

## Exporter Questionnaire

**Product:** Tomatoes, prepared or preserved

**From:** Italy

**Period of Inquiry:** 1 July 2017 to 30 June 2018

**Exporter:** **MUTTI SpA**

**Response due by:** **03 September 2018**

*Important note: The timeliness of your response is important. Please refer below for more information.*

**Inquiry case manager:** Roman Maevsky

**Phone:** + 61 3 8539 2440

**Fax:** + 61 3 8539 2499

**E-mail:** [Investigations1@adcommission.gov.au](mailto:Investigations1@adcommission.gov.au)

**Anti-Dumping Commission website:** [www.adcommission.gov.au](http://www.adcommission.gov.au)

**Return completed questionnaire to:** [Investigations1@adcommission.gov.au](mailto:Investigations1@adcommission.gov.au)

OR

Anti-Dumping Commission  
GPO Box 2013  
Canberra ACT 2601  
Australia

## **GOODS UNDER CONSIDERATION**

The goods under consideration (the goods) i.e. the goods exported to Australia, are:

*Tomatoes (peeled or unpeeled) prepared or preserved otherwise than by vinegar or acetic acid, either whole or in pieces (including diced, chopped or crushed) with or without other ingredients (including vegetables, herbs or spices) in packs not exceeding 1.14 litres (prepared or preserved tomatoes).*

The following tomato products do not form part of this inquiry: pastes, purees, sauces, pasta sauces, juices and sundried tomatoes.

The common container sizes of the imported prepared or preserved tomatoes the subject of this application are 300grams to 850grams, but the application covers all container sizes up to and including 1.14L.

The imported goods could be packaged in different containers such as cans, glass jars, pouches or Tetra packs.

The imported prepared or preserved tomatoes can be labelled with a generic, a house brand / private label for a retailer or a proprietary label. The imported prepared or preserved tomatoes the subject of this application covers all imported prepared or preserved tomatoes regardless of how labelled.

### **Inquiry period**

Dumping in relation to prepared or preserved tomatoes exported to Australia from Italy will be determined on the basis of an inquiry period from **1 July 2017 to 30 June 2018** (hereinafter referred to as 'the inquiry period').

## **Instructions**

### **Why you have been asked to fill out this questionnaire?**

The Anti-Dumping Commission (the Commission) is responsible for investigating the allegation that prepared or preserved tomatoes have been exported to Australia from Italy at prices less than their normal value and that the dumping has caused material injury to the Australian industry.

The Commission will use the information you provide to determine normal values and export prices over the inquiry period. This information will determine whether prepared or preserved tomatoes are dumped. You may make separate submissions concerning any other matter, for example injury.

The Commission's inquiry will be carried out under the provisions of the Part XVB of the *Customs Act 1901*.

### **What happens if you do not respond to this questionnaire?**

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem you uncooperative. In that case the Commission may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry). In that case we may assess a dumping margin for your company based upon normal values that may be the highest determined in your country during the inquiry period.

It is in your interest, therefore, to provide a complete and accurate submission, capable of verification.

### **Due date for response**

Manufacturers and exporters are requested to respond to this questionnaire and return it to the Commission within the time specified on the cover page.

The Commissioner must consider the direction set out in the *Customs (Extensions of Time and Non-cooperation) Direction 2015* (the Direction). This Direction sets out the particular considerations that the Commissioner must take into account when:

- deciding whether a longer period is reasonably required or practicable under subsection 269TC(6) and 269TC(9) of the *Customs Act 1901* (the Act), or considering whether to allow any interested party a longer period to give any response;
- considering an insufficient response from an interested party;
- determining whether to have regard to a late response;
- determining whether an exporter is an uncooperative exporter;
- determining whether or not an entity is a non-cooperative entity for the purposes of section 269TAACA; and
- determining whether an entity has significantly impeded a case.

The full text of the Direction and the accompanying explanatory statement is available on the Comlaw website at [www.comlaw.gov.au](http://www.comlaw.gov.au). This and other reforms to Australia's anti-dumping system are explained in Anti-Dumping Notice 2015/129, available on the Commission's website at [www.adcommission.gov.au](http://www.adcommission.gov.au).

## **Confidential and non-confidential submissions**

You are required to lodge one confidential version (for official use only) and one non-confidential version (for public record) of your submission by the due date.

Please ensure that *each page* of information you provide is clearly marked either "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia's anti-dumping and countervailing legislation requires that to the extent that information given to the Commission is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party's understanding of information contained in a document.

As provided for in Australia's anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, the Commission may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the inquiry case manager.

## **Exporter's declaration**

At section H, you are required to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the goods during the period of inquiry, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

## **Verification of the information that you supply**

The Commission will seek to verify the information provided in your submission. Where there are a large number of exporters, the Commission may have to verify information from selected exporters only. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be complete and accurate.

Verification visits take several days. We will want to examine in detail your company's records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will prepare a report of the visit. We will provide you with a draft of the report and then respond to any questions you have.

### **If you do not manufacture the goods**

You may export but not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods).

In such cases it is important that you forward a copy of this questionnaire to the relevant manufacturers **immediately**. You should also inform the inquiry case officer of the contact details for these manufacturers.

You should complete those sections of the questionnaire that you are reasonably able to complete. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

### **If you do not export the goods**

Depending on the arrangement for sale of the goods to Australia through an intermediary, the Commission will have to determine who is the exporter of the goods for the purpose of this inquiry.

In any case, information (such as cost of production data) supplied by the manufacturer will be relevant to establishing the normal value of the goods. In the absence of verified information, the Commission may use other available information. This information may result in a decision less favourable to your company.

## **Outline of information required by this questionnaire**

**Section A** General information relating to your company including financial reports.

**Section B** A complete list of your company's exports to Australia over the inquiry

period.

**Section C** A list of goods sold on the domestic market of the country of export (like goods) that may be compared to the goods under consideration (the goods).

**Section D** A detailed list of all of your company's sales of like goods in your domestic market.

**Section E** Information to allow a fair comparison between export and domestic prices.

**Section F** Information in relation to your company's exports of like goods to countries other than Australia.

**Section G** Costs to make and sell, for exports to Australia and for the domestic market.

**Section H** Your declaration.

**Section I** A checklist.

**Appendix 1** A glossary of terms used in this questionnaire

### **Some general instructions for preparing your response**

- When answering the questionnaire please carefully read all instructions. The Commission requires a response to *all* sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.
- Answer questions in the order presented in the questionnaire. Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.
- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.
- We recommend that you retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.
- Clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

### **Instructions on providing electronic data**

- It is important that information is submitted in electronic format.

## PUBLIC RECORD

8

- Electronic data should be emailed or submitted on a CD-ROM, in IBM/MS-DOS format, or another operating system whose disk format is compatible with this MS-DOS version. **The Commission can also take receipt of data via its web based file sharing facility. Please contact the case manager for further details.**
- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file).
- The Excel files must be compatible to the USA version.
- If you cannot present electronic data in the requested format contact the inquiry case officer as soon as possible.

### **Further information**

Before you respond to the questionnaire you should read all the documentation enclosed with this application including the applicant's non-confidential submission, the booklet *Australia's Anti-Dumping and Countervailing Administration* and the Anti-Dumping Notice notifying the initiation of the inquiry. We also advise that you read the attached glossary of terms.

If you require further assistance, or you are having difficulties completing your submission, please contact the inquiry case manager. The Commission will need to know the reasons.

## **SECTION A COMPANY STRUCTURE AND OPERATIONS**

This section requests information relating to company details and financial reports.

### **A-1 Identity and communication**

Please nominate a person within your company who can be contacted for the purposes of this inquiry:

*Head Office: Mutti Spa*  
Name: *Davide Di Nasso*  
Position in the company: *International Controller*  
Address: *Via Traversetolo, 28 43030 Montechiarugolo (PR) Italy*  
Telephone: *[CONFIDENTIAL]*  
Facsimile number: --  
E-mail address of contact person: *[CONFIDENTIAL]*

*Factory: Mutti SpA*  
Address: *Via Traversetolo, 28 43030 Montechiarugolo (PR) Italy*  
Telephone: *0521 652500*  
Facsimile number: --  
E-mail address of contact person: *muttisp@muttisp.it*

### **A-2 Representative of the company for the purpose of inquiry**

If you wish to appoint a representative to assist you in this inquiry, provide the following details:

Name: *Gabriele Coppo*  
Address: *Van Bael & Bellis, Graverbel Building, Chaussée de la Hulpe 166 - 1170 Brussels - Belgium*  
Telephone: *0032 2 6477350*  
Facsimile/Telex number: *0032 2 6406499*  
E-mail address of contact person: *gcoppo@vbb.com*

*Note that in nominating a representative, the Commission will assume that confidential material relating to your company in this inquiry may be freely released to, or discussed with, that representative.*

### **A-3 Company information**

1. What is the legal name of your business? What kind of entity is it (e.g. company, partnership, sole trader)? Please provide details of any other business names that you use to export and/or sell goods.

*The legal name of the company is "Mutti SpA". Mutti is a public limited company.*

## PUBLIC RECORD

10

2. Who are the owners and/or principal shareholders? Provide details of shareholding percentages for joint owners and/or principal shareholders. (List all shareholders able to cast, or control the casting of, 5% or more of the maximum amount of votes that could be cast at a general meeting of your company).

*[CONFIDENTIAL – property information]*

3. If your company is a subsidiary of another company, list the principal shareholders of that company.

*[CONFIDENTIAL – property information]*

4. If your parent company is a subsidiary of another company, list the principal shareholders of that company.

*[CONFIDENTIAL – property information]*

5. Provide a diagram showing all associated or affiliated companies and your company's place within that corporate structure.

*See Annex A3-1 [CONFIDENTIAL]*

6. Are any management fees/corporate allocations charged to your company by your parent or related company?

*No.*

7. Describe the nature of your company's business. Explain whether you are a producer or manufacturer, distributor, trading company, etc.

*Mutti is a manufacturer of tomato products. Moreover Fiordagosto SrL (Mutti SpA's 100% controlled company) produces peeled and cherry tomatoes. This questionnaire response also covers the goods manufactured by Fiordagosto.*

*Mutti also purchases tomato products from unrelated co-packers and resells these products to unrelated customers. In particular "[CONFIDENTIAL – commercial information]*

8. If your business does not perform all of the following functions in relation to the goods under consideration, then please provide names and addresses of the companies which perform each function:

- produce or manufacture
- sell in the domestic market
- export to Australia, and
- export to countries other than Australia.

*Mutti SpA performs all the above functions.*

9. Provide your company's internal organisation chart. Describe the functions performed by each group within the organisation.

*See Annex A3-2 [CONFIDENTIAL]*

10. Provide a copy of your most recent annual report together with any relevant brochures or pamphlets on your business activities.

*Not applicable*

#### **A-4 General accounting/administration information**

1. Indicate your accounting period.

*01 January – 31 December*

2. Indicate the address where the company's financial records are held.

*Mutti Spa Via Traversetolo, 28 43030 Montechiarugolo (PR) Italy*

3. Please provide the following financial documents for the two most recently completed financial years plus all subsequent monthly, quarterly or half yearly statements:

- chart of accounts;

*See Annex A4-1 [CONFIDENTIAL]*

- audited consolidated and unconsolidated financial statements (including all footnotes and the auditor's opinion);

*See Annex A4-2 [CONFIDENTIAL]*

- *Group Mutti financial statement 2016 and 2017;*
- *Mutti SpA financial statement for 2016 and 2017;*
- *Mutti France financial statement 2016 and 2017;*
- *Fiordagosto SRL financial statement 2016 and 2017;*

*The audited documents annexed are in Italian, we are available to provide you a translation into English upon request*

- internal financial statements, income statements (profit and loss reports), or management accounts, that are prepared and maintained in the normal course of business for the goods under consideration.

These documents should relate to:

- the division or section/s of your business responsible for the production and sale of the goods under consideration, and
- the company.

3. If you are not required to have the accounts audited, provide the unaudited financial statements for the two most recently completed financial years, together with your taxation returns. Any subsequent monthly, quarterly or half yearly statements should also be provided.

*Not applicable*

4. Do your accounting practices differ in any way from the generally accepted accounting principles in your country? If so, provide details.

*No*

5. Describe:

The significant accounting policies that govern your system of accounting, in particular:

- the method of valuation for raw material, work-in-process, and finished goods inventories (e.g. last in first out-LIFO, first in first out-FIFO, weighted average);

*LIFO method*

- costing methods, including the method (e.g. by tonnes, units, revenue, direct costs etc) of allocating costs shared with other goods or processes (such as front office cost, infrastructure cost etc);

*Production Cost, direct and indirect factory production costs, including depreciation, distributed in % on the value of year production;*

- valuation methods for damaged or sub-standard goods generated at the various stages of production;

*Products that are considered obsolete and slow-moving are written down by means of a provision for obsolete stock that reflects management's estimate of expected losses from finished products, semi-finished and raw materials, determined on the basis of specific analyses prepared by the corporate function with the responsibility for quality control and on the basis of product turnover ratios and life cycles.*

- valuation methods for scrap, by products, or joint products;

*During the years we destroy the products non-compliant valued at the production cost*

- valuation and revaluation methods for fixed assets;

*They are explicated into the section account policies of the consolidate financial statement*

- average useful life for each class of production equipment and depreciation method and rate used for each;

*Tables with depreciation rates included in the initial part of the balance sheet*

- treatment of foreign exchange gains and losses arising from transactions;

## PUBLIC RECORD

13

*It's explicated into the section account policies of the consolidate financial statement, but no significant transactions.*

- treatment of foreign exchange gains/losses arising from the translation of balance sheet items;

*It's explicated into the section account policies of the consolidate financial statement, but no significant transactions.*

- inclusion of general expenses and/or interest;

*They are explicated into the section account policies of the consolidate financial statement, but no significant transactions*

- provisions for bad or doubtful debts;

*As explicated into the consolidated financial statement the allowance for doubtful accounts reflects management's estimate of losses in the portfolio of trade receivables. The Group determines the provisions for doubtful accounts with reference to the risk of specific collection losses. Utilisations are recorded to cover receivables that are written off when they are no longer deemed to be collectible.*

- expenses for idle equipment and/or plant shut-downs;

*Not applicable*

- costs of plant closure;

*Not applicable*

- restructuring costs;

*Not applicable*

- by-products and scrap materials resulting from your company's production process; and

*We do not have any significant cost related to this*

- effects of inflation on financial statement information.

*We do not have significant cost*

6. In the event that any of the accounting methods used by your company have changed over the last two years provide an explanation of the changes, the date of change, and the reasons for it.

*No changes.*

**A-5 Income statement**

Please fill in the following table. It requires information concerning all products produced and for the goods under consideration (*'goods under consideration'* (the goods) is defined in the Glossary of Terms in the appendix to this form). You should explain how costs have been allocated.

	Most recent completed financial year (specify)		Inquiry period 1 July 2017 – 30 June 2018	
	All products	Goods Under Consideration	All products	Goods Under Consideration
<b>Gross Sales (1)</b>				
Sales returns, rebates and discounts (2)				
<b>Net Sales (3=1-2)</b>				
Raw materials (4)				
Direct Labour (5)				
Depreciation (6)				
Manufacturing overheads (7)				
Other operating expenses (8)				
<b>Total cost to make (9=4+5+6+7+8)</b>				
<b>OPERATING INCOME (10=3-9)</b>				
Selling expenses (11)				
Administrative & general expenses (12)				
Financial expenses (13)				
<b>SG&amp;A expenses (14)=(11+12+13)</b>				
<b>INCOME FROM NORMAL ACTIVITIES (15)=(10-14)</b>				
Interest income (16)				
Interest expense (enter as negative) (17)				
Extraordinary gains and Losses – enter losses as negative (18)				
Abnormal gains and losses – enter losses as negative (19)				
<b>PROFIT BEFORE TAX (20)=(15+16+17+18+19)</b>				

**PUBLIC RECORD**

Tax (21)				
<b>NET PROFIT (22)=(20-21)</b>				

Note: if your financial information does not permit you to present information in accordance with this table please present the information in a form that closely matches the table.

Prepare this information in a spreadsheet named "**income statement**".

*This information will be used to verify the completeness of cost data that you provide in Section G. If, because of your company's structure, the allocations would not be helpful in this process, please explain why this is the case.*

**A-6 Sales**

State your company's net turnover (after returns and all discounts), and free of duties and taxes. Use the currency in which your accounts are kept, in the following format:

	Most recent completed financial year (specify)		Inquiry period 1 July 2017 – 30 June 2018	
	Volume	Value	Volume	Value
Total company turnover <b>(all products)</b>				
Domestic market				
Exports to Australia				
Exports to Other Countries				
Turnover of the nearest business unit, for which financial statements are prepared, which includes the goods under consideration				
Domestic market				
Exports to Australia				
Exports to Other Countries				
Turnover of the <b>goods under consideration</b>				
Domestic market				
Exports to Australia				
Exports to Other Countries				

Prepare this information in a spreadsheet named "**turnover**".

*This information will be used to verify the cost allocations to the goods under consideration in Section G.*

*Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.*

## SECTION B SALES TO AUSTRALIA (EXPORT PRICE)

*This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory. Export prices are usually assessed at FOB point, but the Commission may also compare prices at the ex-factory level.*

*You should report prices of **all** goods under consideration (the goods) **shipped** to Australia during the inquiry period.*

*The invoice date will normally be taken to be the date of sale. If you consider:*

*the sale date is not the invoice date (see 'date of sale' column in question B4 below) and;*

*an alternative date should be used when comparing export and domestic prices*

*you **must** provide information in section D on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the inquiry period.*

**B-1** For each customer in Australia to whom you shipped goods in the inquiry period list:

name;  
address;  
contact name and phone/fax number where known; and  
trade level (for example: distributor, wholesaler, retailer, end user, original equipment).

*[CONFIDENTIAL – client information]*

**B-2** For each customer identified in B1 please provide the following information.

(a) Describe how the goods are sent to each customer in Australia, including a diagram if required.

*[CONFIDENTIAL – client information] goods are sent by FLC 20" directly to the Australian Port of Destination (NSW, Victoria, Perth, Brisbane, Adelaide).*

*[CONFIDENTIAL – client information]: goods are shipped FOB Italian Port by Full Container*

*[CONFIDENTIAL – client information]: goods are shipped FOB Italian Port by Full Container*

(b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

*[CONFIDENTIAL – client information]*

*[CONFIDENTIAL – client information]*

- (c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of DDP sales, explain who retains ownership when the goods enter Australia.

*[CONFIDENTIAL – client information] take the ownership of the goods as soon as the container is delivered to the Italian Port (FOB), while [CONFIDENTIAL – client information] as soon as the container is discharge from vessel at the Australian Port (CFR).*

- (d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).

*[CONFIDENTIAL – client information] have their standard contract and trade terms (see Annex B2-1.1, Annex B2-1.2, B2-2) [CONFIDENTIAL]*

*[CONFIDENTIAL – client information] we have a Distribution Agreement and Agency Agreement in place (see Annex B2-3) [CONFIDENTIAL]*

- (e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.

*[CONFIDENTIAL – client information]*

- (f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (e.g. free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).

*Not Applicable*

- (g) Details of the forward orders of the goods under consideration (include quantities, values and scheduled shipping dates).

*See Annex B-2(g) [CONFIDENTIAL]*

- B-3** Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

*Not Applicable*

- B-4** Prepare a spreadsheet named “**Australian sales**” listing all shipments (i.e. transaction by transaction) to Australia of the goods under consideration in the inquiry period. You must provide this list in electronic format. Include the following export related information:

Column heading	Explanation
Customer name	names of your customers

**PUBLIC RECORD**

Level of trade	the level of trade of your customers in Australia
Model/grade/type	commercial model/grade or type
Product code	code used in your records for the model/grade/type identified. Explain the product codes in your submission.
Invoice number	invoice number
Invoice date	invoice date
Date of sale	refer to the explanation at the beginning of this section. If you consider that a date <i>other than</i> the invoice date best establishes the material terms of sale, report that date. For example, order confirmation, contract, or purchase order date.
Order number	if applicable, show order confirmation, contract or purchase order number if you have shown a date other than invoice date as being the date of sale.
Shipping terms	Delivery terms eg. CIF, C&F, FOB, DDP (in accordance with Incoterms)
Payment terms	agreed payment terms eg. 60 days=60 etc
Quantity	Quantity in units shown on the invoice. Show basis eg kg.
Gross invoice value	gross invoice value shown on invoice <i>in the currency of sale, excluding taxes.</i>
Discounts on the invoice	if applicable, the amount of any discount deducted on the invoice on each transaction. If a % discount applies show that % discount applying in another column.
Other charges	any other charges, or price reductions, that affect the net invoice value. Insert additional columns and provide a description.
Invoice currency	the currency used on the invoice
Exchange rate	Indicate the exchange rate used to convert the currency of the sale to the currency used in your accounting system
Net invoice value in the currency of the exporting country	the net invoice value expressed in your domestic currency as it is entered in your accounting system
Rebates or other allowances	the amount of any deferred rebates or allowances paid to the importer in the currency of sale
Quantity discounts	the actual amount of quantity discounts not deducted from the invoice. Show a separate column for each type of quantity discount.
Ocean freight**	the actual amount of ocean freight incurred on each export shipment listed.
Marine insurance	Amount of marine insurance
FOB export price**	the free on board price at the port of shipment.
Packing*	Packing expenses
Inland transportation costs*	inland transportation costs included in the selling price. For export sales this is the inland freight from factory to port in the country of export.
Handling, loading & ancillary expenses*	handling, loading & ancillary expenses. For example, terminal handling, export inspection, wharfage & other port charges, container tax, document fees & customs brokers fees, clearance fees, bank charges, letter of credit fees, & other ancillary charges incurred in the exporting country.
Warranty & guarantee expenses*	warranty & guarantee expenses
Technical assistance & other services*	expenses for after sale services, such as technical assistance or installation costs.
Commissions*	Commissions paid. If more than one type is paid insert additional columns of data. Indicate in your response to question B2 whether the commission is a pre or post exportation expense having regard to the date of sale.
Other factors*	<b>any other</b> costs, charges or expenses incurred in relation to the exports to Australia (include additional columns as required). See question B5.

## PUBLIC RECORD

20

\*\* FOB export price and Ocean Freight:

FOB export price: An FOB export price must be calculated for each shipment - regardless of the shipping terms. FOB price includes inland transportation to the port of exportation, inland insurance, handling, and loading charges. It excludes post exportation expenses such as ocean freight and insurance. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.

Ocean freight: as ocean freight is a significant cost it is important that the actual amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis - estimates must reflect changes in freight rates over the inquiry period.

Freight allocations must be checked for consistency.

\* All of these costs are further explained in section E-1.

**B-5** If there are any other costs, charges or expenses incurred in respect of the exports listed above which have not been identified in the table above, add a column (see "other factors" in question B-4) for each item, and provide a description of each item. For example, other selling expenses (direct or indirect) incurred in relation to the export sales to Australia.

*See spreadsheet "Australian sales"*

**B-6** For each type of discount, rebate, allowance offered on export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met by the importer to obtain the discount.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amount shown in your response to question B4. If they vary by customer or level provide an explanation.

*The following allowances have been included in the "Australian sales" spreadsheet:*

- discounts on invoice
- discounts out of invoice (fixed): this includes promotional rebates (scan data) as well as contribution for in store activity and catalogues allocated to the sales of each relevant customer on a net turnover basis
- inland transport: expense for delivery to the port of shipment. In case of CFR sales, the inland transport cost was estimated as the average difference between the full CFR cost and the FOB cost for Australian market. In case of FOB agreement, inland transport is considered as per Oracle statistic.
- ocean freight: for sales on CFR basis only, calculated as difference between estimated FOB expenses and the total cost of transport as per Oracle Statistics.

## PUBLIC RECORD

21

- packing expenses: extra cost incurred for the packing of cans sold in clusters. This cost is already considered as part of COGS as per ORACLE statistics. The allowance has been calculated based on the unit price of the cluster.
- Commissions: in case of sales made through agents, this cost is calculated as % on Net Turnover, where % could vary according to the activity of the agent (accounting, store control, etc.).
- Handling & other: cost related to handling activities at customers' premises and other sundry costs relating to transport.
- Promo marketing: extra costs incurred to promote sales by giving discounts to end consumer in the shops. It has been allocated on products using a net turnover basis.

**B-7** If you have issued credit notes (directly or indirectly) to the customers in Australia, in relation to the invoices listed in the detailed transaction by transaction listing in response to question B4, provide details of each credit note if the credited amount has **not** been reported as a discount or rebate.

*Not applicable*

**B-8** If the delivery terms make you responsible for arrival of the goods at an agreed point within Australia (e.g. delivered duty paid), insert additional columns in the spreadsheet for all other costs incurred. For example:

Import duties	Amount of import duty paid in Australia
Inland transport	Amount of inland transportation expenses within Australia included in the selling price
Other costs	Customs brokers, port and other costs incurred (itemise)

*Not applicable*

**B-9** Select two shipments, in different quarters of the inquiry period, and provide a complete set of all of the documentation related to the export sale. For example:

- the importer's purchase order, order confirmation, and contract of sale;
- commercial invoice;
- bill of lading, export permit;
- freight invoices in relation to movement of the goods from factory to Australia, including inland freight contract;
- marine insurance expenses; and
- letter of credit, and bank documentation, proving payment.

The Commission will select additional shipments for payment verification at the time of the visit.

**PUBLIC RECORD**

22

See *Annexes B9-1, B9-2, B9-3, B9-4* [CONFIDENTIAL]

## SECTION C EXPORTED GOODS & LIKE GOODS

**C-1** Fully describe all of the goods you have exported to Australia during the inquiry period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

*In the review period Mutti produced and exported to Australia the following goods: [CONFIDENTIAL – product information]*

*Moreover, Mutti exported to Australia the following models manufactured by third parties (i.e. co-packers) [CONFIDENTIAL – product information]*

**C-2** List each type of goods exported to Australia (these types should cover all types listed in spreadsheet “**Australian sales**” – see section B of this questionnaire).

*[CONFIDENTIAL – product information]*

**C-3** If you sell like goods on the domestic market, for each type that your company has exported to Australia during the inquiry period, prepare a spreadsheet named “**like goods**” listing the most comparable model(s) sold domestically;

- and provide a detailed explanation of the differences where those goods sold domestically (i.e. the like goods – see explanation in glossary) are not identical to goods exported to Australia.

EXPORTED MODEL	DOMESTIC MODEL	IDENTICAL?	DIFFERENCES
[CONFIDENTIAL]	[CONFIDENTIAL]	YES	

**C-4** Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

*Technical sheets are provided under Annexes C4-1.1 to C4-1.7 [CONFIDENTIAL]*

*Product images are provided under Annex C4-2.1 to C4-2.5 [CONFIDENTIAL]*

## **SECTION D DOMESTIC SALES**

*This section seeks information about the sales arrangements and prices in the domestic market of the country of export.*

*All domestic sales made during the inquiry period must be listed transaction by transaction. If there is an extraordinarily large volume of sales data and you are unable to provide the complete listing electronically you **must** contact the case officer **before** completing the questionnaire. If the case officer agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets the Commission requirements. If agreement cannot be reached as to the appropriate method the Commission may not visit your company.*

*The Commission will normally take the invoice date as being the date of sale in order to determine which sales fall within the inquiry period.*

*If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices –*

*you **must** provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the inquiry period.*

*If you do not have any domestic sales of like goods you must contact the case officer who will explain the information the Commission requires for determining a normal value using alternative methods.*

### **D-1** Provide:

- a detailed description of your distribution channels to domestic customers, including a diagram if appropriate;
- information concerning the functions/activities performed by each party in the distribution chain; and
- a copy of any agency or distributor agreements, or contracts entered into.

*Domestic distribution Channel is:*

*Modern Trade (Retailers: Supermarket and Hypermarkets)*

*Cash & Carry (Retailers focused on Food Service items)*

*Wholesalers (focus on small and independent supermarkets and Foodservice)*

*If any of the customers listed are associated with your business, provide details of that association. Describe the effect, if any, that association has upon the price.*

*Not applicable*

**PUBLIC RECORD**

**D-2** Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

*Small direct customers (wholesalers) usually buy small quantities (less than 1 mixed pallet) at higher price conditions compared to the average*

**D-3** Explain in detail the sales process, including:

- the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
- whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

*We issue once per year (after crop) a gross price list, and per calendar years prices and rebate / allowance conditions (contract conditions). We receive orders thoughts agencies or directly by customers (EDI or Fax) in our Back Office. We process them centrally in our system and confirm to customers. Prices conditions includes always transport and delivery cost to Customer Warehouse*

**D-4** Prepare a spreadsheet named “**domestic sales**” listing **all** sales of like goods made during the inquiry period. The listing must be provided on a CD-ROM. Include all of the following information.

<b>Column heading</b>	<b>Explanation</b>
Customer name	names of your customers. If an English version of the name is not easily produced from your automated systems show a customer code number and in a separate table list each code and name.
Level of trade	the level of trade of your domestic customer
Model/grade/type	commercial model/grade or type of the goods
Product code	code used in your records for the model/grade/type of the goods identified. Explain the product codes in your submission.
Invoice number	invoice number
Invoice date	invoice date
Date of sale	refer to the explanation at the beginning of this section. If you consider that a date <i>other than</i> the invoice date best establishes the material terms of sale and should be used, report that date. For example, order confirmation, contract, or purchase order date.
Order number	show order confirmation, contract or purchase order number if you have shown a date other than invoice date as being the date of sale.
Delivery terms	e.g. ex-factory, free on truck, delivered into store
Payment terms	payment terms agreed with the customer e.g. 60 days=60 etc
Quantity	quantity in units shown on the invoice e.g. kg
Gross Invoice value	gross value shown on invoice <i>in the currency of sale</i> , net of taxes.
Discounts on the Invoice	the amount of any discount deducted on the invoice on each transaction. If a % discount applies show that % discount applying in another column.
Other charges	any other charges, or price reductions, that affect the net invoice value. Insert additional columns and provide description.
Net invoice value in the currency of the exporting country	the net invoice value expressed in your domestic currency as recorded in your accounting system
Rebates or other Allowances	the actual amount of any deferred rebates or allowances in the currency of sale
Quantity discounts	the actual amount of quantity discounts not deducted from the invoice.

**PUBLIC RECORD**

	Show a separate column for each type of quantity discount.
Packing*	packing expenses
Inland transportation Costs*	amount of inland transportation costs included in the selling price.
Handling, loading And ancillary Expenses*	handling, loading & ancillary expenses.
Warranty & Guarantee expenses*	warranty & guarantee expenses
Technical assistance & other services*	expenses for after sale services such as technical assistance or installation costs.
Commissions*	commissions paid. If more than one type is paid insert additional columns of data.
Other factors*	<b>any other</b> costs, charges or expenses incurred in relation to the domestic sales (include additional columns as required). See question D5.

Costs marked with \* are explained in section E-2.

**D-5** If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see “other factors”). For example, certain other selling expenses incurred.

*See “Domestic sales” spreadsheet*

**D-6** For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:

- provide a description; and
- explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

*The following allowances have been included in the “Domestic sales” spreadsheet:*

- *discounts on invoice*
- *discounts out of invoice (fixed): this includes promotional rebates (scan data) as well as contributions for in store activity and catalogues, plus eventual listing costs allocated to the sales of each relevant customer on a net turnover basis*
- *discounts out of invoice (variable): they include end of the year discounts and/or contribution related to turnover (unconditioned or targets based) allocated to the sales of each relevant customer on a turnover basis*
- *commissions, in case of sales made through agents. Commissions are calculated as % on net turnover, where % could*

## PUBLIC RECORD

27

*vary according to the activity of the agent (accounting, store control, etc.)*

- *commission (fixed costs) include fixed expenses and/or lump sums as well as bonuses paid to the agents in accordance with the agency contract.*
- *inland transport: for goods sold on a delivery basis, calculated as per Oracle statistics (see section F for method of calculation of transport cost for domestic deliveries)*
- *packing expenses: extra cost incurred for the packing of cans sold in clusters. This cost is already considered as part of COGS as per ORACLE statistics. The allowance has been calculated based on the unit price of the cluster.*
- *Handling & Other: costs relating to handling activities at the customer's premises and other extra-costs (e.g. transport cost surcharge)*
- *Other discounts: cost related to sales made to a particular Italian customer. This cost has been specifically allocated to this customer's sales on a net turnover basis.*
- *Promo MKTG: extra costs incurred to promote sales by giving discounts to end consumer in the shops. It has been allocated on products using a net turnover basis.*

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

*Credit notes have been allocated and deducted from the net invoice value of each transaction. See "Domestic sales" spreadsheet.*

- D-7** Select two domestic sales, in different quarters of the inquiry period, that are at the same level of trade as the export sales. Provide a complete set of documentation for those two sales. (Include, for example, purchase order, order acceptance, commercial invoice, discounts or rebates applicable, credit/debit notes, long or short term contract of sale, inland freight contract, bank documentation showing proof of payment.)

The Commission will select additional sales for verification at the time of our visit.

See **Annexes D7-1 to D7-3** [CONFIDENTIAL]

## **SECTION E FAIR COMPARISON**

*Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (i.e. the normal value).*

*Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.*

*As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.*

*To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. The Commission must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.*

*Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence the Commission may disallow the adjustment.*

*Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.*

*A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.*

*The inquiry must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. The Commission will not consider new claims made after the verification visit.*

## E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, 'Australian sales')

### 1. Transportation

Explain how you have quantified the amount of inland transportation associated with the export sale ("**Inland transportation costs**"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

*Transport cost are indicated as per Oracle statistics. The rate applied for each delivery depends on the type of container (20' or 40') and the type of service (direct truck or transshipment)*

*In Oracle statistics, total cost of delivery is allocated to each product proportionally to gross weight (kg) of each product.*

*For CFR shipping terms FOB part has been estimated comparing the unitary CFR cost with the unitary FOB cost, then the FOB one has been divided by the CFR one. This percentage is the estimated part of FOB included in CFR cost. The difference has been putted in the column "Ocean Freight".*

### 2. Handling, loading and ancillary expenses

List all charges that are included in the export price and explain how they have been quantified ("**Handling, loading & ancillary expenses**"). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes;
- document fees and customs brokers fees;
- clearance fees;
- bank charges, letter of credit fees
- other ancillary charges.

*In "Handling & loading expenses" have been included costs relating to handling activities at the customer's premises and other extra-costs (e.g. transport cost surcharge). As these costs are common for all the EXPORT countries and there is not the possibility to allocate them more precisely, these expenses have been allocated on the basis of the volumes (kg) sold (using all the export volumes as base)*

### 3. Credit

The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the inquiry period.

Explain the nature of the interest rates most applicable to these export sales e.g., short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, *and if* export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.

*Not Applicable*

**4. Packing costs**

List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed '**Packing**'.

*Packing costs (i.e. additional cost for packing incurred for cans sold in clusters) were calculated based on the unit cost of the cluster. However, this cost is already considered as part of COGS*

**5. Commissions**

For any commissions paid in relation to the export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed "**Commissions**". Identify the general ledger account where the expense is located.

*Just in case of sales made through agents, commissions are calculated as % on net turnover, where % could vary according to the activity of the agent (accounting, store control, etc.). Commissions are applicable only below a certain level of net turnover – see Agency Agreement (**Annex E6-1**) [CONFIDENTIAL]*

**6. Warranties, guarantees, and after sales services**

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("**Warranty & guarantee expenses**" and "**Technical assistance & other services**"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

*Not Applicable*

**7. Other factors**

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. For example, other variable or fixed selling expenses, including salesmen’s salaries, salesmen’s travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.

*Promo marketing: extra cost incurred to promote sales by giving coupons to end consumer in the shop. It has been allocated on products on a net turnover basis*

**8. Currency conversions**

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a ‘sustained’ movement during the period of inquiry (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect ‘sustained’ movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the inquiry period.

*Not Applicable*

**E-2 Costs associated with domestic sales**

(These cost adjustments will relate to your responses made at question D-4, “**domestic sales**”)

*The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.*

**1. Physical characteristics**

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (SG&A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

*Not Applicable*

**2. Import charges and indirect taxes**

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon *exportation* and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold *domestically* but is not borne by the exports to Australia;

#### Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: *“Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs”*

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

*Not Applicable*

### **3. Level of trade**

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

- (a) *costs arising from different functions*: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

**or**

- (b) *level discount*: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

*Customers have been distinguished based on the following categories (1) retailers (2) cash and carry (3) independent wholesalers*

**4. Credit**

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, the Commission will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

- the rate, or average of rates, applying on actual short term borrowing's by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the inquiry period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system<sup>1</sup>, the average credit period may be determined as follows:

1. *Calculate an accounts receivable turnover ratio*

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

---

<sup>1</sup> Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

2. Calculate the average credit period

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

*Not Applicable*

*The following items are identified in the amounts quantified at question D-4:*

5. **Transportation**

Explain how you have quantified the amount of inland transportation associated with the domestic sales (“**Inland transportation Costs**”). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

*Transport costs are indicated in the table as per Oracle statistics. Transport cost rate of each delivery depends on (I) the kilos loaded, (II) the distance*

*In Oracle statistics, total cost of delivery is allocated to each product proportionally to gross weight (kg) of each product.*

6. **Handling, loading and ancillary expenses**

List all charges that are included in the domestic price and explain how they have been quantified (“**Handling, loading and ancillary Expenses**”). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

*In “Handling & loading expenses” have been included costs relating to handling activities at the customer’s premises and other extra-costs (e.g. transport cost surcharge) incurred in the Italian market. These expenses were allocated on the basis of the volumes (kg) sold.*

7. **Packing**

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed “**Packing**”.

*Packing costs (i.e. additional cost for packing incurred for cans sold in clusters) were calculated based on the unit cost of the cluster.*

8. **Commissions**

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed “**Commissions**”. Identify the general ledger account where the expense is located.

Commissions:

*in case of sales made through agents. Commissions are calculated as % on net turnover, where % could vary according to the activity of the agent (accounting, store control, etc.)*

Commissions (fixed costs):

*Lump sums and/or expenses paid to the agents as well as bonuses paid to the agents in accordance with the agency contract. The allocation of these costs has been made on a net turnover basis.*

**9. Warranties, guarantees, and after sales services**

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“**Warranty & Guarantee expenses**” and “**Technical assistance & other services**”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

*Not Applicable*

**10. Other factors**

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. List the factors and show how each has been quantified in per unit terms. For example:

- *inventory carrying cost:* describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;
- *warehousing expense:* an expense incurred at the distribution point;
- *royalty and patent fees:* describe each payment as a result of production or sale, including the key terms of the agreement;
- *advertising;* and
- *bad debt.*

*Adjustments have been applied to reflect the following costs:*

Discounts out of invoice (fixed):

*these discounts could be promotional (scan data), granted for a specific period / activity or they could be other contributes to customer for marketing support. They are allocated to the sales of each relevant customer on a net turnover basis. The source of info is Oracle statistics.*

Discounts out of invoice (variable):

*These discounts could be a simply mathematic way to arrive to agreed net price from a gross price list or they could correspond to some logistic allowances or other allowance conditions granted to match local competitive requirements; they are calculated as % on net invoice value. The source of info are Oracle statistics.*

*Other discounts:*

*cost related to sales made to a specific Italian customer. This cost has been specifically allocated on this customer's sales using a net turnover basis.*

*Promo MKTG:*

*costs related to coupons that are given to end consumer as extra discounts to be spend by purchasing Mutti' products. These costs have been allocated to all product sold in the domestic market on "retail" net invoice basis.*

**E-3 Duplication**

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson's salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

*Not Applicable*

**SECTION F**  
**EXPORT SALES TO COUNTRIES OTHER THAN**  
**AUSTRALIA (THIRD COUNTRY SALES)**

*Your response to this part of the questionnaire may be used by the Commission to select sales to a third country that may be suitable for comparison with exports to Australia.*

*Sales to third countries may be used as the basis for normal value in certain circumstances. The Commission may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.*

**F-1 Using the column names and column descriptions below provide a summary of your export sales to countries other than Australia.**

<b>Column heading</b>	<b>Explanation</b>
Country	Name of the country that you exported like goods to over the inquiry period.
Number of customers	The number of different customers that your company has sold like goods to in the third country over the inquiry period.
Level of trade	The level of trade that you export like goods to in the third country.
Quantity	Indicate quantity, in units, exported to the third country over the inquiry period.
Unit of quantity	Show unit of quantity eg kg
Value of sales	Show net sales value to all customers in third country over the inquiry period
Currency	Currency in which you have expressed data in column SALES
Payment terms	Typical payment terms with customer(s) in the country eg. 60 days=60 etc
Shipment terms	Typical shipment terms to customers in the third country eg CIF, FOB, ex-factory, DDP etc.

Supply this information in spreadsheet file named **“third country”**

*See “third countries” sales spreadsheet*

**F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.**

*Not applicable*

**SECTION G**  
**COSTING INFORMATION AND CONSTRUCTED VALUE**

*The information that you supply in response to this section of the questionnaire will be used for various purposes including:*

- testing the profitability of sales of like goods on the domestic market;*
- determining a constructed normal value of the goods under consideration (the goods) - ie of the goods exported to Australia; and*
- making certain adjustments to the normal value.*

*You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (e.g. non-operating expenses not included elsewhere) associated with the goods.*

*In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.*

*If, in response to question B4 (Sales to Australia, Export Price) you:*

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and*
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)*

*you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the inquiry period.*

*At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.*

**G-1. Production process and capacity**

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

See *Annexes G-1.1 to G-1.3* [CONFIDENTIAL]

**G-2. Provide information about your company's total production in the following table:**

	PREVIOUS FINANCIAL YEAR	MOST RECENT FINANCIAL YEAR	Inquiry Period
A – Production capacity (e.g. kg, tonnes) *			
B – Actual production in volume (e.g. kg, tonnes)			
C – Capacity utilisation (%) (B/A x 100)			

\*rather than showing a 'name-plate' optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example, assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

Provide this information on a spreadsheet named "**production**".

See *spreadsheet named "Production"*

**G-3. Cost accounting practices**

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

*For the statutory financial statement, the product cost configuration is a kind of "industrial full cost" calculated as direct cost (as per the IT system calculation, done specifically by product) plus indirect factory overheads and depreciation. Indirect factory overheads and depreciation are calculated for each product as % over product direct cost of production of the year (from the system), starting from the total expenses of the year for factory overheads and depreciations.*

*In the profit and loss of statutory accounts are showed: purchases of goods and stock variance (not used cost of sales method).*

*Stock is valued at LIFO method at the end of the year.*

*The cost for pallets and drums of tomatoes in the statutory accounts are totally considered as expenses in P&L, while in the management accounts they are, depreciated in 3 years.*

## PUBLIC RECORD

41

*The product cost in management accounts is based on cost of sales logic and the product cost configuration is "direct cost" (the factory overheads and depreciations are considered as expenses in P&L. Cost of sales is calculated every month based on production of the month and averaged with month opening stock value.*

*Other expenses are totally considered as expenses in P&L both for statutory accounts and management accounts.*

- 2 Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (i.e. differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

*No, we are using actual cost (not standard cost)*

- 3 Provide details of any significant or unusual cost variances that occurred during the inquiry period.

*Not applicable.*

- 4 Describe the profit/cost centres in your company's cost accounting system.

*See Annex G-3-4 [CONFIDENTIAL]*

- 5 For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

*See Annex G-3-4 [CONFIDENTIAL]*

- 6 Describe the level of product specificity (models, grades etc) that your company's cost accounting system records production costs.

*The level of product specificity is the product code.*

- 7 List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

*Cost accounting is the source for the generation of cost value both for management account and statutory account:*

*- in management accounts these costs are used with direct cost method and for cost of sales calculation;*

*- in financial accounts they are the base for the stock valuation with the addition of factory overheads and depreciation (LIFO method).*

- 8 State whether your company engaged in any start-up operations in relation to the goods under consideration. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

*[CONFIDENTIAL – business information]*

- 9 State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation in its accounting records.

*No particular accounting treatment for start-up operation has been considered in statutory financial statement and in management accounts.*

**G-4 Cost to make and sell on domestic market**

*This information is relevant to testing whether domestic sales are in the ordinary course of trade.<sup>2</sup>*

1. Please provide (in the format shown in the table below) the actual unit cost to make and sell **each** model/type\* (identified in section C) of the like goods sold on the domestic market. Provide this cost data for each quarter over the inquiry period. If your company calculates costs monthly, provide monthly costs.
2. Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

<sup>2</sup> Relating to costs of production only; identify each cost separately.

<sup>3</sup> Identify each cost separately. Please ensure non-operating expenses **that relate to the goods** are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

## PUBLIC RECORD

45

*Provide this information for each quarter (or month if your company calculates costs on a monthly basis) over the period of the inquiry.*

*Provide the information broken down into fixed and variable costs, and indicate the % total cost represented by fixed costs.*

*If you are unable to supply this information in this format, please contact the case officer for this inquiry at the address shown on the cover of this questionnaire.*

*Please specify unit of currency.*

1. Where there are cost differences between goods sold to the domestic market and those sold for export, give reasons and supporting evidence for these differences.

*The CTMS tables have been prepared on the basis of the "cost of goods sold" calculated by our accounting system (oracle). For this reason, the weighted average cost of the goods sold in the domestic and Australian markets as reported in the CTMS tables may slightly differ.*

2. Give details and an explanation of any significant differences between the costs shown, and the costs as normally determined in accordance with your general accounting system. Reference should be made to any differences arising from movements in inventory levels and variances arising under standard costing methods.

*Not applicable*

3. In calculating the unit cost to make and sell, provide an explanation if the allocation method used (e.g. number, or weight etc) to determine the unit cost differs from the prior practice of your company.

*Industrial costs such as manufacturing overheads, labour, etc. have been allocated on a volume (ton) basis.*

*Transport and handling costs have been allocated on a volume (ton) basis.*

*SG&A costs have been allocated on a turnover basis.*

### **G-6 Major raw material costs**

List major raw material costs, which individually account for 10% or more of the total production cost.

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (eg market prices, transfer prices, or actual cost of production).

Where the major input is produced by an associate of your company the Commission will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at 'spot prices' or under long term contracts etc).

The term associate is defined in section 269TAA of the *Customs Act*. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

**Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.**

*Major raw material costs are (1) raw tomatoes, and (2) containers (cans/bottles) Mutti purchases these materials from unrelated suppliers.*

### **G-7 Raw tomato purchases**

Using the column names and column descriptions below provide information on your purchases of raw tomatoes during the inquiry period.

<b>Column heading</b>
Date of purchase
Type of tomato
Supplier
Supplier country
Cooperative details
Does the supplier grow the tomatoes?
Grower (if not the supplier)
Quantity (Tonnes)
Purchase price (excl. VAT)
Import duties (specify currency)
Unit price (excl. VAT)
Currency
Delivery terms (ex factory, delivered, etc)

Supply this information in spreadsheet file named **“raw tomato purchases”**

*See “Raw tomato purchases” spreadsheet*

**SECTION H  
EXPORTER'S DECLARATION**

I hereby declare that.....(company) did, during the period of inquiry export the goods under consideration and have completed the attached questionnaire and, having made due inquiry, certify that the information contained in this submission is complete and correct to the best of my knowledge and belief.

I hereby declare that.....(company) did not, during the period of inquiry, export the goods under consideration and therefore have not completed the attached questionnaire.

**Name** :.....

**Signature** :.....

**Position in  
Company** :.....

**Date** :.....

## SECTION I CHECKLIST

*This section is an aid to ensure that you have completed all sections of this questionnaire.*

<b>Section</b>	Please tick if you have responded to all questions
Section A – general information	<input type="checkbox"/>
Section B – export price	<input type="checkbox"/>
Section C – like goods	<input type="checkbox"/>
Section D – domestic price	<input type="checkbox"/>
Section E – fair comparison	<input type="checkbox"/>
Section F – exports to third countries	<input type="checkbox"/>
Section G – costing information	<input type="checkbox"/>
Section H – declaration	<input type="checkbox"/>

<b>Electronic Data</b>	Please tick if you have provided spreadsheet
<b>INCOME STATEMENT</b>	<input type="checkbox"/>
<b>TURNOVER</b> – sales summary	<input type="checkbox"/>
<b>AUSTRALIAN SALES</b> – list of sales to Australia	<input type="checkbox"/>
<b>DOMESTIC SALES</b> – list of all domestic sales of like goods	<input type="checkbox"/>
<b>THIRD COUNTRY</b> – third country sales	<input type="checkbox"/>
<b>PRODUCTION</b> – production figures	<input type="checkbox"/>
<b>DOMESTIC COSTS</b> – costs of goods sold domestically	<input type="checkbox"/>
<b>AUSTRALIAN COSTS</b> – costs of goods sold to Australia	<input type="checkbox"/>
<b>RAW TOMATO PURCHASES</b> – list of all raw tomato purchases	<input type="checkbox"/>

## **APPENDIX GLOSSARY OF TERMS**

This glossary is intended to provide you with a basic understanding of technical terms that appear in the questionnaire.

### **Adjustments**

To enable a fair comparison between the export price and the normal value Australian legislation provides for the adjustment of the domestic price paid for like goods. Adjustments are made to account for sales occurring at different times, specification differences, and differences in the terms or circumstances of the sales. The adjustment to the normal value may be upward or downward. Areas where you believe an adjustment is necessary should be identified. Section E of the questionnaire refers.

Examples of adjustments that may be made include: *sales occurring at different times* (it is sometimes necessary to compare domestic and export sales made at different times - in these circumstances an adjustment may be made to reflect price movements during that time); *specification differences*; *packaging*; *taxes*; *level of trade*; *advertising*; *servicing/warranty*; *inland freight*; *warehousing*; *export charges*; *credit terms*; *duty drawback*; *commissions*.

Adjustments may also be required where the normal value is based upon costs to make and sell.

### **Arm's length**

Sales are not considered to be at "arm's length" on your domestic market if there is any consideration payable for the goods other than their price, or there is an association between the buyer and the seller which affects the price, or there will be a reimbursement, compensation or benefit for, or in respect of, the price.

### **Constructed value**

In cases where domestic prices paid for the goods under consideration in the country of export cannot be used for the determination of normal value, ie. when there are no or insufficient sales or where such sales were not made in the ordinary course of trade, normal value may be based on a constructed value. Constructed value is calculated on the basis of the cost of production of the goods under consideration plus a reasonable amount for selling, general and administration costs, and for profits, that are associated with sales on the domestic market of the country of export.

### **Cost of production/manufacturing**

The cost of production or manufacture consists of all manufacturing costs associated with the goods. It is the sum of direct materials, direct labour and factory overheads.

## **Cost to make and sell**

The cost to make and sell is the sum of the cost of production or manufacture, and the selling, general and administration costs associated with the sale of those goods.

## **Country of origin**

The country in which the last significant process in the manufacture or production of the goods was performed.

## **Date of sale**

The Commission will normally use the invoice date as recorded in the exporter or producer's records. Another date may be used if this better reflects the material terms of sale. The questionnaire directs attention to matching data sets of domestic and export sales where some other date is used, as well as matching cost information.

## **Direct labour cost**

Direct labour is categorised as a variable cost, i.e. the value varies with the level of production.

## **Dumping**

Dumping occurs when the products of one country are exported to another country at a price less than their normal value.

## **Dumping margin**

Where the export price is less than the normal value the dumping margin is the amount of the difference. It can be expressed as a value or as a percentage of the export price.

## **Export price**

The export price of the goods is usually the price paid or payable to the exporter in arm's length transactions, in most instances calculated at the Free on Board (FOB) level.

## **Exporting country**

The country of export is normally the country of origin from which the goods are shipped. The country of export may be an intermediate country, except where the products are merely transhipped through that country, or the products concerned are not produced in that country, and there is no comparable price in that country.

## **Factory overheads**

Factory overheads consist of variable costs e.g. power, supplies, indirect labour and fixed costs e.g. factory rent, factory insurance, factory depreciation etc.

## **Goods under consideration (the goods)**

The goods to which the application for anti-dumping action relates. That is, the goods that you have exported to Australia allegedly at dumped prices.

## **Incoterms**

The following abbreviations are commonly used (comment is provided concerning costs that are normally borne by the seller):

EXW	ex works (the seller's minimum obligation as costs relate to goods being made available at the sellers premises)
FCA	free carrier (main carriage not paid by seller. Pay costs until such time that the goods have been delivered at the named point into custody of a carrier named by the seller. Customs formalities, taxes etc paid if required)
FAS	free alongside ship (main carriage not paid by seller. Deliver the goods alongside the ship)
FOB	free on board (main carriage not paid by seller. Deliver the goods on board, provide export clearance if required, pay loading costs to the point the goods have passed the ship's rail, pay customs formalities, taxes etc payable upon exportation)
CFR	cost and freight (main carriage paid by seller. Pay all costs until delivered as well as freight, loading and unloading, pay customs formalities, taxes etc payable upon exportation)
CIF	cost, insurance and freight (main carriage paid by seller. Pay all costs as under CFR as well as marine insurance) the terms CFR and CIF are only used where goods are carried by sea or waterway transport
CPT	carriage paid to
CIP	carriage and insurance paid to the terms CPT and CIP are used as alternatives to CFR and CIF where the goods are carried by air, road, rail etc
DAF	delivered at frontier (goods carried by rail or road and cleared for export at the named place at the frontier. Pay costs until delivered at the frontier plus any discharge costs incurred to place the goods at the customers disposal)
DES	delivered ex ship (goods made available to the buyer on board the ship uncleared for import at the named port of destination. Pay all costs incurred in placed at the disposal of the buyer, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)
DDU	delivered duty unpaid (Pay all costs for carriage to the agreed point, pay customs formalities, taxes etc payable upon exportation, and where necessary for transit through another country)
DDP	delivered duty paid (goods made available at the named place in the country of importation – all risks and costs being incurred by the seller including duties, taxes etc incurred upon importation)

## **Inquiry period**

A period defined by the Commission over which importations of the goods are examined.

## **Like goods**

Like goods are goods sold on the domestic market of the country of export (or to a third country) that are identical in all respects to the goods under consideration or that, although not alike in all respects have characteristics closely resembling those of the goods under consideration. The term 'like goods' also refers to the goods produced by the Australian industry allegedly being injured by dumped imports.

## **Normal value**

Australian legislation sets out several ways to assess "normal value".

The preferred method is to use the price paid for like goods sold for domestic consumption in the country of export. Usually, these sales are made by you, but there may be circumstances where it is appropriate to use sales made by other sellers on the domestic market.

Sale prices must be at arm's length and in the ordinary course of trade. In the absence of relevant or suitable domestic sales, the normal value may be determined by constructing a price based upon all costs to make and sell the goods. Profit may also be included if the sales on the domestic market are profitable. Alternatively, the normal value may be ascertained using the price paid for like goods sold in the ordinary course of trade at arm's length to customers in a country other than Australia, however this option is rarely used.

Finally, when a normal value cannot be ascertained by any of the above methods, or if no information is provided, the Commission will determine the normal value by considering all the relevant information, including the applicant's information. This allows the applicant's information to be used where sufficient information has not been furnished or is not available.

Where domestic price generally, and the trade of the exporting country are determined or substantially influenced by the government of the exporting country, an alternative/surrogate market economy is selected by the Commission and the normal value is determined as if the surrogate country were the export source.

## **Ordinary course of trade**

Testing for "ordinary course of trade" includes a comparison of the selling price and the unit cost to make and sell for the same period. If sales in respect of a substantial quantity of goods over an extended period of time, usually 12 months, do not recover all costs and these losses are not likely to be recovered within a reasonable period of time, (again usually 12 months) then the sales are regarded as being not in the ordinary course of trade.

There may be circumstances where it is appropriate to use a period other than 12 months in assessing whether sales are in the ordinary course of trade.

Unprofitable sales are to be taken to have occurred in substantial quantities during an extended period where the unprofitable sales amount to 20% or more of the total volume of sales of the goods by the exporter over the period. An extended period of time is usually taken to be a period not less than 12 months. Where unprofitable sales are rejected, normal value is based upon remaining profitable sales provided they occur in sufficient number. Where all sales have been made at a loss, or profitable sales are insufficient, the normal value may be constructed from costs to make and sell.

### **Selling, general and administration expenses (SG&A)**

The selling, general and administration expenses includes all selling, distribution, general and administration expenses including finance costs that would be incurred if the goods were sold for domestic consumption in the country of export. The amounts are determined in each case using all the available information and may include expenses incurred in:

- . domestic sales of like goods;
- . sale of goods of the same general category by the exporter; or
- . sales in the industry in the country of export.

The expenses must, however, reflect the selling, general and administration costs of the goods. Administrative and selling expenses include: director's fees, management salaries and benefits, office salaries and benefits, office supplies, insurance, promotion, entertainment, depreciation and corporate overheads.
