

Investigation No 507A

Power transformers exported to Australia from the People's Republic of China

Note for file

Notification of an extension of time to issue the Final Report

On 8 October 2021, the Commissioner of the Anti-Dumping Commission (the Commissioner) published a Statement of Essential Facts for Investigation No 507A (SEF 507A), which resumed the investigation into power transformers exported to Australia from the People's Republic of China.¹ SEF 507A followed the Anti-Dumping Review Panel's (ADRP) revocation of the Commissioner's decision to terminate the investigation, as explained in ADRP Decision Nos 122 and 123.²

In SEF 507A, the Commissioner outlined his intention to provide a final report and recommendations to the Minister in relation to the investigation on or before 22 November 2021, unless the Commissioner terminates the investigation earlier or requires further time to consider submissions to SEF 507A.

The ADRP has recommended ADRP Review No 122 in so far as it relates to ABB Chongqing Transformer Co Ltd (ABB Chongqing), Siemens Transformer (Jinan) Co Ltd (Siemens Jinan) and Siemens Transformer (Wuhan) Co Ltd (Siemens Wuhan) following orders from the Full Federal Court of Australia.³ The Anti-Dumping Commission requires further time to allow for the ADRP to complete its review before finalising the investigation. In addition, further time is required as a result of the Anti-Dumping Commission's ongoing business requirements.

Accordingly, the Commissioner now intends to provide a final report and recommendations to the Minister on, or before, **20 September 2022**, unless the investigation is terminated earlier.

23 May 2022

¹ With the exception of ABB Chongqing, Siemens Jinan and Siemens Wuhan.
