

Exhibit B-1 EPR 691 submission analysis

China Chamber of Commerce of Metals, Minerals & Chemicals Importers & Exporters

16 February 2026

We have prepared this exhibit to assist the Commission in its interpretation of the numerous submissions made by various parties. The tables below identify the interests of each submitting party and whether a generic template was copied. This analysis covers all submissions on the EPR 691 up to the Commission's 60 Day Status report (27 January 2026).

It is observed that, amongst submissions expressing opposition to the Ventora and AGWA application, 16 were "unique" submissions, being original submissions with substantive comments and evidence, rather than simply being a submission in the form of endorsing a template statement. By comparison for submissions expressing support of the Ventora and AGWA application, there were only 8 "unique" submissions.
