Silicon metal company of China

After more than 60 years of development from 1957 , more than 600 industrial silicon enterprises have been put into operation in China, and more than 200 companies are still in production. Chinese metal silicon manufacturers can produce products that meet any specifications of the user. Whether it is silicon metal 553, 441, 2202, 3303, 1101, etc., it is a higher purity metal silicon product.

Hensfate Metal Co., Ltd. was established in 2005. It is located in Lanzhou, an important city on the ancient Silk Road. It has convenient transportation, developed communications, rich resources, and superior geographical location. We are a professional exporter of metal silicon and by-product ferroalloys. The company has high Quality staff and R&D team. Relying on the business policy of "integrity management, quality first, mutual benefit" and the unremitting efforts of the company's leaders and all employees, the company has developed into a well-known enterprise in the same industry in China, contributing to the development of the steel, photovoltaic and electrolytic aluminum industries

Silicon metal company of China

There are less than 50 actual silicon metal manufacturers in more than ten countries producing industrial silicon abroad, and there are more than 200 metal silicon manufacturers in China, which are scattered in different industries such as nonferrous metallurgy, ferrous metallurgy, machinery and chemical industry in.

China has many metal silicon manufacturers and a large annual output, which plays a pivotal role in the development of the world silicon industry and related industries. China's silicon metal manufacturers have unique advantages, early silicon metal exports into a rising trend year by year , Although China's metal silicon manufacturers still have many problems, it is believed that with the development of the times, China's metal silicon products and China's metal silicon factories can give the world a satisfactory answer.
