For Public File

Dear Ms Baynham

Investigation No. 482 - Submission by Abra Aluminium Pty Ltd of 14 March 2019

I refer to the submission made on behalf of Abra Aluminium Pty Ltd (Abra) dated 14 March 2019 (EPR Document No. 056) in review investigation No. 482 involving aluminium extrusions exported from the People's Republic of China (China).

The submission by Abra refers to imports of certain Standard Fly Frame extrusions which it is stated that Abra is seeking "*an exemption from measures as those Goods are not and cannot be produced by the Australian industry.*"

It appears from the Abra submission that it contacted the following manufacturers of aluminium extrusions: Extrusions Australia, Almax and Capral Limited.

Aluminium Shapemakers Pty Ltd (Alushapes) is a manufacturer of aluminium extrusions including micro-extrusions weighing less than 200 gram per metre in length that are used in the following applications: small angles, tubes (as used for tv aerials), flyscreen frame profiles (including for domestic window flyscreens); etc.

Abra has redacted details as to the wall thickness that is required for the standard flyscreen frames for which it is seeking an Exemption from anti-dumping measures. Alushapes manufactures aluminium flyscreen extrusions for customers in Australia and can demonstrate accordingly to the Anti-Dumping Commission (the Commission).

Alushapes requests the Commission not to consider an exemption from measures for aluminium extrusions used in flyscreen frames as these goods are available from local production by Alushapes at its Somersby, NSW production facility.

If you have any questions concerning this letter, please do not hesitate to contact me on (02) 4340 4344.

Yours sincerely

Wolf D Breit
Managing Director.
