

ANTI-DUMPING NOTICE NO 2024/006

Customs Act 1901 – Part XVB

PVC flat electric cables

Exported from the People’s Republic of China

Findings of the Continuation Inquiry No 626

Public Notice under subsection 269ZHG(1) of the Customs Act 1901

The Commissioner of the Anti-Dumping Commission (the Commissioner) has completed an inquiry, which commenced on 9 June 2023, into whether the continuation of the anti-dumping measures in the form of a dumping duty and countervailing duty notice applying to PVC flat electric cables (the goods) exported to Australia from the People’s Republic of China (China) is justified. Exports of the goods from Guilin International Wire & Cable Group Co Ltd and its related entities¹ are not covered by this inquiry, as the measures currently in place which are the subject of this inquiry do not apply to those companies’ exports of the goods.

Recommendations resulting from this inquiry, reasons for the recommendations, and material findings of fact and law in relation to the inquiry are contained in the *Anti-Dumping Commission Report No 626* (REP 626).

I, ED HUSIC, the Minister for Industry and Science, have considered REP 626 and have decided to accept the recommendation and reasons for the recommendation, including all the material findings of facts and law therein and have decided that the anti-dumping measures applying to the goods exported to Australia from China should continue from 15 May 2024.

Under subsection 269ZHG(1)(b) of the *Customs Act 1901* (the Act), I **declare** that I have decided to secure the continuation of the anti-dumping measures currently applying to the goods exported to Australia from China.

I **determine**, pursuant to paragraph 269ZHG(4)(a)(iii) of the Act, that the dumping duty notice continues in force after 14 May 2024 (the specified expiry day), but that, after that day, the notice has effect as if different specified variable factors had been fixed in relation to all exporters from China.

¹ Including Guilin Feilong Wire and Cable Ltd, Guilin Xianglong Wire and Cable Ltd, Guilin Fortune Import and Export Trading Co. Ltd, Guilin Yuanhai Import and Export Trading Co. Ltd, Interest Link Co. Ltd and Guangxi Machinery Import and Export Co. Ltd.

In accordance with subsection 8(5BB) of the *Customs Tariff (Anti-Dumping) Act 1975* (Dumping Duty Act), and the *Customs Tariff (Anti-Dumping) Regulation 2013* (the Regulation), the dumping duty that has been determined is an amount worked out in accordance with the combination of fixed and variable duty method pursuant to subsections 5(2) and (3) of the Regulation as detailed in the table below.

I **determine**, pursuant to section 269ZH(4)(a)(iii) of the Act, that the countervailing duty notice continues in force after 14 May 2024 (the specified expiry day), but that after this day the notice has effect in relation to all exporters as if different specified variable factors had been fixed in relation to all exporters from China.

In relation to Jiangsu Etern Electric Co Ltd, pursuant to section 8(5BA) and 10(3D) of the Dumping Duty Act, I have had regard to the desirability of specifying a method, such that the sum of:

- the export price of goods of that kind as so ascertained
- the interim dumping duty payable on the goods, and
- the interim countervailing duty payable on the goods,

does not exceed the non-injurious price of goods of that kind, as ascertained for the purposes of the notices. For all other exporters of the goods, these amounts do not exceed the non-injurious price, and therefore, a lesser amount of duty has not been applied.

Particulars of the dumping and subsidy margins established for each of the exporters and the effective rates of duty are also set out in the following table.

Exporter	Dumping Margin	Subsidy Margin	Effective combined rate of interim dumping and countervailing duties*	Duty Method
Jiangsu Etern Electric Co Ltd	23.1%	0.1%	11.9%	Combination of fixed and variable duty method
Nanyang Cable (Tianjin) Co. Ltd	31.8%	0.0%	31.8%	Combination of fixed and variable duty method
Uncooperative and all other exporters	31.8%	3.3%	32.4%	Combination of fixed and variable duty method

* The calculation of combined dumping and countervailing duties is not simply a matter of adding the dumping and subsidy margins together for any given exporter, or group of exporters. Rather, the collective interim dumping duty and interim countervailing duty imposed in relation to the goods, is the sum of:

- the subsidy rate calculated for all countervailable programs, and
- the dumping rates calculated, less an amount for the subsidy rate applying to Program 1.

Interested parties may seek a review of this decision by lodging an application with the Anti-Dumping Review Panel (www.adreviewpanel.gov.au), in accordance with the requirements in Division 9 of Part XVB of the Act, within 30 days of the publication of this notice.

REP 626 has been placed on the public record, which may be examined at the Anti Dumping Commission Office by contacting the case manager on the details provided below. Alternatively, the public record is available at www.adcommission.gov.au
