Subject: RE: G James Extrusion Co Pty Ltd questionnaire response

Hi Tim,

The major issue we see with the apparent lack of questionnaire responses or submissions by the Australian producers said to be supporting Capral, other than G James, is its indication that material injury by reason of dumping, as alleged by Capral, is not being suffered by the Australian industry as a whole, bearing in mind that Capral has less than 50% of Australian production of the GUI.

Regards,
Roger
