Public File Version

Dear Sir/Madam

Investigation No- 422 Aluminium extrusion exports from China by Guangdong Jiangsheng Aluminium Co; Ltd and Guangdong Zhongya Aluminium Company Ltd and Thailand

INEX is an Australian and New Zealand manufacturer of Aluminium Extrusions. We have manufacturing facilities in Melbourne, Brisbane and Hamilton NZ. INEX produces (see Appendix 1) MT in Australia and (see Appendix 1) MT in New Zealand for commercial sales annually.

We fully support the application for dumping by Capral Australia Limited as we have also been severely injured by exports from China and Thailand. Our injury is, "price suppression" of the market price of Aluminium Extrusion in the Australian market.

Due to the price level in the Australian market of the dumped aluminium extrusion from China and Thailand we have been unable to achieve a price increase on our "margin over the aluminium metal value" since 2012 (see Commercial-in-Confidence Appendix 1). During this time, we have had substantial increases in all manufacturing costs - wages, energy, transport, production consumables, etc.

The dumped imports from China and Thailand have suppressed the selling price of aluminium extrusion and have injured our capital investments in Australia and New Zealand.

Should you require additional information please contact me directly.

Yours sincerely

Tyrone D'Souza
Company Secretary
