (statistical code 90)

of Schedule 3 to the Tariff Act.

The general rate of duty is 5% for goods imported under these tariff subheadings.

The circumvention goods exported to Australia:

- from Korea are subject to a 3% rate of duty; and
- from China and Malaysia are subject to a 4% rate of duty

3. INSTRUCTIONS

3.1. Why have you been asked to fill out this questionnaire?

The Commission is responsible for conducting the inquiries into alleged circumvention activities to determine whether those activities have occurred.

The Commission has identified your company as a possible exporter of the circumvention goods, and will examine your exports during the inquiry periods to determine whether circumvention of the measures has occurred.

3.2. What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information if deemed necessary, the Commission may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry) to assess if circumvention of the measures has occurred.

It is in your interest, therefore, to provide a complete and accurate submission, capable of verification.

3.3. Due date for response

You are requested to respond to this questionnaire and return it to the Commission within the time specified on the cover page. There is a statutory time limit imposed for the inquiries. The Commission may not be able to consider submissions received after the due date.

If you cannot lodge your submission by the due date please advise the inquiries' case manager as soon as possible.

3.4. Confidential and non-confidential submissions

You are required to lodge one confidential version (for official use only) and one non-confidential version (for public record) of your response by the due date.

Please ensure that each page of information you provide is clearly marked either "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia's anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

PUBLIC RECORD

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party's understanding of information contained in a document.

As provided for in Australia's anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the inquiries' case manager.

Further advice on providing non-confidential information to the Commission can be found in Australian Customs Dumping Notice (ACDN) 2012/42, available on the Commission's website.

3.5. Exporter's declaration

Chapter 6 requires you to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the circumvention goods during the period of inquiry, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

3.6. Verification of the information that you supply

The Commission may seek to verify the information provided in your submission.

This verification may take the form of written requests for additional information or an in-person verification visit with your company at its premises.

The purpose of verification is to authenticate the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be complete and accurate.

If an in-person visit is considered necessary, during that visit we will want to examine in detail your company's records in respect of the goods and the circumvention goods and will ask for copies of documents relating to the manufacture and sale of those goods. We will need to consult with your staff, particularly your export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

PUBLIC RECORD

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have. We will ask you to prepare a non-confidential copy of the report for the public record.

3.7. If you do not manufacture the circumvention goods

You may supply but not produce or manufacture the circumvention goods (for example, you are a trading company, broker, or vendor dealing in the circumvention goods).

In such cases it is important that you forward a copy of this questionnaire to the relevant manufacturers of the circumvention goods **immediately**. You should also inform the inquiries' case officer of the contact details for these manufacturers.

You should also **complete those sections of the questionnaire that you are reasonably able to complete**. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

3.8. Some general instructions for preparing your response

- When answering the questionnaire please carefully read all instructions. The Commission requires a response to *all* sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.
- Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.
- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.
- We recommend that you retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.
- Where applicable, clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

3.9. Provision of electronic data

- It is important that information is submitted in electronic format where directed.
- Electronic data should be emailed, or submitted on a CD-ROM or USB.

PUBLIC RECORD

- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file). Excel files must be compatible to the USA version.
- An Excel workbook, ***Exporter Questionnaire – HSS AC*** accompanies this questionnaire and forms a template for your response to the data requested. The workbook is referred to throughout this questionnaire as appropriate. This workbook should be completed and used to provide the requested data where possible.
- If you cannot present electronic data in the requested format contact the investigation case officer as soon as possible.

3.10. Further information

Before you respond to the questionnaire you should read the key documents available on the Commission's website and public record in relation to these inquiries (www.adcommission.gov.au) including:

- ATM's applications for the inquiries;
- Consideration Report 291; and
- the Anti-Dumping notices notifying of the inquiries.

If you require further assistance, or you are having difficulties completing your submission, please contact the inquiries' case manager.

4. QUESTIONS FOR COMPLETION

4.1. Identity and communication

4.1.1. Company contact

Please nominate a person within your company who can be contacted for the purposes of this inquiry:

Head Office:

Name:	Rod Corkill
Position in the company:	CEO
Address:	PO Box 8267 Wynnum North QLD 4178
Telephone:	+1300 661 635
Facsimile number:	+1300 961 535
E-mail address:	rod@steelforce.com.au

Factory:

Name:	[REDACTED]
Position in the company:	General Manager
Address:	No.26 Number 2 Street DD Port, Dalian Development Zone, Liaoning, China
Telephone:	[REDACTED]
Facsimile number:	[REDACTED]
E-mail address:	[REDACTED]

4.1.2. Representative of the company for the purpose of inquiry

If you wish to appoint a representative to assist you in this inquiry, provide the following details:

Name:	John Bracic
Organisation:	J.Bracic & Associates Pty Ltd
Position:	Director
Address:	PO Box 3026

PUBLIC RECORD

	Manuka ACT 2603
Telephone:	+61 (0)499 056 729
E-mail address:	john@jbracic.com.au

Note that in nominating a representative, the Commission will assume that confidential material relating to your company in this inquiry may be freely released to, or discussed with, that representative.

4.1.3. Company information

- a) What is the legal name of your business? What kind of entity is it (e.g. company, partnership, sole trader)? Please provide details of any other business names that you use to export and/or sell goods.

Dalian Steelforce Hi-Tech Co., Ltd (“Dalian Steelforce”). Dalian Steelforce is registered as a liability limited company (wholly owned foreign enterprise) under the laws of China.

- b) Provide a diagram showing all associated or affiliated companies and your company’s place within that corporate structure.

CONFIDENTIAL ORG STRUCTURE DELETED

- c) Describe the nature of your company’s business. Explain whether you are a producer or manufacturer, distributor, trading company, etc.

Dalian Steelforce is a manufacturer and exporter of HSS and fabricated goods.

- d) If your business does not perform all of the following functions in relation to alloyed HSS, then please provide names and addresses of the companies which perform each function:

- produce or manufacture
- sell in the domestic market
- export to Australia, and
- export to countries other than Australia.

Dalian Steelforce has performed all of the above functions during the period of inquiry. The sales of all HSS in the domestic market were in relation to non-prime/downgrade HSS.

4.2. Exports to Australia

PUBLIC RECORD

4.2.1. Description

Fully describe all of non-alloy HSS and alloyed HSS you have exported to Australia during the inquiry period.

Include details of all models of alloyed HSS and non-alloy HSS exported.

Include specification details, details of alloys and their levels (for alloyed HSS), and include any technical and illustrative material that may be helpful in identifying, or classifying, the exported products.

Steelforce Dalian exports a range of HSS to Australia. The product range is set out in Appendix 1 “App 01 - Product Description”.

4.2.2. Customer identity

For each customer in Australia to whom you shipped alloyed HSS in the inquiry period list:

Name	[REDACTED]
Address	[REDACTED]
Contact name	[REDACTED]
Phone	[REDACTED]
Level of Trade	[REDACTED]

Name	[REDACTED]
Address	[REDACTED]
Contact name	[REDACTED]
Phone	[REDACTED]
Level of Trade	[REDACTED]

Name	[REDACTED]
Address	[REDACTED]

PUBLIC RECORD

Contact name	[REDACTED]
Phone	[REDACTED]
Level of Trade	[REDACTED]

4.2.3. Australian sales data

Fill in the spreadsheet titled 'Australian sales' in the attached Excel workbook **Exporter Questionnaire – HSS AC** in relation to your Australian sales of non-alloy HSS and alloyed HSS during the applicable inquiry period.

If your company has supplied non-alloyed HSS and/or alloyed HSS from more than one of:

- China;
- Korea; or
- Malaysia

during the applicable inquiry period, complete an 'Australian sales' spreadsheet for each country.

See the cover of this questionnaire for the inquiry period applicable to your exports.

Refer to the Appendix 2 "02 – Exporter Questionnaire – HSS AC – Steelforce" for details of the Carbon steel HSS and Alloy HSS exported into Australian during the period of the inquiry. This information has been prepared using a report generated by our Customs' Broker based on Import Declarations for [REDACTED] and was used in the [REDACTED].

PUBLIC RECORD

4.2.4. Australian sales documents

From the 'Australian sales' spreadsheet completed in response to Question 4.2.3, select:

- two shipments of alloyed HSS (alloyed HSS); and
- two shipments of non-alloy HSS

in different quarters of the inquiry period.

If your company only exported alloyed HSS during the inquiry period, please select four shipments of those goods.

Provide the following documentation related to those sales:

- a copy of your market offer for non-alloy HSS or alloyed HSS;
- any correspondence negotiating terms of the sales, price, products, etc. that you have on record;
- the importer's purchase order, order confirmation, and contract of sale;
- commercial invoice;
- bill of lading, export permit;
- if received, the VAT rebate for the alloyed HSS;
- packing list; and
- mill test certificate (including chemical analysis).

The Commission may select additional shipments for verification or provision of documentation at a later date.

Refer to the following Appendices for copies of these Export documents:

- App 03.1 – 2014 Q1 – [REDACTED] – Alloy steel – [REDACTED]
- App 03.2 – 2014 Q2 – [REDACTED] – Alloy steel – [REDACTED]
- App 03.3 – 2014 Q3 – [REDACTED] – Carbon steel – [REDACTED]
- App 03.4 – 2014 Q4 – [REDACTED] – Carbon steel – [REDACTED]

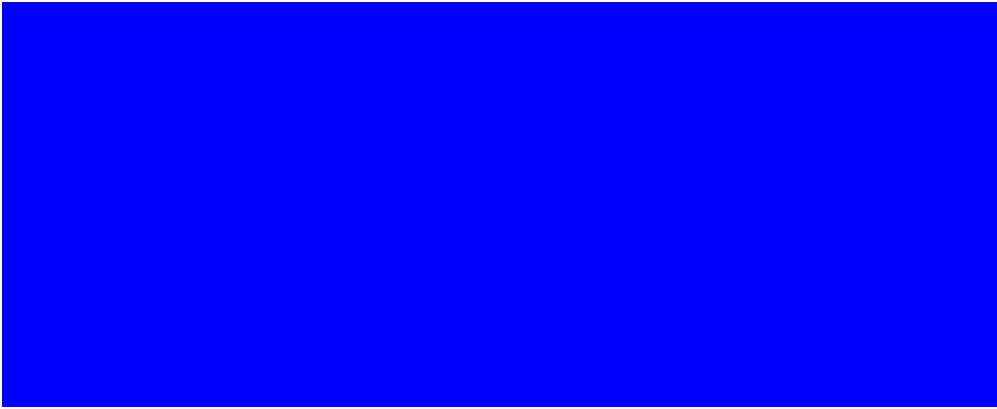

4.2.5. Sales process

- a) Fully describe the sales process to your Australian customers of alloyed HSS from market offer through to invoicing, delivery and payment.

PUBLIC RECORD

In your response, indicate the time period for each of the sales process steps.

If there are multiple distribution channels for alloyed HSS, explain each separately.

[Detailed explanation of ordering process]

- b) Does the process described above differ in any way from the sales process of non-alloy HSS? Provide details.

No. The sales process is the same.

- c) Are the models of alloyed HSS that you exported to Australia during the inquiry period part of your standard product offering to Australia, or are they only available under special circumstances (e.g. through special order)?

They are part of the standard offering.

- d) Do your Australian customers for alloyed HSS specifically request/order non-alloy HSS include alloys that result in it being considered alloyed HSS?

Dalian Steelforce's customers have an arrangement for Dalian Steelforce to supply a range of Alloy and Carbon steel HSS compliant with the relevant Standards.

- e) Do you market alloyed HSS differently from non-alloy HSS. If so, describe any differences.

No. Dalian Steelforce markets its products as compliant with the

PUBLIC RECORD

relevant Standards.

- f) What is the minimum order quantity for export to Australia of:
- non-alloy HSS;
 - alloyed HSS.

There are no minimum order quantities.

4.2.6. Selling price

- a) Is there a difference in selling price to your Australian customers between non-alloy HSS and alloyed HSS, assuming all other factors of the sale were the same (e.g. customer, order quantity, product characteristics such as thickness, credit terms).

That is, are alloyed HSS generally a different price to non-alloy HSS based solely on the fact that they are an alloyed product?

As described in 4.2.5(a) above, the calculation of the price charged to our customer, [REDACTED], is [REDACTED]. The selling price levels of HSS Alloy coil are generally priced [REDACTED]. Therefore, assuming all factors of the sale are the same, [REDACTED].

[Description of factors affecting price].

- b) If the answer to the above is yes, quantify the price difference for each year of the inquiry period. Provide any documents that support this price difference (e.g. price lists, comparable invoices, etc).

[REDACTED]. During the inquiry period, Dalian Steelforce exported [REDACTED].

[Description of factors affecting price].

4.2.7. 'Switch' of supply

If your company 'switched' from supplying non-alloy HSS to supplying alloyed HSS during the assessment period, answer the following questions:

PUBLIC RECORD

- a) What was the rationale for this switch in supply?
- b) Was this in response to a specific request from your Australian customer(s)?
- c) What alterations to your manufacturing process and/or sales process were necessary as a result of this shift in supply?
- d) When did you first commence exporting alloyed HSS to Australia?

In making his decision to impose interim dumping and countervailing duties, the Minister made the following determinations with regard to carbon HSS export from China:

- there was an Australian industry producing like goods to the carbon HSS exported from China;
- exports of carbon HSS from China were dumped and subsidised during the investigation period; and
- dumped exports of carbon HSS from China caused material injury to the Australian industry producing like goods.

As such the Minister declared that Sections 8 and 10 of the Customs Tariff (Anti-Dumping) Duty Act 1975 applied to carbon HSS and like goods.

Following the decision to impose duties, Dalian Steelforce took the opportunity to source additional and alternative raw materials to manufacture and export new products and alternative products that were in demand in the Australian market and that continued to meet Steelforce Trading's requirements for products that complied with the relevant standards.

From Dalian Steelforce's point of view, these new alternative products (which included alloy HSS) fell outside the parameters of the goods subject to interim duties and as such are not considered to be like goods to carbon HSS products subject to duties. This is an important consideration and succinctly highlighted by example in the Anti-Dumping Commission's guidelines to applicants.

The guidelines state:

For example, if you produce red, blue and yellow pencils and lodge an application only against red pencils, and it is determined that red pencils are being dumped and causing injury, future anti-dumping duties will only apply to red pencils. In this case, the risk in applying against too narrow a category of good is that all coloured pencils other than red would not be subject to the antidumping duties. [emphasis added].

Therefore Dalian Steelforce believed and continues to believe, that in respect of its exports of alloy HSS:

- they are not like goods to the goods subject to duties and have never been determined as being like goods;
- they are not dumped or subsidised and have never been determined to be dumped and/or subsidised; and
- as there is no producer of alloy HSS in Australia, there is no

PUBLIC RECORD

Australian industry producing like goods.

As such, Dalian Steelforce was not engaging in circumvention activity. Further, Dalian Steelforce's decision to export alloy HSS was made at a time when Australia's legislation contained no provisions or regulations addressing circumvention. Even after anti-circumvention legislation was introduced in 11 June 2013, the exportation of slightly modified goods was not defined as a circumvention activity until 1 April 2015.

[REDACTED]. [Details regarding ordering process].

Dalian Steelforce first exported Alloy HSS from China in late December 2012.

4.3. Sales to other markets

4.3.1. Domestic sales

a) Did you sell the alloyed HSS in your domestic market during the relevant inquiry period?

b) If the answer to the above is yes:

i. Provide a full description of all types of alloyed HSS sold on the domestic market, including:

- a description of model of those goods
- what alloy(s) are included in those goods and in what quantities

ii. Identify which (if any) of this alloyed HSS are identical to alloyed HSS exported to Australia during the inquiry period.

iii. If applicable, explain how alloyed HSS sold on the domestic market differ from alloyed HSS sold to Australia:

- physically;
- through their manufacturing process; or
- in purpose/end use.

All sales of HSS into the Chinese domestic market by Dalian Steelforce for the inquiry period were non-prime / downgrade. During the production process, any products that do not meet the required quality, mechanical or chemical specifications are considered unsuitable for export and classified as non-prime / downgrade.

During the inquiry period a very small portion of these non-prime /

downgrade products were Alloy HSS.

4.3.2. Third country sales

- a) Did you sell alloyed HSS to any other export market(s) (besides Australia) during the relevant inquiry period?
- b) If the answer to the above is yes:
- i. Provide a full description of all types of alloyed HSS sold to those markets, including:
 - a description of model of those goods
 - what alloy(s) are included in those goods and in what quantities
 - ii. Identify which (if any) of this alloyed HSS are identical to alloyed HSS exported to Australia during the inquiry period.
 - iii. If applicable, explain how alloyed HSS sold on to third country markets differ from alloyed HSS sold to Australia:
 - physically;
 - through their manufacturing process; or
 - in purpose/end use.

During the inquiry period Dalian Steelforce exported a range of Carbon steel and Alloy HSS to destination markets other than Australia, predominantly [REDACTED].

Refer to the product range set out in 4.2.1 above (and Appendix 1 “App 01 - Product Description”). This product range offered to the Australian market is the same as the HSS product range offered to third country markets.

We are unable to accurately identify the volume of Alloy HSS exported to destination markets other than Australia. However, the timing and mix of HSS exports (between Carbon steel and Alloy HSS) to destination markets other than Australia, would be similar to the exports to Australia.

4.4. Manufacturing process

Fully describe your manufacturing process of:

- alloyed HSS; and

PUBLIC RECORD

- non-alloy HSS

Outline any particular differences in the production process of each of these goods, paying particular attention to the addition of alloys to the products.

Dalian Steelforce’s range of HSS is manufactured utilising electric resistance welding (ERW) technology. ERW HSS is manufactured by cold-forming a sheet of slit coil into a cylindrical shape. Current is then passed between the two edges of the coil to heat the steel to a point at which the edges are forced together to form a bond without the use of welding filler material. This in-line cylindrical length of steel is then formed by rollers into circular, square, rectangular or oval shapes. A protective coating such as paint is applied and the HSS is then cut to length and bundled into packs for export in containers.

The primary difference in the manufacturing process between Alloy HSS and Carbon steel HSS relates to [REDACTED]

[REDACTED]. [Description of production differences]

4.5. Costing information

- a) Are there any differences between the cost to make and sell non-alloy HSS and alloyed HSS? If yes, provide details of these differences including differences in:
 - i. raw material costs;
 - ii. manufacturing overheads; and
 - iii. any other costs.

The cost to make and sell HSS is heavily influenced by [REDACTED]

[REDACTED]

[Description of factors affecting price]

- b) Provide a calculation of the difference in cost to make and sell non-alloy HSS and alloyed HSS, ensuring you itemise each individual cost difference.

Provide supporting evidence of this calculation (e.g. raw material invoices) and explain the calculation (including assumptions).

PUBLIC RECORD

You may wish to submit this as an additional spreadsheet in the **Exporter Questionnaire – HSS AC** Excel workbook.

During the inquiry period, Dalian Steelforce manufactured either Carbon steel HSS or Alloy HSS, [REDACTED]. [product details]. Therefore, due to the variations in specifications and in time periods, we are unable to quantify the difference in the cost to make and sell Alloy HSS compared to Carbon Steel HSS.

4.6. Purpose and end use

a) Described the purpose(s) and end use(s) of:

- i. non-alloy HSS; and
- ii. alloyed HSS (non-alloy HSS).

All HSS exported into Australia is sold to [REDACTED] [customer names] for distribution into the Australian steel market.

b) Are there any specific purpose(s) and/or end use(s) that alloyed HSS you export are suitable for that non-alloy HSS are not suitable for? Provide details and supporting evidence where possible.

[REDACTED] on-sells Alloy and Carbon steel HSS to [REDACTED] for distribution into the Australian steel market. The ultimate end use of all HSS is wide and varied across many industry segments, including: steel fabrication; rural sector; residential construction; non-residential construction; etc.

Dalian Steelforce is not in a position to comment on the end use of the HSS products. Suitability of the products is generally determined by compliance with the relevant Standards. All HSS supplied by Dalian Steelforce is compliant with applicable Standards.

c) Are there any purpose(s) and/or end use(s) that alloyed HSS and non-alloy HSS can be used interchangeably for?

Refer to the previous response in 4.6 (c).

d) What Standards/specifications are your non-alloy and alloyed HSS manufactured/supplied to when exporting to Australia?

PUBLIC RECORD

All HSS is compliant with at least one of the following standards:

- AS/NZS 1163:2009 Cold-formed structural steel hollow sections;
- AS 1074 Steel tubes and tubulars for ordinary service; and
- Internal standards.

e) If you are doing so, why are you supplying a mix of alloyed HSS and non-alloy HSS to Australia?

The mix of Alloy HSS and Carbon steel HSS exported into Australia by Dalian Steelforce is determined by [REDACTED] [factors affecting production].

4.7. Open comments

If your company wishes to make any general comments about whether it has engaged in a circumvention activity through the slight modification of non-alloy HSS (for the purposes of as outlined in Regulation 48(2) of the *Customs (International Obligations) Regulation 2015*), it may take the opportunity to do so in response to this questionnaire.

Alternatively, separate submissions to the investigation may be made directly to the Commission at the following address:

The Director
Operations 2 - Anti-Dumping Commission
Department of Industry and Science
GPO Box 9839
Canberra ACT 2601

or by email at operations2@adcommission.gov.au.

Interested parties wishing to participate in the inquiry must ensure that submissions are lodged promptly as legislative timeframes and restrictions apply to the receipt and consideration of submissions.

Refer to Australian Dumping Notice 2015/58 for further information on these restrictions.

PUBLIC RECORD

In reviewing the Australian industry's claims made in its application, Dalian Steelforce does not consider that it has presented statements to the Commission that are consistent with statements it has made in the Standards Australia Steel Products and Welding Standards Committees regarding HSS products containing Boron. Given that the discussions of the Standards Australia Committees are confidential, Dalian Steelforce considers that it is essential and necessary for the Commission to request directly from the Australian industry, information and views that it has presented to the Standards Australia Committees that contradict information and views presented to the Commission.

5. EXPORTER'S DECLARATION

I hereby declare that.....(company) have completed the attached questionnaire and, having made due inquiry, certify that the information contained in this submission is complete and correct to the best of my knowledge and belief.

I hereby declare that.....(company) did not, during the period of inquiry, export alloyed HSS and therefore have not completed the attached questionnaire.
