**Background:**

SPC Ardmona Operations Ltd (SPCA) contacted the Anti-Dumping Commission (the Commission) after the statement of essential facts (SEF 216) was published on 28 October 2013. SPCA requested a meeting regarding the contents of the reports on the electronic public record and the submission process. A meeting was arranged at SPCA's premises in Melbourne.

**Discussed:**

The Commission explained the overall investigation and submission process to the company. SPCA provided a meeting agenda prior to the visit, outlining the main issues of concern for them. The following specific issues were discussed:

Exporter reports

- The Commission provided an explanation of the various adjustments made in the exporter visit reports
- Standard grade versus choice grade products

- The treatment of non-arm's length transactions
- Calculations of costs of production
- Normal value calculations
- Weighted average methodology
- SPCA raised issues of product categories and levels of trade and model matching of products

#### Statement of Essential Facts

- General discussion of timing of submissions, final report to the Minister and decisions

#### General

- Legislative amendments
- Methodology for applications in general

SPCA was advised to contact the Commission to clarify any further matters in relation to this investigation.
