Mr Geoffrey Gleeson
Director Operations 1
Anti-Dumping Commission
Customs House
5 Constitution Avenue
CANBERRA CITY, ACT 2601

Dear Mr Gleeson,

ADC 219 — Wilson Transformer Company (WTC) Product Range

One of the respondents to the Dumping Application, Toshiba International, made certain representations in letter dated 10 June 2014 (Doc 113) with respect to WTC's product range based on web site information and products actually produced.

As the ADC is well aware, WTC –

1. Had the capability to produce the range of products covered by the dumping application, despite what is present on our current "out of date" website, and
2. Had tendered unsuccessfully to a number of transmission utilities for the upper range products covered by the Dumping Application during the investigation period.

I wish to advise that **WTC has manufactured and successfully tested a 550MVA 330/132kV power transformer**, which product is larger than most of the upper range power transformers covered by the Dumping Application.

Should you require any additional information, please do not hesitate to contact Robin Winckworth or me.

Yours sincerely

A handwritten signature in blue ink that reads "Robert Wilson".

Robert Wilson
Managing Director
