The Anti-Dumping Commission (Commission) met with representatives of Donhad and Moly-Cop on 11 May 2018.

At the meeting, Donhad and Moly-Cop provided the Commission with their views on:

- changes to the Australian market structure for alloy round bar following the acquisition of Donhad by Moly-Cop in November 2017, and
- the impact these changes are likely to have on an assessment by the Commission that material injury due to dumped goods may continue in the future.

Donhad and Moly-Cop advised the Commission of their intention to make a formal submission on these matters.
