Dumping investigation into solid base angles exported from the
Peoples Republic of China

Dear Director

This submission is made on behalf of Vincent Buda & Company (V) to the application by Galintel Pty Ltd (Galintel) for the publication of dumping duties on solid base angles exported from the Peoples Republic of China (China).

Further to our previous submission in which we query the scope of goods subject to investigation, and the possible impact this has on the parties considered to be producers of like goods, we wish to bring to the Commission’s attention additional local manufacturers which may be producing like goods, depending on the scope of goods covered by the application.

Telfords Building Systems

It is noted that Telfords website (http://www.telfords.com.au/roll-forming/) refers to its roll-forming capabilities and highlights that its newest angle roll former can ‘roll sizes 30 x 30 to 75 x 75, in thicknesses ranging from 1.9mm to 3mm in both Black and Galvanised. Lengths rolled up to 9 meters.’

Millform

Millform’s website also highlights its angle roll-forming capabilities (http://millform.com.au/angle) which appear to fall within the description of the subject goods, if solid base angles are taken to include all cold-rolled steel angles.

The Commission is urged to contact these entities, along with ARM referred to in our previous submission, and confirm their production of like goods. Where like goods are manufactured, the Commission must request production volumes to establish whether Galintel’s application is invalid in the event that its own production volumes do not meet the minimum 25% threshold for making an application.

Yours sincerely

John Bracic
