In the warm applause, Comrade Guo Jindong, Chairman of the Group and Secretary of the Party Committee, made an important speech. He said that the Communist Party of China is a great, glorious and correct Marxist party. Adhering to the leadership of the party and strengthening party building are the fundamental guarantee for the company's development to always advance in the correct direction and achieve major achievements. Over the past 30 years, GPRO Group has been firm in its conviction and forge ahead. At every important node of reform and development, every major breakthrough in overcoming difficulties, and every important stage of reorganization and integration, it has closely relied on the role of the party organization and all party members. Play and have won again and again. In the first half of this year, on the basis of standardizing and implementing the normalization of epidemic prevention and control and the main responsibility of safe production, all enterprises accurately recognized changes, responded scientifically, actively sought changes, and promoted excellent results in various production and operation tasks.

He pointed out that entering the "14th Five-Year Plan", we are facing a more complex economic environment and fiercer competition in the industry. However, no difficulties can stop us from realizing our great dreams. 2021 has passed halfway, sorting out the work for the whole year and comparing with the annual target, the situation is still very grim, and the task is still very arduous. We must, with the sense of responsibility of "doing nothing in the day and hard to sleep at night" and the dedication of "accepting orders in the morning, drinking ice at night", we must firmly carry on the historical mission of serving the country by industry, and be the pioneers, pioneers, and pioneers who are at the forefront of the times. Contributors, carry forward the spirit of selfless dedication, innovation and development, pioneering cattle, and hard work for the old scalpers, and blaze a "blood path" in the fierce market competition, and take the lead in high-quality development. Industry leaders in innovation capabilities and core competitiveness of the industry sprint at full speed.

He commemorated the party's birthday, further gave full play to the political leadership and pioneering role of the group's party organizations at all levels and the majority of party members in the new GPRO's new round of strategic development vision, and worked hard to accomplish this year's goals and tasks, and made five points: 1. It is to practice intrinsic safety and achieve a longer safety cycle. It is necessary to take the opportunity of creating a green comprehensive evaluation category A enterprise to continuously improve the level of intrinsic safety and build a firm safety barrier for the enterprise. The second is to implement the standardization and strive to enhance core competitiveness. Aiming to build the industry leader in the new stage, reduce the cost of per ton of product and increase the benefit of per ton of product; the third is to practice innovation-driven and stimulate the strongest vitality of enterprise development. Vigorously implement the innovation-driven development strategy, make every effort to strengthen the R&D innovation engine, continuously improve the level of automation, intelligence, and informatization, eliminate the risk of "stuck neck", forge "killer" technology, and enhance the industry's right to speak and influence; the fourth is to practice People-oriented, to create a harmonious development environment. Continuously improve the talent development mechanism, speed up the construction of the three teams of "elite management, technological innovation, and skilled craftsmanship", and form a "green channel" for talents and entrepreneurs. Fifth, we must practice party building, observe the general situation, seek the overall situation, and grasp the fundamentals. In accordance with the general requirements of strengthening party building in the new era, give full play to the leadership and political core roles of direction, overall management, and implementation, closely integrate party

building and central work, fully implement the party's responsibility for party governance, and provide high-quality development for the group Solid political guarantee.

Secretary Guo Jindong pointed out that looking back on history, we have worked tirelessly and are proud of history; based on the present, we bend and plan to be worthy of the present; looking to the future, we will draw a blueprint and be confident in the future. Xiongguan Mandao is really like iron, and now it's stepping forward from the beginning! Forging ahead on a new journey, each of us is a witness and participant of the times. Let us take Xi Jinping's thoughts on socialism with Chinese characteristics for a new era as a guide, center on the overall strategic goals of the group, fight hard, work hard, continue to struggle, and move forward firmly, with a more inspiring spirit, a more pragmatic style, and more powerful measures. Over fulfilling the annual target and task, presenting a gift to the 30th anniversary of the establishment of the group! Contribute to the centenary of the founding of the Communist Party of China! For the GPRO Group to take the lead in the high-quality development of a new

road, to make new and greater contributions to the realization of the Chinese dream of the great rejuvenation of the Chinese nation!

At the end of the meeting, Deputy Secretary Sun Cheng asked the group's party organizations at all levels and the majority of party members to earnestly study, publicize and implement the spirit of Secretary Guo Jindong's speech at the group's celebration of the 100th anniversary of the founding of the Communist Party of China. Focusing on the goals and tasks of the whole year, we will go all out to do all the work in the second half of the year. Party members must keep their mission in mind, be down-to-earth, and set an example for employees, create benefits for GPRO, and add to the party flag.
