Subject: Anti- Circumvention Case - Capral

Jukka,

As discussed in our last meeting, Capral understands that this case is a large case with many 'tentacles'. With this in mind Capral makes the following points

- Capral is seeking the Commission to prioritise and fully investigate the allegations of transshipment by [company] as detailed and evidenced by [company], including the offer and statements surrounding [company] and others that were [offer]. This part of the case is further strengthened by the additional information provided by [person] [company].
- Capral also notes that it is of a strong belief that [investigation], appears to be the best way to [evidence]. Would suggest this should be in conjunction with [entity] and [entity]. Additionally I am hoping that [entity] is providing you information from [investigation]."

[person]
