

ANTI-DUMPING NOTICE NO. 2014/33

Wind Towers

Exported from People's Republic of China and

the Republic of Korea

Findings in Relation to a dumping investigation

Customs Act 1901 – Part XVB

I, Dale Seymour, Commissioner of the Anti-Dumping Commission have completed the investigation, which commenced on 28 August 2013, into the alleged dumping of wind towers ("the goods"), exported to Australia from the People's Republic of China (China) and the Republic of Korea (Korea).

A full description of the goods is available in Anti-Dumping Notice (ADN) No. 2013/68 (relating to the initiation) and is available on the internet at <http://www.adcommission.gov.au>

Findings and recommendations were reported to the Parliamentary Secretary to the Minister for Industry (the Parliamentary Secretary) in *Anti-Dumping Commission Report No. 221 (REP 221)*, in which it outlines the investigations carried out by the Commission and recommends the publication of a dumping duty notice in respect of the goods. The Parliamentary Secretary has considered REP 221 and has accepted the recommendations and reasons for the recommendations, including all material findings of fact or law on which the recommendations were based, and particulars of the evidence relied on to support the findings.

Notice of the Parliamentary Secretary's decision was published in *The Australian* newspaper and the *Commonwealth of Australia Gazette* on 16 April 2014.

In REP 221, it was found that:

- Wind towers exported from China and Korea to Australia were dumped with margins ranging from 15% to 17.2%;
- the dumped exports caused material injury to the Australian industry producing like goods; and
- continued dumping may cause further material injury to the Australian industry.

The duty that has been determined is an amount worked out in accordance with the ad valorem duty method, as detailed in the table below.

Particulars of the dumping margins established for each of the exporters and the effective rates of duty are set out in the following table.

Country	Manufacturer / exporter	Dumping margin	Effective rate of interim dumping duty	Duty method
China	Shanghai Taisheng	15.0%	15.0%	Ad valorem duty method
	All other Chinese exporters	15.6%	15.6%	
Korea	Win&P	17.2%	17.2%	
	All other Korean exporters	18.8%	18.8%	

Measures apply to goods that are exported to Australia and entered for home consumption after publication of the Parliamentary Secretary's notice.

Any dumping securities that have been taken on and from 6 December 2013 will be converted to interim dumping duty.¹ Importers will be contacted by the Australian Customs and Border Protection Service National Temporary Imports and Securities Section in their respective capital city detailing the required conversion action for each security taken.

To preserve confidentiality, the export price, normal value and non-injurious price will not be published. Bona fide importers of the goods can obtain details of the rates from the Dumping Liaison Officer in their respective capital city. Clarification about how measures securities are applied to 'goods on the water' is available in ACDN 2012/34, available at the Commission website.

Interested parties may seek a review of this decision by lodging an application with the Anti-Dumping Review Panel in accordance with the requirements in Division 9 of Part XVB of the Act within 30 days of the publication of the Parliamentary Secretary's notice.

REP 221 has been placed on the Commission's public record, which may be examined at the Commission office by contacting the Case Manager on the details provided below. Alternatively, the public record is available at www.adcommission.gov.au.

Enquiries about this notice may be directed to the case manager on telephone number (02) 6245 5434, fax number 1300 882 506 or +61 2 6275 6888 (outside Australia) or ops1@adcommission.gov.au.
