

ANTI-DUMPING NOTICE NO. 2024/033

Customs Act 1901 – Part XVB

Certain Aluminium Zinc Coated Steel Exported from the People’s Republic of China Findings in relation to an Accelerated Review No 641 of Anti-Dumping Measures

Public Notice under section 269ZG(3) of the Customs Act 1901

The Acting Commissioner¹ of the Anti-Dumping Commission has completed the accelerated review, which commenced on 23 February 2024, of the anti-dumping measures applying to certain aluminium zinc coated steel (the goods) exported to Australia from the People’s Republic of China by Zhejiang Huapu Eco-Friendly Materials Co Ltd (the applicant).

Recommendations resulting from that review, reasons for the recommendations and material findings of fact and law in relation to the review are contained in *Anti-Dumping Commission Report No. 641* (REP 641).

I, ED HUSIC, the Minister for Industry and Science, have considered REP 641 and have decided to accept the recommendations and reasons for the recommendations, including all the material findings of facts and law set out in REP 641.

Under section 269ZG(3) of the *Customs Act 1901* (the Act), I declare that, with effect from 23 February 2024, the Act and the *Customs Tariff (Anti-Dumping) Act 1975* (the Dumping Duty Act) have effect as if the original dumping duty notice and countervailing duty notice had applied to the applicant but the Parliamentary Secretary had fixed specified different variable factors relevant to the determination of duty.

I determine, pursuant to section 8(5) of the Dumping Duty Act, that the interim dumping duty (IDD) payable on the goods exported to Australia from China by the applicant is an amount worked out in accordance with the floor price duty method as set out in sections 5(4) and 5(5) of the *Customs Tariff (Anti-Dumping) Regulation 2013*.

I direct, pursuant to section 10(3B) of the Dumping Duty Act, that the interim countervailing duty (ICD) payable on the goods exported to Australia from China by the applicant is a proportion of the export price of the goods.

Particulars of the rates of IDD and ICD are as detailed in the table below.

¹ References in this document to individuals holding positions within the Anti-Dumping Commission are references to whoever occupies the position at the time. This includes when the position is held in an acting capacity.

Exporter/country	Effective rate of interim dumping duty	Effective rate of interim countervailing duty	Duty Method
Zhejiang Huapu Eco-Friendly Materials Co Ltd	N/A	0.4%	<ul style="list-style-type: none"> • Dumping: floor price duty method • Countervailing: proportion of the export price of the goods

IDD will be payable on the goods exported by the applicant only when the actual export price is below the floor price which is a specified (confidential) amount per tonne as per Confidential Table 1 to this notice. To preserve confidentiality, details of the specified different variable factors will not be published. The actual duty liability may be higher than the effective rate of duty due to several factors.

REP 641 has been placed on the public record, available at www.adcommission.gov.au. If you are an affected party seeking further information regarding the actual duty liability calculation, have a general enquiry regarding this accelerated review, or wish to examine REP 614 at the Anti-Dumping Commission office, you may contact the Anti-Dumping Commission on 13 28 46 or at clientsupport@adcommission.gov.au.

Dated this 11 day of JUNE 2024

ED HUSIC
Minister for Industry and Science
