

**ADDENDUM TO SUPPLEMENTARY GOVERNMENT QUESTIONNAIRE –
PEOPLE’S REPUBLIC OF CHINA (CHINA)
DEEP DRAWN STAINLESS STEEL SINKS EXPORTED FROM CHINA**

ADDITIONAL NEW SUBSIDY PROGRAM IDENTIFIED

The Anti-Dumping Commission (the Commission) has identified a potential new countervailable subsidy program that will be considered in the Commission’s investigation into deep drawn stainless steel sinks exported from China.

The Commission identified this new program based on information provided by a cooperating exporter, and an assessment of the relevance of that exporter’s information.

The details for this program are as follows:

Program Number	Program Name	Program Type	Additional information
Program 24	Preferential Tax Policies for High and New Technology Enterprises	Income Tax	Reduced income tax rate (15%) for “high and new technology” enterprises

Note: the program title is to the best of the Commission’s knowledge and may simply be a description of the program. Consequently, the program title may not exactly reflect any official titles that the GOC has in place.

This new program will be investigated alongside the 15 new programs identified in the Supplementary Government Questionnaire (SGQ) sent to the Government of China (GOC) on 22 August 2014, and in addition to the eight original programs identified in the Government Questionnaire sent to the GOC on 31 March 2014.

QUESTIONS AND RESPONSE

The GOC is requested to include information about this new program in its completed SGQ, due by **COB 15 September 2014**.

The GOC is specifically requested to address Program 24 in its response to the questions raised in the SGQ regarding new subsidy programs (refer to pages 11-12 of the SGQ for the full list of questions).

Please refer to the SGQ for instructions on how to complete and lodge the SGQ.
