**To** Ms Andrea Stone, Director, Operations 2 - Australian Anti-Dumping Commission

**From** Andrew Lumsden / Andrew Percival

**Date** 10 October 2014

**Subject** **Dumping & Subsidy Investigation – Stainless Steel Sinks – Request for revision to level of securities for Primy Corporation Limited**

---

Dear Ms Stone

Non-Confidential

As you are aware, we act for Primy Corporation Limited (**Primy**) in this investigation.

We refer to Anti-Dumping Notice No. 2014/70 in which the Commissioner of the Anti-Dumping Commission (**Commission**) made a Preliminary Affirmative Determination (**PAD**) published on 13 August 2014

- finding a preliminary dumping margin of 42.4% for Primy; and
- determining that securities should be required and taken under section 42 of the *Customs Act 1901* in respect of interim dumping duty that may become payable in respect of the goods exported from China entered from home consumption on or after 13 August 2014.

In determining to apply the securities, the Commissioner was satisfied that the securities were necessary to prevent material injury occurring to the Australian industry while the investigation continues.

However, subsequent to the Commission's verification visit to Primy, the Commission published a verification report on Primy on 2 October 2014 finding a dumping margin of 4.9% for Primy.

Accordingly, we believe that the application of a security at the rate of 42.4% on the subject goods exported from Primy is no longer justified as that level of security is no longer necessary to prevent material injury (if any) occurring to the Australian industry. We, therefore, request the Commission to, based on the verified information of Primy, revise the level of security applicable to Primy to 4.9%, and that this revised level of security be applied to all existing securities applied and to be applied to Primy.

We would be grateful if you could confirm whether the requested revision to the level of security above is to be made.

If you have any queries, please let us know.
