

CONTINUATION INQUIRY 611

ZINC COATED (GALVANISED) STEEL EXPORTED FROM THE PEOPLE'S REPUBLIC OF CHINA, THE REPUBLIC OF KOREA AND TAIWAN

File Note

The purpose of this file note is to correct the specified expiry date in Anti-Dumping Notice (ADN) 2023/035.

On 29 June 2023, the Minister for Industry and Science (the Minister) signed ADN 2023/035.¹ This ADN outlined the Minister's decision to continue the measures applying to zinc coated (galvanised) steel exported from The People's Republic of China, the Republic of Korea and Taiwan, following the recommendations made by the Commissioner of the Anti-Dumping Commission in Report 611.

In ADN 2023/035, the specified expiry date is inadvertently noted as 7 August 2023. This should have been **5 August 2023**, as noted on the Anti-Dumping Commission's Dumping Commodity Register and the 'Expiry of anti-dumping measures' notice (ADN 2022/047).

The effect of the Minister's decision is that the measures will continue on and from 6 August 2023.

¹ Electronic Public Record 611, document no 30.
