

# Document of Anhui Price Bureau

Wanjiashang [2016] No.82

## Notice of Anhui Price Bureau on adjusting Electricity Price

To all City, County Price Bureau, Provincial Power Company, and the Relevant Power Generation Enterprises:

According to Notice of National Development and Reform Commission on Lowering Coal-fired Electricity on-grid Price and General Industrial and Commercial Electricity Price (Fagaijiage[2015] No.3105), on relevant requirements of canceling all electricity price concessions for fertilizers, and checked by the National Development and Reform Commission and approved by the Provincial Government, we decide to adjust the relevant electricity price. The relevant items are hereby notified as follows:

### I. Adjust the grid purchase price of some units

The grid purchase price of coal-fired generating units (including generating units of combined heat and power generation and comprehensive utilization) which is higher than the benchmarking price of coal-fired generating units(including desulfurization, denitration, and dust removal price) in our province decreases to the unified benchmarking price of coal-fired generating units of RMB 0.3693 per Kwh.

The grid purchase price of small hydro is higher than the benchmarking price of coal-fired generating units because of historical problems. According to the document (Wanjiashang [2015] No.56) of our Bureau, the benchmarking desulfurization, denitration, and dust removal price of coal-fired generating units shall be executed.

The above price shall be executed since June 1, 2016.

### II. Adjust electricity price of power grid.

(I) Cancel the price favorable of the production of small and medium-sized fertilizer. The price favorable of the production of small and medium-sized fertilizer will be canceled since April 20, 2016; the production electricity price of small and medium-sized fertilizer and the basic electricity price shall all be executed according to the big industrial electricity price. Considering the characteristics of electrical load of small and medium-sized fertilizer enterprises, the peak-valley electricity prices in different time will be executed one year later after the cancel of price favorable.

(II) Lower the price of general industrial and commercial electricity and others' electricity. The price of general industrial and commercial electricity and others' electricity of our province will be reduced by RMB 4.272 cents per Kwh since June 1, 2016; other electricity prices are not adjusted.

III. Local price authorities should organize and arrange carefully, do a good job of propaganda and interpretation. If there is any problem in the implementation, please report to the Bureau.

## Appendix 2

**Electricity Sale Schedule of Anhui Province Grid**

Unit: Yuan / KW h

Electricity Utilization Category	Voltage Category					Basic Fee	
	Less than 1 kv	1-10kv	35kv	110kv	220kv	Maximum Demand (Yuan/KV Month)	Transformer Capacity (Yuan/KV Month)
I. Residential Electricity	0.5653	0.5503					
II. General Industry and Commercial Electricity	0.7793	0.7643	0.7493				
III. Large Scale Industrial Electricity		0.6460	0.6310	0.6160	0.6060	40	30
IV. Agricultural Electricity	0.5558	0.5408	0.5258				
Including: Impoverished county agriculture irrigation and drainage	0.3516	0.3366	0.3216				

Note: 1. The tariffs listed in the above table include supporting funds for important water conservancy construction of RMB 1.292 cents, except for the impoverished county agriculture irrigation and drainage electricity and high lift irrigation electricity.

2. In the above tariffs listed, except for the agricultural production electricity and small and medium-sized fertilizer production electricity, residential electricity price includes the urban public utility surcharges. Residential electricity price is RMB 1.5 cents; General industrial, commercial and other electricity is RMB 0.8 cents; Large Scale Industrial Electricity is RMB 0.4 cents.

3. The tariffs listed in the above table, except for the agricultural production electricity, shall include the Later-stage Support Fund for Large and Medium-sized Reservoir Resettlement of RMB 0.83 cents, and the Later-stage Support Fund for Local Reservoirs Resettlement of RMB 0.05 cents.

4. The tariffs listed in the above table include the Renewable Energy Electricity Tariff Surcharge of, RMB 1.9 cents, except for the agricultural electricity and residential electricity.

5. The agricultural irrigation and drainage as in the above tariffs listed shall be reduced RMB 2 cents (fund for rural power grid loan).

Appendix 3

**Peak-valley Electricity Price Table in Different Time of Anhui Province Grid**

Unit: Yuan / KW h

Electricity Utilization Category		Voltage Category					Basic Fee		
		Less than 1 kv	1-10kv	35kv	110kv	220kv	Maximum Demand (Yuan/KV Month)	Transformer Capacity (Yuan/KV Month)	
I. Residential Electricity	Normal	0.5953							
	Valley	0.3153							
II. General Industry and commercial Electricity	Peak	Jul, Aug, Sep	1.2412	1.2164	1.1917				
		Other months	1.1701	1.1469	1.1236				
	Normal	0.7793	0.7643	0.7493					
	Valley	0.4880	0.4791	0.4703					
III. Large Scale Industrial Electricity	Peak	Jul, Aug, Sep		1.0238	0.9991	0.9743	0.9578	40	30
		Other months		0.9657	0.9425	0.9192	0.9037		
	Normal		0.6460	0.6310	0.6160	0.6060			
	Valley		0.4077	0.3988	0.3900	0.3841			

Note: On the basis of General Industry and Commercial Electricity, the price of Electric Boiler, Ice (water) Chilled Air Conditioning Electricity should: Lower RMB 0.5039 Yuan per Kwh in July, August and September, and Lower RMB 0.4737 Yuan per Kwh in other months, Lower RMB 0.307 Yuan per Kwh for normal period, and Lower RMB 0.1828 Yuan per Kwh for valley period.

# Document of Anhui Price Bureau

Wanjiashang [2017] No.101

## Circular of Anhui Price Bureau on the Reasonable Adjustment of Electricity Price Structure

To all Municipal and County Price Bureaus (Development and Reform Commission), State Grid Anhui Power Company, and Relevant Power Generation Enterprises:

In order to implement the State Council's decision on the elimination of the urban public utility surcharge and the special fund for industrial enterprise structural adjustment, the reduction of the national major water conservancy project construction fund and the large and medium-sized reservoir resettlement support fund, and the rational adjustment of the electricity price structure, in accordance with the unified deployment of the National Development and Reform Commission, and with the consent of the Provincial People's Government, we decide to adjust the on-grid price of coal-fired power generation benchmarks and the sales price. The relevant matters are hereby notified as follows:

### I. Adjust the grid purchase price of power generation enterprises

The benchmark on-grid tariff for coal-fired generating units (including generating units of combined heat and power, and generating units of comprehensive utilization) in our province increases by 1.51 cents per kilowatt hour (tax included, same below). After the price adjustment, the on-grid tariffs (including desulfurization, denitration, and dust removal) for coal-fired generating units in our province are 0.3844 yuan per kilowatt-hour. The on-grid electricity price for coal-fired generating units for "Wan Dian Dong Song" project increases by 1.51 cents per kilowatt-hour. After the price adjustment, the on-grid electricity price (including desulfurization, denitrification, and dust removal) for the coal-fired power generation units for "Wan Dian Dong Song" project is 0.3844 yuan per kilowatt-hour. The on-grid electricity price for hydropower generating units in our province is uniformly implemented according to the on-grid price for coal-fired generating units (including desulfurization, denitrification, and dust removal).

### II. Adjust the electricity price of power grid

The general industrial and commercial electricity and other electricity prices decreases by 1.35 cents per kilowatt-hour. Among them, the cancellation of urban public utility surcharge shall be implemented from April 1. The power grid enterprises shall deduct the urban public utilities surcharges for the period from April 1 to June 30 when they collect electricity fee from industrial and commercial users and power sales companies in accordance with the regulation. The power sales companies shall conduct timely transmission to power users and must not retain the urban public utility surcharges.

The above prices shall be implemented from July 1, 2017. If there is any problem during the implementation, please report to the Provincial Price Bureau.

Datang Chencun Hydropower Plant		19.4	0.3844	
Foziling Hydropower Station		6.01	0.3844	
Meishan Hydropower Station		4	0.3844	
Xianghongdian Hydropower Station		4	0.3844	
Bailianyan Hydropower Station		5	0.3844	
Anhui Mingsheng Electric Power Development Investment Group Co., Ltd. (formerly Kangyuan) generator sets			0.3844	
Non-unified Hydropower Station			0.3844	

Note: The electricity price for biomass power generation, wind power and other waste and photovoltaic power generation enterprises are implemented according to the current price policy.

## Appendix 2

### Electricity Sale Schedule of Anhui Province Grid

Unit: Yuan / KWh

Electricity Utilization Category	Voltage Category					Basic Fee	
	Less than 1kv	1-10kv	35kv	110kv	220kv	Maximum Demand (Yuan/KV·Month)	Transformer Capacity (Yuan/KV·Month)
I. Residential Electricity	0.5653	0.5503					
II. General Industry and Commercial Electricity	0.7658	0.7508	0.7358				
III. Large Scale Industrial Electricity		0.6460	0.6310	0.6160	0.6060	40	30
IV. Agricultural Electricity	0.5558	0.5408	0.5258				
Including: Impoverished county agriculture irrigation and	0.3516	0.3366	0.3216				

- Note: 1. The tariffs listed in the above table include supporting funds for important water conservancy construction of RMB 0.969 cents, except for the impoverished county agriculture irrigation and drainage electricity and high lift irrigation electricity.
2. The tariffs listed in the above table, except for the agricultural production electricity, shall include the Later-stage Support Fund for Large and Medium-sized Reservoir Resettlement of RMB 0.623 cents, and except for residents use electricity and agricultural production electricity, shall include the Later-stage Support Fund for Local Reservoirs Resettlement of RMB 0.05 cents.
3. The tariffs listed in the above table include the Renewable Energy Electricity Tariff Surcharge of, RMB 1.9 cents, except for the agricultural electricity and residential electricity.
4. The agricultural irrigation and drainage as in the above tariffs listed shall be reduced RMB 2 cents (fund for rural power grid loan).

### Appendix 3

#### Peak-valley Electricity Price Table in Different Time of Anhui Province Grid

Unit: Yuan / KW·h

Electricity Utilization Category		Voltage Category					Basic Fee		
		Less than 1kv	1-10kv	35kv	110kv	220kv	Maximum Demand (Yuan/KV·Month)	Transformer Capacity (Yuan/KV·Month)	
I. Residential Electricity	Normal	0.5953							
	Valley	0.3153							
II. General Industry and commercial Electricity	Peak	Jul, Aug, Sep	1.2276	1.2028	1.1781				
		Other months	1.1565	1.1333	1.1100				
	Normal	0.7658	0.7508	0.7358					
	Valley	0.4745	0.4657	0.4568					
III. Large Scale Industrial Electricity	Peak	Jul, Aug, Sep		1.0299	1.0051	0.9804	0.9639	40	30
		Other months		0.9708	0.9476	0.9243	0.9088		
	Normal		0.6460	0.6310	0.6160	0.6060			
	Valley		0.4039	0.3950	0.3862	0.3803			

Note: On the basis of General Industry and Commercial Electricity, the price of Electric Boiler, Ice (water) Chilled Air Conditioning Electricity should: Lower RMB 0.5039 Yuan per Kwh in July, August and September, and lower RMB 0.4737 Yuan per Kwh in other months, lower RMB 0.307 Yuan per Kwh for normal period, and lower RMB 0.1828 Yuan per Kwh for valley period.
