Ms Andrea Stone  
Manager – Anti-Dumping Commission  
Customs House  
Constitution Avenue  
Canberra Act 2600

Dear Andrea

**Re Anti-Dumping Investigation No. 238 – Certain deep drawn stainless steel sinks exported from China. Submission by importer.**

We understand that Tasman Sinkware Pty Ltd does not manufacture industrial wash basins - a product that we import which at this time is being considered as falling into the products description for the anti-dumping investigation into deep-drawn sinks from China.

The wash basins we import are not set into bench tops but are supplied with a pair of angle brackets for fitting to walls. They have a 35mm folded front edge with a 75mm turn up at the rear as a splashback. The front profile of the bowl is curved while the back bowl profile is straight with a slant inwards to the water outlet. They are generally used in workshops and cleaners rooms.

These items in no way compare with sinks produced by Tasman and we ask that The Commission considers exempting these from anti-dumping measures.

Regards

Ann Kerr

General Manager
