Anti-Dumping Commission

Investigation 706

Zinc coated (galvanised) steel

Exported to Australia from the Republic of Korea and the Socialist Republic of Vietnam

FILE NOTE

Meeting with POSCO

On 10 September 2026, staff from the Anti-Dumping Commission (the commission) met with representatives of POSCO (POSCO), an exporter in *Investigation 706 - Zinc coated (galvanised) steel exported from Korea and Vietnam*.

POSCO discussed the complexity of Investigation 706, and the need for the commission to consider duties on similar coated steel products in conducting this investigation. POSCO also discussed differences in the goods description for Investigation 706 with the goods description on other coated steel products and how this might affect the commission's consideration of injury to the Australian industry.
