PUBLIC VERSION

23 December 2015

Mr Dale Seymour
Commissioner
Ant-Dumping Commission
Level 35
55 Collins Street
Melbourne VIC 3001

Dear Commissioner,

Review of hollow structural sections exported by Dalian Steelforce

Thank you again for taking the time to visit the Steelforce Brisbane facility this week. We appreciate the opportunity to present an overview of the Steelforce business model in the Australian Steel Industry and to clarify certain matters in relation to the ongoing Review of Measures. The meeting served to allow Steelforce to present its opinion on certain approaches taken by the Anti-Dumping Commission (Commission) in determining potential future duties. These opinions have been documented in the various submissions made by Steelforce and lodged with the Commission.

As discussed, in light of the recent Federal Court decision, I would be grateful if you would provide me with information on the expected timing of the recalculation of the revised dumping duties applicable to Steelforce. We are very keen to work with the Commission to progress this to completion as soon as possible.

Yours Sincerely,

Rod Corkill
CEO
Steelforce Group
